# 1 Introduction

This document lists the reports that are available in Post Office Ltd branches that have migrated to Horizon Online. It includes the definition of the structure of each report, a description of the source of the data, and examples.

The document defines the following:

- The format of: the daily report at branch level; the summarisation of daily and weekly transaction vouchers at stock unit level; client daily summaries, including Girobank daily summaries, Postmaster Daily Record summaries, client stock unit and branch level reports, and report previews.
- The plain paper summaries that provide contingency cover during and after roll out.
- The various formatted outputs produced at each branch.
- The definition of the reports that are produced together as a group.

---

## 2 Scope

Only those reports produced by the counter applications are included in this document.

Each report and receipt is described in a separate section under the following section headings:

<b>Frequency:</b>	as required, daily, weekly
<b>Notes:</b>	
<b>Sequence:</b>	order of printed information
<b>Layout and Example Content:</b>	fields, position, contents
<b>Accounting Nodes:</b> (where applicable)	the highest level of accounting data that populates the report.

Note: The actual text in reports may vary from the examples shown. For example, the product set will change as a result of Operational Business Change processes, so that some products may no longer be transactable.

## 3 General Information

### 3.1 Printers

#### 3.1.1 Counter printer

The counter printer is used to print counter reports on a tear-off paper roll; the maximum line length is 42 character positions (with the exception of LFS Collection Receipt, Delivery Receipt, and Return Advice Note, which have a line length of 43 character positions – see DES/GEN/SPE/0009).

##### 3.1.1.1 Printer characteristics

The counter printer firmware contains a modified version of Code Page 850 which contains all the accented characters required in Welsh.

The characteristics are as follows:

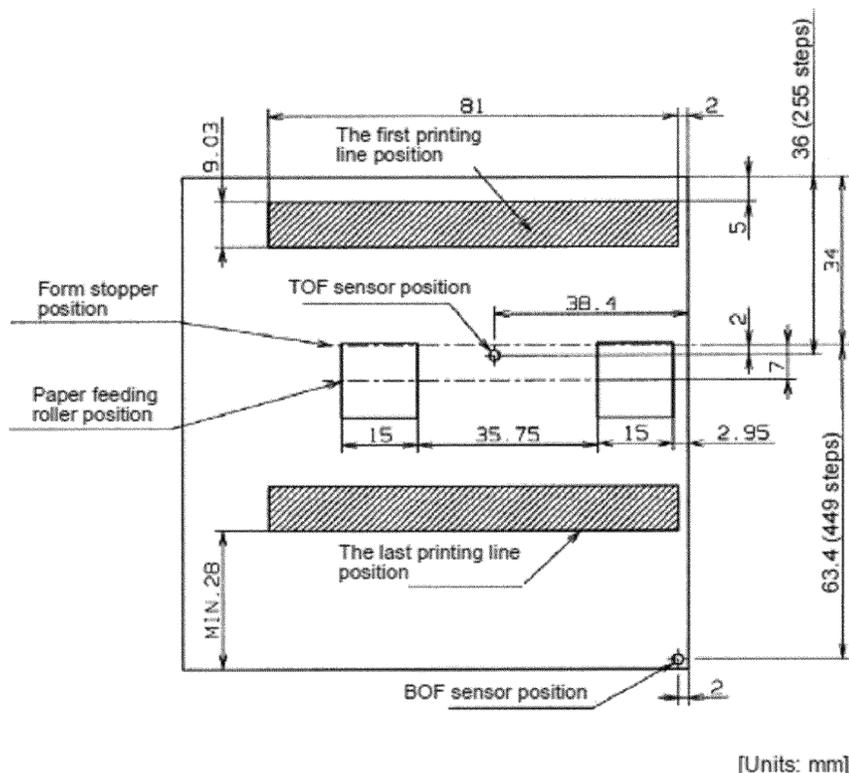

Characteristic	Setting
Font	Epson
Zero	Unslashed
Line pitch	Rec. 9 lpi / Slp. 7,8 lpi
Character pitch	Rec. 18 cpi / Slp. 16,3 cpi

##### 3.1.1.2 Paper feed specifications

Item	Specification
Paper feed method	Friction feed
Paper feed direction	Bidirectional
Feeding pitch	Approx 0.1411 mm (1/80 inch)
Continuous feed speed	Approx 150 mm/s (approximately 5.9 inches/s) at 35.4 lps

### 3.1.1.3 Printable area

### 3.1.1.4 Counter printer tear-off

The distance from the top of a pre-printed form is 0.06".

The distance from the tear-off position to the first printed line on the till roll is 0.07".

The minimum distance is 0.625" between the last printed line and either:

- The bottom of a pre-printed slip
- The tear-off position on the till roll

### 3.1.2 Office printer

Office printers print on A4 sheets in Courier font. Generally, reports have a maximum line length of 80 characters and a character size of 15 cpi. However, for an exceptionally wide report (for example the Office Weekly Suspense Account), the character size is reduced allowing a greater line length. Reports that cannot be accommodated in the normal portrait orientation are printed as landscape reports.

### 3.1.3 Counter reports

Counter reports report on transactions for a single stock unit. Some counter reports can be run at any time but others are part of the stock unit balancing process; these are documented in section 7.6.

### 3.1.4 Office reports

Office reports report on transactions for all counters in a branch and can be taken at any time during the week. However, those listed in section 3.1.7.2 rely on the stock unit cut-off reports being taken in order to populate the office report:

### 3.1.5 Report groups

Some reports can be produced only as part of a group; the current report groups are as follows

- Counter Daily Report Group (see section 4.1)
- Counter Weekly Report Group (see section 4.3)

The purpose of this grouping is to reduce the number of reporting requests handled by the Data Centre, particularly at busy times of the day, such as last post or end of day. By grouping together similar types of report, only one request is made to the Data Centre for data to populate all reports within that group. When the Group Reports button is selected the data is cached in the Horizon terminal and discarded when the user exits the Group Reports transaction.

Individual reports within the group cannot be requested separately.

#### 3.1.5.1 Null reports

Null reports within a report group are disabled and although they appear on screen, the user cannot select them to print and preview.

For reports that can be individually selected, users can print and preview null reports.

### 3.1.6 Single reports

When a single report button is selected, and the user selects to print or preview the report, the data is obtained from the Data Centre, cached in the Horizon terminal and discarded when the user exits the single report transaction.

### 3.1.7 Mandatory reports

The term mandatory is used for reports that must be produced in order for a Stock Unit or Branch to be rolled over to the next Balance Period or Trading Period.

#### 3.1.7.1 Stock unit level reports

If associated transactions are present, the following reports are mandatory in order for a Stock Unit Balance to be completed and rolled over to the next Balance Period or Trading Period:

- APS Transactions
- Giro Deposits
- Giro Withdrawals
- Green Giros
- IPS

**HNG-X Branch and Counter Reports**  
**COMMERCIAL IN CONFIDENCE**

- Personal Banking Cash Deposits
- Personal Banking Cheque Deposits
- Personal Banking Cheque Encashed
- Redeemed Stamps
- Travellers Cheques Purchases
- Travellers Cheques Sales

If there are outstanding mandatory reports, the stock unit will not be able to be balanced and to roll over to the next period. Cut-off reports must also be cut off (see section 3.1.8) before they can be printed.

