Release Notice
Ref: TSC/PWY/017
Issue 1.0 - Released

Title: Release Notice for IGL1 Software Baseline

Author: Nick Gale

Document Controller: Nick Gale

REF: TSC/PWY/017 Status: Released

Summary: This document is the Release Notice for the IGL1 Software Baseline. It contains the definition of the contents of the baseline and provides a checklist of media and associated documentation to be used in the Build of the IGL1 Live system.

This software baseline reflects the software that was used during the UAT testing prior to 6/9/96.

0.2 Changes from previous issues

Issue 1.0 First release of the document

0.3 Changes Forecast

None for this document for IGL1. Patches for IGL1 will be provided with separate Release Notices.

Replacement documents are planned for IGL2 and Release 1.

1. Purpose of this Release

This document is the Release Notice for the IGL1 Software Baseline.

It contains the definition of the contents of the baseline and provides a checklist of media and associated documentation to be used in the Build of the IGL1 Live system.

This software baseline reflects the software that was used during the UAT testing prior to 6/9/96.

This document does not cover the CAS software that runs on VME.

2. Installation

The IGL1 Build Document, provided as part of this Release, covers the installation process for this software.

3. Limitations of this Release

3.1 Outstanding problems found in UAT

At the time of publication of this document, further problems are being investigated which are likely to require further updates to this software baseline. Such updates will be provided as 'patches' to this baseline, and will be covered by separate Release notices.

Refer to PinICL for the latest status of problems found during UAT.

3.2 Examine STOP and EOI

The **Help*Desk** 'Examine STOP and EOI' utility provided with this release will only install on a system that has the following visual basic libraries already installed:

VB40032.DLL
MSVCRT20.DLL
OLEPRO32.DLL
MSVCRT40.DLL

This problem will be rectified in a later release of this software.

3.3 Maestro Scripts

The Maestro scripts supplied with this release have still to be used in simulated operational environment. This is planned for the re-run of the UAT commencing 09/09/96.

4. Configuration Summary

4.1 Software Baseline for this document.

This represents the software baseline used in BA/POCL UAT1 up to 6/9/96. Further changes will be provided as incremental updates documented separately.

Component	Product	Version	Req for IGL1	IGL1 Release Media
Counter	Windows NT WS	3.51	Yes	(CD)

Maestro Workstation	Unixware PC, X Station or equivalent		Yes	N/A

4.2 Dependencies

These are covered in the IGL1 Build Document, reference TSC/PWY/015.

4.3 Superseded Products

None. This is the first software baseline provided for the building of the IGL1 live system.

4.4 Media and Documentation Checklist

The tables below provides a checklist of media and documentation handed over by The Solution Centre for this software baseline. Components from the list in 4.1 above that are not in this table are either standard 3rd party components, or in the case of Riposte version 50, is the CD-ROM as Released from Escher to Pathway.
