Subject:	HDR Defects update report - 24.09.2021
Attachments:	HDR Defects update report - 24.09.2021 v1.0.xlsx

Paul,

There are <u>NO CBIF</u> candidates to put forward this week. I am increasingly of the view that as HDR has now been clearly defined, candidates for CBIF are in fact HDR candidates now and CBIF is perhaps becoming defunct as a forum. I will monitor for a little longer before suggesting we retire CBIF.

I attach the updated weekly HDR report. Yellow highlights show what has changed from last week.

Changes:
- 1 HDR entry has been removed as agreed at HDR last week (PC0289332)
- 1 new HDR experience entry added titled "CBB-6156 - RDM.canTrade() is flawed"
- **We need 2 POL decisions regarding "switching JREs does not consider box-swap situation". These are both in bold in the update. We need a response as it will influence how we decide to fix this**
- Update added for the Help Screen Freezing defect investigation
- 3 PBS defects closed and 3 more added
- 8 Deferred defects closed and 5 added

Unchanged
- 6 other entries

I will need POL Problem references for the 2 marked as TBC in column C during the meeting on Monday please.

Have a great weekend.