At the stock unit level, all transactions must be reported, hence a report must be taken if there are outstanding transactions, and the system will not allow the user to proceed until the report is taken. Note that a report is only mandatory if there is any data to be included in it, and that previewing (or printing) the report will allow the user to proceed.

When the Stock Unit Balance report is selected, the system checks the balances. If there are outstanding summaries to be taken that have a cut-off option, it will display a list with those that are mandatory clearly identified.

### **3.1.7.2 Office level reports**

At office level, the following reports are mandatory:

- Office Weekly Postage Labels
- Office Weekly Redeemed Savings Stamps
- Office Weekly Suspense Account Report

and must be produced, if associated transactions are present, before the office can be rolled over.

Note: The above office reports are populated only by stock unit cut-offs that relate to the current Trading Period.

## **3.1.8 Cut-off reports**

The term cut-off means that the clerk must touch the Cut-off button after producing the report in order to effect the cut-off, resetting the report contents to zero. Any subsequent transactions will appear on the report for the next cut-off period.

### **3.1.8.1 Stock units**

Cut-off is automatic for all transactions in a stock unit when a roll-over (TP or BP) is performed. Otherwise the clerk must touch the cut-off button. See section 3.1.7.1 for a list of mandatory stock unit cut-off reports. Details are in section 4

### **3.1.8.2 Office reports**

The Office reports that are not populated until the stock unit cut-off reports are taken are listed in section 3.2.7.

These reports list all transactions that have occurred for all stock units, since the report was last cut off, or since the start of the TP.

### 3.1.8.3 Cut-off of cut-offs

These reports list summaries of all associated stock unit reports since the report was last cut-off, or the start of the TP. The following reports in this category are optional; they do not need to be cut off before the stock unit is rolled in to a new BP/TP:

- Office Daily IPS (see Section 5.1.1)
- Office Weekly Green/Violet Giros (see Section 5.2.1)

Office reports that are cut-offs of cut-offs are reset to zero until the cut-off is taken at stock unit level.

### 3.1.9 Reprints

A reprint facility is provided for the following reports:

- Branch Trading Statement (see section 7.3)

The time and date shown is the current time and date (not the time and date that the data was fetched from the data centre for the original report). However, Trading Period is the trading period of the original report not the current office trading period.

- Stock Unit Balance Report (see section 7.1.2)

Stock Unit, Trading Period and Balance Period are those of the original report.

- Despatch Report (see section 5.1.11)

Trading Period is the trading period of the original report, not the current office trading period.

- Exception Report (see section 5.1.12)

Trading Period is the trading period of the original report, not the current office trading period.

### 3.1.10 Preview facility

A report preview facility is provided to allow the report contents to be assessed by the user.

The report preview provides a WYSIWYG representation of the anticipated printed output with accurate display of the report format, content and pagination.

### 3.1.11 Dealing with mandatory reports when there are printer problems

If a mandatory report has to be produced, but the printer is not working, the clerk can proceed by using the preview facility and transcribing any necessary information.

Note that reports cannot be reprinted later if they have been cut-off, or if reprints are not permitted for the report type.

## 3.2 Definitions and Conventions

### 3.2.1 Session and Transactions IDs

#### 3.2.1.1 Session ID

Session IDs have the following format:

*cc-nnnnnn*

where *cc* is one or two digits

*nnnnnn* is a string with a value between 0 and 999999, with leading zeros suppressed

Within a branch, session ids are unique (although in busy branches they may restart from zero after a period of several years).

#### 3.2.1.2 Transaction ID

##### 3.2.1.1.1 Transaction IDs within a session

Transaction IDs have the numeric format *tttt* (0-9999) and are unique within a session. The first transaction within a session is Transaction ID 1 and the number is incremented for each transaction until the session is settled.

##### 3.2.1.1.2 Transaction IDs on reports

On reports, Transaction ID (TXN) is the complete unique identifier of each transaction: *cc-nnnnn-tttt* (Session ID + Transaction ID)

### 3.2.2 Customer

To the Post Office Clerk the *Customer* is the person standing in front of him or her.

### 3.2.3 Amounts

On reports, the standard field sizes for amounts are as follows:

- For a transaction entry, the maximum is 9999999.99-
- For a summary or total entry, the maximum is 99999999.99-
- For a summary of summaries (total of totals), the maximum is 999999999.99-

Note that there may be other limits imposed by reference data.

The pound and pence signs '£' and 'p' are used on some reports; no other currency symbols are used.

### 3.2.4 Signs

Signs (negative) are normally only shown on amounts (currency) for reversals, and if they cannot be inferred. Where the net value of a summary is negative as a result of a reversal, the total will be shown as negative.

### 3.2.5 Reversals

For all conventional transactions a reversal is shown as negative, with a trailing minus sign to balance out the erroneous transaction. The volume of any price within a group will be shown net of reversals (if one product is remitted and then the remittance reversed, total volume for that product will be shown as zero).

Reversals of remittances of stock that is held by volume, but where volume is not printed, are indicated by a reversal indicator 'R', printed to the right of the value field.

### 3.2.6 Null and zero values

For Summary reports zeroes are needed for Summary Totals, but the following rule applies for detail lines:

- If *value* sold is zero, print '0.00'.
- For stock held by volume, value is blank.
- If there is *no sale* of an item, do not print zeroes (leave blank) – except client-facing reports

Client-facing reports must print '0.00', as must Counter Daily reports.

### 3.2.7 Time

All times shown on reports are *local* time. That is they are either GMT or BST, as appropriate.

### 3.2.8 Field alignment

The general principle is for left hand fields to be left aligned, and right hand fields to be right aligned.

### 3.2.9 Representing products in examples

Product names are driven by Post Office Ltd Reference Data, and as the Horizon System is developed and improved, and business needs dictate, the names of products may change and products may be added or removed. Consequently, the report layouts are *examples*; actual product names in reports may vary.

### 3.2.10 Representing line numbers in field definitions

In the tables of field definitions, the line numbers refer to the line positions on the example layouts. Therefore, where a section of a report is repeated, the line numbers of such sections and subsequent ones on an actual report will vary.

For example, in the Counter Daily Cheques Listing, the information for each cheque transaction occupies one line; it is repeated for each transaction.

	1	2	3	4
	123456789012345678901234567890123456789012			
01	Feltham Post Office		FAD: 123456X	
02	11:42 17/01/2008	TP:10	BP:01	SU:SH1
03	Cheques Listing - Office Copy			
04				
05	TXN		VALUE	
06	1-52-2		5.00	
07	1-52-5		6.00	
08			-----	
09	TOTAL:		11.00	
10				
11	*** END OF REPORT ***			
	123456789012345678901234567890123456789012			

In the field definition for the above example, although the line number for the Total is given as line 9, the contents of line 6 are annotated 'repeated as necessary' to indicate that the line number on which the Total is printed is dependent on the number of transactions listed.

