Angela,

Further to my voicemail message on Friday please find below the email I have received from Lynn Hobbs.

The second documented attached above, entitled Suspension cases - process was the one prepared for the meeting with BIS that Lynn was to attend in November – it is not clear from Lynn's email below if this document was discussed with BIS, the indication being Mike Granville was going to send these across to BIS (sorry I am not clear on the date of the meeting and the order of events here but from the third email I will send you it appears the process was not discussed at the meeting.)

I have two further emails from Lynn will I will forward on one relating to Horizon Integrity which Sue and Mike have already received and the third providing a brief ahead of the meeting with BIS.

Regards

John

John

This is the last email exchange I had with Mike Granville about the BIS meeting. The attached documents were what Mike was proposing sending to BIS and I commented as below. I haven't seen anything further but I did have a conversation with Mike about the whole 'remote access to Horizon' issue. This was being looked into by Andy McLean and Mark Burley. The view being expressed was that whilst this may be possible it's not something we have asked Fujitsu to provide. I don't know what the final outcome was.

I am also forwarding two further emails

One from Rod Ismay which is the final report he produced as a request from Dave Smith, MD, to review the whole issue of Horizon integrity

The second from Mike Granville with a document that was sent to BIS in August as a briefing in advance of Ed Davey's meeting with JFSA

Happy to discuss next week if it would help

Lynn

My reply to Mike and Rod

Mike, Rod

I'm happy with the report and just have one observation

I found out this week that Fujitsu can actually put an entry into a branch account remotely. It came up when we were exploring solutions around a problem generated by the system following migration to HNGX. This issue was quickly identified and a fix put in place but it impacted around 60 branches and meant a loss/gain incurred in a particular week in effect disappeared from the system. One solution, quickly discounted because of the implications around integrity, was for Fujitsu to remotely enter a value into a branch account to reintroduce the missing loss/gain. So POL can't do this but Fujitsu can.

Lynn

Rod / Lynn

Further to the meeting we had with Mike Whitehead about the JFSA – I am aiming to send this broad response note. Please can I ask if you could cast an eye over this and let me know if you have any comments – or whether I've missed anything. I'd like to be able to send tomorrow (Thurs) – so, if feasible, could I ask you to let me have any comments tomorrow.

Thanks

Mike