A line number with a trailing plus sign (+) indicates that the contents of the line may possibly wrap on to an additional line or lines.

## 3.3 Generic Report Layouts

### 3.3.1 Generic Header and Footer for the Counter Printer

The following layout is used for reports and slips printed on the till roll of the counter printer.

	1	2	3	4
	123456789012345678901234567890123456789012

## 4 Counter Reports

### 4.1 Counter Daily Report Group

This section describes reports that are included in the Counter Daily Report Group.

These reports list all transactions that have occurred for a given stock unit, since the report was last cut off, or if not cut off in this BP/TP then since the start of the BP/TP.

The following reports in this category are mandatory; if associated transactions are present they must be cut off before the stock unit can be rolled in to a new BP/TP:

- 4.1.1 Counter Daily Personal Banking Cash Deposits
- 4.1.2 Counter Daily Personal Banking Cheque Deposits
- 4.1.3 Counter Daily Personal Banking Cheque Encashments
- 4.1.4 Counter Daily IPS
- 4.1.5 Counter Daily Giro Deposits: Office Copy
- 4.1.6 Counter Daily Giro Deposits: Client Copy
- 4.1.7 Counter Daily Giro Withdrawals: Office Copy
- 4.1.8 Counter Daily Giro Withdrawals: Client Copy
- 4.1.9 Counter Daily Travellers Cheques Purchases
- 4.1.10 Counter Daily Travellers Cheques Sales
- 4.1.11 Counter Daily Foreign Currency Holdings
- 4.1.12 Counter Daily APS Transaction Listing

## 4.1.1 Counter Daily Personal Banking Cash Deposits

### 4.1.1.1 Description

This report is retained in the office. It allows in-office reconciliation of Personal Banking Cash Deposit transactions as entered on the Horizon Online system. It is included in the Counter Daily Report Group.

### 4.1.1.2 Frequency

Daily.

### 4.1.1.3 Notes

Mandatory for stock balancing but null reports not required.

Cut-off: must be cut off before the stock unit can be rolled in to a new BP/TP

Printed as part of the Counter Daily Report Group.

### 4.1.1.4 Sequence

Chronological order of entry by product, within Level 1 Accounting Node.

### 4.1.1.5 Layout and Example Content

## 4.1.5 Counter Daily Giro Deposits: Office Copy

### 4.1.5.1 Description

This report is retained in the office. It allows in-office reconciliation of Giro Deposit transactions as entered on the Horizon system. It meets the contractual requirements as agreed by Post Office and client. It is included in the Counter Daily Report Group.

### 4.1.5.2 Frequency

Daily.

### 4.1.5.3 Notes

The copy to be retained in the office is produced on the counter till roll as a single report. When this has completed, it is automatically followed by the same information produced on pre-printed slips (as described in Section 3.3.1) as a copy to be sent to the client.

Cut-off: must be cut off before the stock unit can be rolled in to a new BP/TP

The report checks on a Wednesday near EOD to determine if it should be inhibited.

The pre-printed client slip is mandatory for stock balancing but null reports not required.

Zero value fees are printed as '0.00'.

Printed as part of the Counter Daily Report Group.

### 4.1.5.4 Sequence

Chronological order of entry; reversals are netted and are not included in the count.

A reversal and the original transaction are suppressed as a set on the client report and the office copy. Note that if the original transaction had been included in a 'cut-off' report or preview, only the reversal can be suppressed.

Sub-totalled to mirror the subsequent client slips, resulting in a grand total.

## 4.1.6 Counter Daily Giro Deposits: Client Copy

### 4.1.6.1 Description

This report is sent to the client. It allows in-office reconciliation of Giro Deposit transactions as entered on the Horizon system. It meets the contractual requirements as agreed by Post Office and client. It is included in the Counter Daily Report Group.

### 4.1.6.2 Frequency

Daily.

### 4.1.6.3 Notes

The client copy is printed on the counter slip printer automatically after the copy be retained in the office (described in section 3.3.1) has completed.

Mandatory for stock balancing but null reports not required.

Cut-off: must be cut off before the stock unit can be rolled in to a new BP/TP

Reference Data specifies the number of entries that print, the limit is 20. If there are more than 20 entries, a new client slip is prompted for, and printed.

Zero value fees are printed as '0.00'.

This report is designed to allow the printing of the maximum specified number of characters in each field: that is, the Account Number field has 9 characters (specified in Post Office Ltd Reference Data).

The fields on the printed report are right-justified from the right-most character. If an increase in the Account Number field size is set up in Post Office Ltd Reference Data, this would print on the report, right-justified. Note, however, that the space between the Account Number field and the Total Value row would decrease.

The dimensions of the pre-printed slip stationery are given in section 4.1.6.6.

The typefaces are detailed in section 4.1.6.7

Printed as part of the Counter Daily Report Group.

### 4.1.6.4 Sequence

Chronological order of entry; reversals are netted and are not included in the count.

Suppress a reversal and the original transaction as a set on the client report and the office copy. Note that if the original transaction had been included in a 'cut-off' report or preview then only the reversal can be suppressed.

## 4.1.7 Counter Daily Giro Withdrawals: Office Copy

### 4.1.7.1 Description

This report is retained in the office. It allows in-office reconciliation of Giro Withdrawal transactions. It meets the contractual requirements as agreed by Post Office and client. It is included in the Counter Daily Report Group.

### 4.1.7.2 Frequency

Daily.

### 4.1.7.3 Notes

The office copy is produced on the counter till roll as a single report. When this has completed, it is automatically followed by the same information produced as a client copy on pre-printed slips as described in Section 3.3.1.

Cut-off: must be cut off before the stock unit can be rolled in to a new BP/TP

The report checks on a Wednesday near EOD to determine if it should be inhibited.

The pre-printed client slip is mandatory for stock balancing but null reports not required.

Printed as part of the Counter Daily Report Group.

### 4.1.7.4 Sequence

Chronological order of entry; reversals are netted and are not included in the count.

Suppress a reversal and the original transaction as a set on the client report and the office copy. Note that if the original transaction had been included in a 'cut-off' report or preview then only the reversal can be suppressed.

Sub-totalled to mirror the subsequent client slips, resulting in a grand total.

## 4.1.8 Counter Daily Giro Withdrawals: Client Copy

### 4.1.8.1 Description

This report is sent to the client. It allows in-office reconciliation of Giro Withdrawal transactions as entered on the Horizon system. It meets the contractual requirements as agreed by Post Office and client. It is included in the Counter Daily Report Group.

### 4.1.8.2 Frequency

Daily.

### 4.1.8.3 Notes

The client copy is printed on the counter slip printer automatically after the office copy (described in Section 3.3.1) has completed.

Mandatory for stock balancing but null reports not required.

Cut-off: must be cut off before the stock unit can be rolled in to a new BP/TP

Reference Data specifies the number of entries that print: the limit is 20. If there are more than 20 entries, a new client slip is prompted for, and printed.

This report is designed to allow the printing of the maximum specified number of characters in each field: that is, the Account Number field has 15 characters (specified in Post Office Ltd Reference Data).

The fields on the printed report are right-justified from the right-most character. If an increase in the Account Number field size is set up in Post Office Ltd Reference Data, this would print on the report, right-justified. Note, however, that the space between the Account Number field and the Total Value row would decrease.

The dimensions of the pre-printed slip stationery are given in section 4.1.8.6.

The typefaces are detailed in section 4.1.8.7.

Printed as part of the Counter Daily Report Group.

### 4.1.8.4 Sequence

Chronological order of entry within Client Accounting Week number (WK); reversals are netted and are not included in the count.

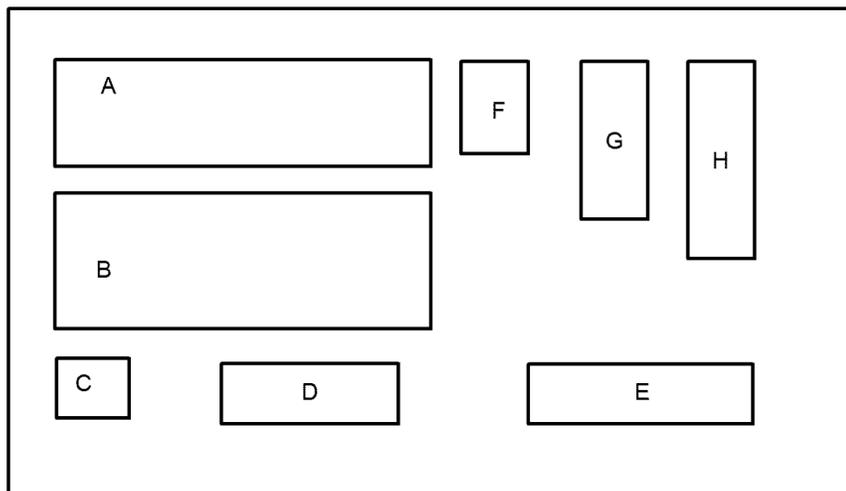

Suppress a reversal and the original transaction as a set on the client report and the office copy. Note that if the original transaction had been included in a 'cut-off' report or preview then only the reversal can be suppressed.

### 4.1.8.6 Dimensions of Counter Daily Giro Withdrawal Client Slips

The specifications below show the measurements of the client slips.

## 4.1.9 Counter Daily Travellers Cheques Purchases

### 4.1.9.1 Description

This is a report of client transactions and is retained in the office. It allows in-office reconciliation of Travellers Cheques Purchase transactions as entered on the Horizon system. It meets the contractual requirements as agreed by Post Office and client. It is included in the Counter Daily Report Group.

### 4.1.9.2 Frequency

Daily.

### 4.1.9.3 Notes

Mandatory for stock unit rollover.

The sterling equivalent shown is the total amount charged to the customer excluding the effect of any commission.

Two copies of this report are printed as a single request; one for the client and one that is filed locally.

Cut-off: must be cut off before the stock unit can be rolled in to a new BP/TP

Printed as part of the Counter Daily Report Group.

### 4.1.9.4 Sequence

ASCII character order. (In ASCII sequence, 'US' comes before 'Uruguay'.)

## 4.3 Counter Weekly Report Group

The Counter Weekly Report Group currently contains the following reports.

- 4.3.1 *Counter Weekly Miscellaneous Transactions*
- 4.3.2 *Counter Weekly Green/Violet Giros*
- 4.3.3 *Counter Weekly Redeemed Savings Stamps*
- 4.3.4 *Counter Weekly Remittances In*
- 4.3.5 *Counter Weekly Remittances Out*
- 4.3.6 *Counter Weekly Stock on Hand*
- 4.3.7 *Counter Weekly Transfers In*
- 4.3.8 *Counter Weekly Transfers Out*

---

## 4.3.1 Counter Weekly Miscellaneous Transactions

### 4.3.1.1 Description

This is a report of client transactions and is retained in office. It allows in-office reconciliation of transactions entered on to the Horizon system. It is included in the Counter Weekly Report Group.

### 4.3.1.2 Frequency

Whenever the stock unit is rolled over.

### 4.3.1.3 Notes

Cut-off. Optional for stock unit rollover.

Reversals will have trailing negative, all other transactions are positive (because they are grouped in collections with homogenous accounting sense).

Exceptions to this are Unclaimed Payments and Uncharged Receipts, both of which include positive and negative transactions. In the example below, Unclaimed Payments is shown as netting to zero because the losses (2600) equal the redemptions (2601).

The report is restricted to Serve Customer mode only, plus some housekeeping and New Reversals transactions; it excludes RIAD and ROAD transactions and reversals.

Printed as part of the Counter Weekly Report Group.

### 4.3.1.4 Sequence

Chronological order of entry by product, within Level 1 Accounting Node order, within Level 2 Accounting Node order.

Levels 1 and 2 Accounting Nodes and products are all in ascending numeric sequence.

## 4.3.2 Counter Weekly Green/Violet Giros

### 4.3.2.1 Description

This is a report of client transactions and is retained in office. It allows in-office reconciliation of transactions as entered on the Horizon system. It meets the contractual requirements as agreed by Post Office and client. It is included in the Counter Weekly Report Group.

### 4.3.2.2 Frequency

Weekly.

### 4.3.2.3 Notes

Mandatory for stock balancing but null reports not required.

Cut-off.

The report checks on a Wednesday near EOD to determine if it should be inhibited.

Printed as part of the Counter Weekly Report Group.

### 4.3.2.4 Sequence

- Chronological order of entry by product in ascending Product ID order.
- Totals for each product in ascending Product ID order.

## 4.3.6 Counter Weekly Stock on Hand

### 4.3.6.1 Description

This report is retained in the office. It records the value stock holdings within stock unit down to product detail and provides a snapshot of stock levels as known to the Horizon system. It is included in the Counter Weekly Report Group.

### 4.3.6.2 Frequency

Whenever a stock unit is rolled over.

### 4.3.6.3 Notes

Optional for stock unit rollover.

Printed as part of the Counter Weekly Report Group.

### 4.3.6.4 Sequence

Product within accounting node level 1, totalled at accounting node level 2.

4.3.6.5 Layout and Example Content

## 4.3.7 Counter Weekly Transfers In

### 4.3.7.1 Description

This report is retained in the office. It allows in-office reconciliation of successfully completed transfer-in transactions for the current stock unit TP entered on to the Horizon system.

The report is included in the Counter Weekly Report Group.

### 4.3.7.2 Frequency

Whenever a stock unit is rolled over.

### 4.3.7.3 Notes

Optional.

Reports on current stock unit TP; it is not limited to BP.

Filed locally.

Printed as part of the Counter Weekly Report Group.

### 4.3.7.4 Sequence

- Chronological order of entry
- Grouped by Session ID, then by product

### 4.3.8 Counter Weekly Transfers Out

#### 4.3.8.1 Description

This report is retained in the office. It allows in-office reconciliation of transfer-out transactions for the current stock unit TP entered on to the Horizon system. The report lists transfers out of the current stock unit whether or not they have been completed, so includes pending transfers. Reversals appear as an extra transfer with the opposite sign.

The report is included in the Counter Weekly Report Group.

#### 4.3.8.2 Frequency

Whenever a stock unit is rolled over.

#### 4.3.8.3 Notes

Optional.

Reports on current stock unit TP; it is not limited to BP.

Filed locally.

## 5.1.2 Office Daily Remittances In

### 5.1.2.1 Description

This is an office-wide report (i.e. it reports on all stock units) that is printed on the A4 back office printer. It allows in-office reconciliation of remittance sessions entered on to the Horizon system. It is a single report and not part of a Report Group.

### 5.1.2.2 Frequency

Daily (see note in section 3.1.8.2).

### 5.1.2.3 Notes

Filed locally.

Portrait. Optional.

If no date range is selected the report will include data within the current Office Trading Period from the start of the current Trading Period up to the present time. If a date range has been selected, the report will include data within the current Office Trading Period for the specified period. Today's date may be used in either or both of Start Date and End Date. Start and End date refer to Trading dates except where End date is today.

Totals of all remittances entered on the system.

### 5.1.2.4 Sequence

## 5.1.4 Office Daily Planned Orders

### 5.1.4.1 Description

This is an office-wide report (i.e. it reports on all stock units) that is printed on the A4 back office printer. It provides the office with advanced information of the content and proposed delivery date of an inward remittance. It is a single report and not part of a Report Group.

### 5.1.4.2 Frequency

As required.

### 5.1.4.3 Notes

Portrait. Optional.

A Planned Order is selected for printing, from the Planned Orders screen.

No need to retain.

Date and time on the Planned Order is the time that the Planned Order was printed by the system.

### 5.1.4.4 Sequence

The list of orders is sorted in the sequence: 'not viewed' followed by 'viewed' in reverse date/time order of receipt by Fujitsu Services from SAP ADS. (Note that Planned Orders are received in files and so there can be multiple orders in a file for a branch with the same date and time.)

## 5.1.5 Office Daily Foreign Exchange Rates

### 5.1.5.1 Description

This is printed on the A4 back office printer. It records a subset of the daily exchange rates downloaded to the Horizon system. It is a single report and not part of a Report Group.

### 5.1.5.2 Frequency

This can be automatically printed when the rate or margin files are processed, depending on a setting on the rate board specification screen.

May also be printed as required.

### 5.1.5.3 Notes

Portrait. Optional.

Filed locally.

### 5.1.5.4 Sequence

Number and order of rows as rate board specification, including optional commission lines if these have been requested. (For example, the rate board specification on which the following example is based is: eight displayed rows, with the last two reserved for the commission lines, and of which only the first four were populated with currency codes.)

## 5.1.9 Office Daily Outstanding Suspended Customer Sessions

### 5.1.9.1 Description

This is an ad-hoc daily office report. It allows in-office reconciliation of any outstanding suspended customer sessions awaiting full payment details by stock unit.

### 5.1.9.2 Frequency

This is an optional daily report, but as part of compliance outstanding suspended customer sessions should be cleared on a daily basis by capturing full payment details.

### 5.1.9.3 Notes

This is not a mandatory report enforced by the system.

The report at the time of production is populated with all currently stored outstanding suspended customer sessions, held at the office, awaiting full payment from the customer.

Any Suspended Customer Sessions cleared by recording full payment details obtained from the customer / postmaster will not appear again on any subsequent reports.

All Office Stock units will be included on the report and where a serving stock unit does not contain any outstanding suspended customer sessions, it is included on the report as a null/nil entry.

The Office Default Stock Unit is not reported.

### 5.1.9.4 Sequence

This report shows all outstanding suspended sessions for the office in the following order:

- Stock Unit/Balance Period
- Chronological order, oldest first.

## 5.1.10 Office Daily Revalued Product List

### 5.1.10.1 Description

This is an office-wide report (i.e. it reports on all stock units) that is printed on the counter printer. It records imminent price changes to fixed price products, and introduces new fixed price products. It is a single report and not part of a Report Group.

### 5.1.10.2 Frequency

A message detailing these changes is automatically displayed at logon for the three days before the change is effective. On each occasion the system prompts to print the details. On the effective date the list is printed automatically.

### 5.1.10.3 Notes

Optional.

New products will have no 'Old Price'.

### 5.1.10.4 Sequence

Changes in Product ID within accounting node order.

## 5.1.11 Office Daily Postal Services Despatch Report

### 5.1.11.1 Description

The despatch report reports on items that have been despatched by the despatch process. It is printed on the A4 back office printer. It applies to all stock units and unlike most other reports, is not limited to a Trading Period.

This report lists the items contained in counter despatches for all carriers since the last Despatch Report cut-off took place. When the report is selected, two copies are printed: one with barcodes and one without. The barcoded version is despatched with the items and the other is retained in the office.

It is a single report and not part of a Report Group.

### 5.1.11.2 Frequency

As required.

### 5.1.11.3 Notes

Cut-off. Optional for stock unit and office rollover. Data of up to 60 days old is available to the report.

A reprint facility is available that allows selection from a list in date/time order. On a reprinted report, the text '\* Reprint for *hh:mm dd/mm/yyyy* \*', where *hh:mm dd/mm/yyyy* is the current time and date, is inserted centred on line 2. On reprints, TP is the TP of the original report, not the current office TP.

### 5.1.11.4 Sequence

Alphabetic by Carrier.

Alphabetic by Service.

Date/time accepted.

Node.

## 5.1.12 Office Daily Postal Services Exception Report

### 5.1.12.1 Description

This report is retained in the office. It shows details of items that are missing from a despatch; these are the items known to the system but not scanned in as part of the exceptions process. It is printed on the A4 back office printer; it is a single report and not part of a Report Group.

The Postal Services Exception Report is produced automatically during the postal services despatch process if there are any exceptions.

### 5.1.12.2 Frequency

Invoked if exceptions are detected on completion of item scan during the discrepancy resolution process in Postal Services Despatch.

### 5.1.12.3 Template name

DespatchException

### 5.1.12.4 Notes

Mandatory if exceptions are found during despatch.

The report is produced automatically during the postal services despatch process if exceptions are identified.

The report lists the details of each missing item. This includes items accepted through Bulk Mail, Speed Bulk Mail and the Local Collect Return to Sender service.

A reprint facility is available that allows selection from a list in date/time order. On a reprinted report, the text '\* Reprint for *hh:mm dd/mm/yyyy* \*', where *hh:mm dd/mm/yyyy* is the current time and date, is inserted centred on line 2. On reprints, TP is the TP of the original report, not the current office TP.

The report applies to all stock units and nodes (nodes depend on the function selected), and is not limited to a Trading Period.

### 5.1.12.5 Sequence

## 5.2.2 Office Weekly Redeemed Savings Stamps Summary

### 5.2.2.1 Description

This is a report of client transactions and is retained in office (P3731MA substitute). It is an office-wide report (i.e. it reports on all stock units) that is printed on the A4 back office printer in portrait format. It allows in-office reconciliation of transactions as entered on the Horizon system. It meets the contractual requirements as agreed by Post Office and client. It is a single report and not part of a Report Group.

### 5.2.2.2 Frequency

Weekly.

### 5.2.2.3 Notes

Portrait.

Mandatory for office rollover. This is a 'cut-off of cut-offs' report based on what has been included in the counter report.

Sent to Chesterfield.

Totals of all products for the branch.

The following are printed in bold face:

- FAD code
- All input characters, except the Total value

### 5.2.2.4 Sequence

Office totals for each product.

## 5.2.3 Office Weekly Suspense Account

### 5.2.3.1 Description

This is an office-wide report (i.e. it reports on all stock units) that is printed on the A4 back office printer in portrait format. It records individual suspense account transactions and rolled-over values. It is a single report and not part of a Report Group.

### 5.2.3.2 Frequency

Periodic.

### 5.2.3.3 Notes

Portrait. Mandatory, if there is a value in a B/Fwd field or there are transactions to report.

Details of all transactions posted in or out of the Suspense Account during the TP. These transactions are applied to the B/Fwd figure to derive the C/Fwd figure that is taken forward to the next TP.

Filed locally.

### 5.2.3.4 Sequence

This report shows the suspense items within each section in the following order:

- SU
- Chronological Order of Entry

The order of sections is as follows. Only sections that contain values are included:

Group Name	Prod No./ Prod Grp	Reference Data Long Name
RD Cheques A	2530	Unpaid Cheque A to UP

## 5.2.4 Office Weekly Postage Labels

### 5.2.4.1 Description

This is an office-wide report (i.e. it reports on all stock units) that is printed on the A4 back office printer in portrait format. It allows in-office reconciliation of confirmed and rejected labels produced within the TP. It is a single report and not part of a Report Group.

### 5.2.4.2 Frequency

At the end of the Trading Period.

### 5.2.4.3 Notes

Portrait. Mandatory if at least one valid Postage Label transaction has been performed in the TP.

Cut-off. Filed locally.

The CONFIRMED section and REJECTED SUMMARY section are totals for all labels, per user, per balance period, per stock unit.

The REJECTED LABEL DETAILS section represents individual rejected label transactions.

### 5.2.4.4 Sequence

Confirmed then rejected transactions, sorted by:

- Stock unit/balance period
- Username

Rejected label details sorted by:

- Stock unit/balance period
- Username
- Chronological transaction order within counter

## 5.2.5 Office Weekly All Currencies in Pouches Awaiting Collection

### 5.2.5.1 Description

This is an office-wide report (i.e. it reports on all stock units) that is printed on the A4 back office printer in portrait format. It shows the details of all currencies in pouches awaiting collection suspense account transactions and rolled-over values. It should be printed if the all currencies in pouches balance on the Suspense Account (see Section 5.2.3) is not equal to the actual total value of the pouches in the branch. It is a single report and not part of a Report Group.

### 5.2.5.2 Frequency

As required.

### 5.2.5.3 Notes

Portrait. Optional.

Details of all cash and foreign currency in pouches transactions posted in or out of Suspense during the TP. These transactions are applied to the B/Fwd figure to derive the C/Fwd figure that is taken forward to the next TP.

Cash in pouches: products 5610 and 6509

Currency in pouches: product groups 7158 and 7159

Each cash and foreign currency pouch appears twice in suspense: once when it is packed (positive value) and again when it is subsequently despatched (negative value).

### 5.2.5.4 Sequence

This report shows the suspense items within each section in the following order:

- SU
- Chronological Order of Entry

The order of sections is as follows. Only sections that contain values are included:

Group Name	Prod No./ Prod Grp	Reference Data Long Name
Currency In Pouches		
	7158	BAR In Pouches Parent
	7159	BAR Out Pouches Parent

## 5.2.8 Office Weekly Transfer Reconciliation

### 5.2.8.1 Description

This is an office-wide report (i.e. it reports on all stock units) that is printed on the A4 back office printer in portrait format. It records reconciled and unreconciled transfer sessions in the TP. It is a single report and not part of a Report Group.

### 5.2.8.2 Frequency

As required.

### 5.2.8.3 Notes

Portrait. Optional.

### 5.2.8.4 Sequence

The report is printed in alphabetical order of source stock unit name, in Session ID sequence within alphabetical order of destination stock unit name.

There are subtotals for unreconciled transfers for each source stock unit /destination stock unit /session ID. There is also a subtotal for each source stock unit/destination stock unit and a total for each source stock unit/all destination stock units.

In the example in section 5.2.8.5 the blocks of data in lines 05-26, 28-36 and 38-47 are in the following sequence:

*Unreconciled Transfers from stock unit A to stock unit B in session ID order (with transfer details and unreconciled transfer value)*

*Reconciled Transfers from stock unit A to stock unit B in session ID order (with transfer details)*

*Subtotal (unreconciled transfer value from A to B)*

*Unreconciled Transfers from stock unit A to stock unit C in session ID order (with transfer details and unreconciled transfer value)*

*Reconciled Transfers from stock unit A to stock unit C in session ID order (with transfer details)*

*Subtotal (unreconciled transfer value from A to C)*

*Subtotal (unreconciled transfer value from A for all destination stock units)*

Note that there may be one or more destination stock units for each source stock unit (and one or more session IDs within that which may be reconciled or unreconciled).

Note that there may be one or more destination stock units for each source stock unit (and one or more transaction IDs within that), and that for each source stock unit there may or may not also be reconciled transfers.

## 5.2.9 Office Weekly Sales Report

### 5.2.9.1 Description

This is an office report that is printed on the counter printer. It records transactions performed, by product, and is used for statistical analysis of business. It is a single report and not part of a Report Group.

### 5.2.9.2 Frequency

As required.

### 5.2.9.3 Notes

Optional.

If no date range is selected the report will include all data within the current Office Trading Period from the start of the Trading Period up to the present time.

If a date range has been selected, the report will include all data (ignoring the current Office Trading Period) from the EOD of the day before the specified Start Date. If the End Date is before today then data is included up to the EOD of the End Date. If the End Date is today's date then data is included up to the present time. Today's date may be used in either or both of Start Date and End Date.

This report shows all the transactions carried out in Serve Customer modes. It also reflects Existing and New Reversals of such transactions.

The Volume field is not printed for Travellers Cheques.

The cash amount in this report is the net result of the cash transactions.

### 5.2.9.4 Sequence

Group order: 3003 Methods Of Payment, 3007 Value Stock, 3006 Receipts, 3005 Payments.

Within Group: Product within numerical Sub-Group, where Sub-Group is equivalent to Level 1 and Group is equivalent to Level 2.

## 5.2.10 Office Weekly Postmaster Remuneration Report

### 5.2.10.1 Description

This is an office report. It utilises date range criteria and is required on an ad-hoc basis to support investigation procedures and accounting queries, and to provide management information. It is a single report and not part of a Report Group.

### 5.2.10.2 Frequency

Monthly.

### 5.2.10.3 Notes

Portrait. Optional.

Not limited to a TP. Filed locally.

Produced for a specified date range. Transactions are shown from the start of the 'From' date (i.e. after the previous day's EOD marker) to the EOD marker of the 'To' date (but see the table below the example). Lines with zero totals are suppressed.

### 5.2.10.4 Sequence

- Wage Group.
- Wage Type.

## 6 Stock Unit Declaration Reports

This section describes the following reports:

- 6.1 Declaration: Cash on Hand
- 6.2 Declaration: Stamps on Hand
- 6.3 Declaration: Stock on Hand
- 6.4 Declaration: Foreign Currency
- 6.5 Declaration: Travellers Cheques Unsold

### 6.1 Declaration: Cash on Hand

#### 6.1.1 Description

This is an office report that is printed on the counter printer, and must be retained. It is mandatory that a declaration is made for each stock unit, for each balance period, in order to balance the stock units.

#### 6.1.2 Frequency

Daily – cash is declared daily for cash monitoring and replenishment.

The declaration can be made as many times as needed during the balance period, the system uses the last declaration for each declaration id.

#### 6.1.3 Notes

It is mandatory that a declaration is made for each stock unit, for each balance period, in order to balance the stock units.

Filed locally.

The user and declaration ids only appear on reports from shared stock units.

The amount is the total declared of each item.

Note that volumes are neither entered nor displayed on this report.

The totals for cash denominations are also used in the production of office totals for reports to SAP ADS.

#### 6.1.4 Sequence

The report is produced using an editable list with fixed order of coins and notes.

## 6.3 Declaration: Stock on Hand

### 6.3.1 Description

This is an office report that is printed on the counter printer, and must be retained. It is an optional record of stock in hand.

### 6.3.2 Frequency

Monthly, at a minimum – this report is optionally part of the shared stock unit balancing process.

The declaration can be made as many times as needed during the balance period, the system uses the last declaration for each declaration id.

### 6.3.3 Notes

Optional. This report is only available from shared stock units. Filed locally.

For value stock and MoP, the amount is the total value of each type of item (item value x volume).

### 6.3.4 Sequence

The report is produced using an editable list of products within accounting node.

### 6.3.5 Layout and Example Content

## 6.5 Declaration: Travellers Cheques Unsold

### 6.5.1 Description

This is an office report that is printed on the counter printer and must be retained. It is mandatory that a declaration is made for each stock unit that holds travellers cheques, for each balance period, in order to balance the stock units.

### 6.5.2 Frequency

Whenever the stock unit is rolled over – this report is part of the stock unit balancing process.

The declaration can be made as many times as needed during the balance period, the system uses the last declaration for each declaration id.

### 6.5.3 Notes

It is mandatory that a declaration is made for each stock unit, for each balance period, in order to balance the stock units.

Filed locally.

The user and declaration ids only appear on reports from shared stock units.

The volume is the total in the appropriate currency.

### 6.5.4 Sequence

The report is produced using an editable list with a fixed ordering.

## 7 Other Reports

In addition to the single reports that are included in sections 5.2 - 5.6, a number of reports are available on an individual basis to support various processes, and to provide specific required information; these reports fall into four main categories:

- Stock Unit Balancing
  - Stock Unit Balance Snapshot
  - Stock Unit Balance Report
- Office Balance Snapshot
- Branch Trading Statement
- Engineer Tests
  - Counter Printer Test
  - Slip Printer Test
  - Office Printer Test
  - PIN Pad Installation
  - PIN Pad Test
- Enquiries
  - Transaction Log
  - Event Log

---

## 7.1 Stock Unit Balancing Reports

The following Stock Unit Balancing reports are available:

- *7.1.1 Stock Unit Balance: Snapshot*
- *7.1.2 Stock Unit Balance: Report & Reprint*

The format of these three reports is the same.

## 7.1.1 Stock Unit Balance: Snapshot

### 7.1.1.1 Description

This is an office report that is printed on the counter printer, and is not required after the office has been balanced. It provides a snapshot of stock levels and receipts and payment transactions as known to the Horizon system.

### 7.1.1.2 Frequency

As required.

### 7.1.1.3 Notes

Optional.

Summary of all transactions performed in the stock unit and the totals by product of the cash in hand and the stock in hand. Stock held by volume is shown separately from value items and MoPs.

### 7.1.1.4 Sequence

The report has the following sections:

#### **Discrepancies Detail**

#### **Value Items and MoP**

Total Value Items and MoP

#### **Receipts**

Transfers In

Remittances In

Discrepancy Over Transferred

Discrepancy Short Resolved

Total Receipts

#### **Payments**

Transfers Out

Remittances Out

Discrepancy Short Transferred

Discrepancy Over Resolved

Total Value Items and MoP

Nett Discrepancies

Total Payments

Balance C/Fwd

#### **Stock Volumes**

Balance by volume of all stock items held by volume

The arithmetic is:

*Receipts + Balance B/Fwd = Total Receipts*

*Payments + Value Items + Net Discrepancies = Total Payments*

HNG-X Branch and Counter Reports  
COMMERCIAL IN CONFIDENCE

Value Items + Net Discrepancies = Balance C/Fwd.

Transfers, remittances and Bureau revaluations are included in the respective Receipts and Payments totals.

Within the VALUE ITEMS & MOP section, Products are listed in Product order (PLU number), within Sub-group within Group, where Sub-group is equivalent to Level 1 and Group is equivalent to Level 2.

Within the STOCK VOLUME section, Products are grouped by Sub-group within Group, but are not printed in any particular order. The Sub-group and Group headings are suppressed.

## 7.1.2 Stock Unit Balance: Report & Reprint

### 7.1.2.1 Description

This is an office report that is printed on the counter printer, and must be retained. Summary of all transactions performed in the stock unit and the totals by product of the cash in hand and the stock in hand at the close of the BP/TP.

### 7.1.2.2 Frequency

One per balance period; thus can be more than one in any TP.

### 7.1.2.3 Notes

Mandatory.

Summary of all transactions performed in the stock unit and the totals by product of the cash in hand and the stock in hand at the close of the BP/TP.

Stock held by volume is shown separately from value items and MoPs.

For an active stock unit, a 'Trial Balance' is printed when the report is first selected; when Rollover is selected the second print, titled 'Final Balance', is printed.

For a dormant stock unit, this report is produced automatically when the inactive stock unit is rolled over, by selecting 'Inactive SU Rollover' from the Office Balance menu. The TP, BP and SU printed in the header are those of the dormant stock unit being rolled over, not of the stock unit performing the rollover. The normal stock unit balance report is produced but titled 'Final Balance'. The brought forward and carried forward will have values, as will any stock values, all of which are rolled forward. As there are no transactions, other values will be zero.

Discrepancies are cleared to zero as part of the TP rollover process (by posting to Local Suspense).

### 7.1.2.4 Sequence

## 7.2 Office Balance Snapshot

### 7.2.1 Description

This is an office report that is printed on the counter printer, and is not required after the office has been balanced. It provides a snapshot of stock levels and receipts and payment transactions as known to the Horizon system.

### 7.2.2 Frequency

As required.

### 7.2.3 Notes

Optional.

### 7.2.4 Sequence

The report has the following sections:

#### Discrepancies Detail

#### Value Items and MoP

Total Value Items and MoP

#### Receipts

Balance B/Fwd

Sales Receipts

Remittances In

Discrepancy Over Transferred

Discrepancy Short Resolved

Total Receipts

#### Payments

Remittances Out

Discrepancy Short Transferred

Discrepancy Over Resolved

Total Value Items and MOP

Nett Discrepancies

Total Payments

Transfers In

Transfers Out

#### Balance C/Fwd

#### Stock Volumes

Balance by volume of all stock items held by volume

The arithmetic is:

$$\text{Receipts} + \text{Balance B/Fwd} = \text{Total Receipts}$$

$$\text{Payments} + \text{Value Items} + \text{Net Discrepancies} = \text{Total Payments}$$

HNG-X Branch and Counter Reports  
COMMERCIAL IN CONFIDENCE

Value Items + Net Discrepancies = Balance C/Fwd

Remittances are included in the respective Receipts and Payments totals. Transfers in and out are included in the balance carried forward.

Within the VALUE ITEMS & MOP section, Products are listed in Product order (PLU number), within Sub-group within Group, where Sub-group is equivalent to Level 1 and Group is equivalent to Level 2.

Within the STOCK VOLUME section, Products are listed in Product order (PLU number) within Sub-group within Group, but the Sub-group and Group headings are suppressed.

## 7.3 Branch Trading Statement

### 7.3.1 Description

This is an office report and must be retained. It provides the trading position for the branch for the whole trading period.

### 7.3.2 Frequency

Automatically produced on branch rollover into a new trading period.

### 7.3.3 Notes

The report is printed in landscape format and consists of two parts:

- **Summary:** This part contains data based on the details recorded when each stock unit is rolled over into the next trading period. A column is shown for each operational stock unit within the branch and also the suspense account. The first column provides a branch total and is obtained by summing the values in the row, including the suspense column. If there are more than four operational stock units, then additional pages are printed containing the extra stock unit details only (i.e. the branch and suspense totals are not repeated).
- **Stock Holdings:** This part consists of volume figures that are calculated by summing stock items volumes held across all stock units within the branch. The last page includes a footer comprising the number of transaction corrections applied during the period and a declaration for the branch manager to sign.

Because stock units may roll over on different days it is possible for consecutive Branch Trading Statements to overlap: for example, one report might show dates 11/03/2008 to 11/04/2008 and the next report might show dates 08/04/2008 to 10/05/2008.

The report title depends upon the circumstance in which the report is produced, as follows:

- For a trial statement, line 3 contains:  
'Trial Branch Trading Statement - Office Copy From *dd/mm/yyyy* To *dd/mm/yyyy*'
- For a final statement, line 3 contains:  
'Final Branch Trading Statement - Office Copy From *dd/mm/yyyy* To *dd/mm/yyyy*'
- For a reprint of the final statement, in addition to the line 3 title, line 2 contains the text:  
'(Reprint for *hh:mm dd/mm/yyyy*)'.

Filed locally.

### 7.3.4 Sequence

- **Summary:** Stock units appear across the page(s) in alphanumeric sequence. On the first page, a column for the branch total and a column for suspense items precede these. The manager's stock unit can appear in any position.
- **Stock Holdings:** The sequence of stock items is the same as that used for generating the stock holding sections of the stock unit balance reports.

## 7.4 Enquiries

The following reports are available for specific enquiries:

- 7.4.1 *Transaction Log*
- 7.4.2 *Event Log*

### 7.4.1 Transaction Log

#### 7.4.1.1 Description

This is an office report that is printed on the counter printer. It is a multipurpose record used to identify the reference of a transaction that is a candidate for reversal or a general enquiry.

#### 7.4.1.2 Frequency

As required.

#### 7.4.1.3 Notes

Optional.

A search by Node ID reports on transactions committed on that node.

#### 7.4.1.4 Sequence

Chronological order of entry, against the following filter criteria set by the user:

SU, TP, User, Product/MoP, Date From, Date To, Time From, Time To, Value From, Value To, Mode, Session ID, Node ID.

7.4.1.5 Layout and Example Content

Quantity	12	02-11	10	This line for BdeC txns only. Printed for quantities that exceed 7 digits. Up to 7 digits, the field is printed in the Volume field on line 11 (8th position is sign).

**7.4.1.7 Accounting Nodes**

Root Node: 3017

## 7.4.2 Event Log

### 7.4.2.1 Description

This is an office report that is printed on the counter printer. It is a multi-purpose record for general enquiry purposes, or to trace a specific system activity.

### 7.4.2.2 Frequency

As required.

### 7.4.2.3 Notes

Optional. Filed locally.

For those options that allow TP as a criterion, the user is able to select from a list of the available TPs and TP-BP combinations.

Events are filtered by the criteria set by user (Date to, Date from, SU, TP/BP, and User).

### 7.4.2.4 Sequence

Chronological order of entry. The User Events report is ordered by user, then chronological order of entry. The User History report is ordered by the user being changed, then chronological order of entry.

## 7.4.3 User Summary Report

### 7.4.3.1 Description

This is an office report that is printed on the counter printer. It is a multipurpose record for general enquiry purposes, or to trace a specific system activity.

### 7.4.3.2 Frequency

As required.

### 7.4.3.3 Notes

Optional.

Details of all users who have access to the system.

### 7.4.3.4 Sequence

Users listed in alphabetic order.

### 7.4.3.5 Layout and Example Content

```

the exact text can change, and so differ from that in the example.

#### 7.4.3.6 Definition

Field Name	Line No.	Character Positions	Length	Contents/Notes
User Summary Header:				
Time	01	01-08	8	<i>hh:mm</i> ) Time and date
Date	01	10-20	11	<i>dd/mm/yyyy</i> ) of report.
FAD Code	02	13-19	7	<i>ffffff</i>
Heading	05	11-36	26	'USER SUMMARY – Office Copy'
User Summary Details:	09			Repeated as necessary.
Username		01-06	6	A leading asterisk denotes a global user.
Access Level		14-22	9	
Total	20	40-41	2	Total of users.

## 7.5 Messages and Notifications

### 7.5.1 Description

Messages and notifications received in the branch can be displayed and printed on the counter printer.

### 7.5.2 Frequency

As required.

### 7.5.3 Notes

Messages are available to be viewed or printed until they are automatically deleted from the branch once the retention period has expired.

### 7.5.4 Sequence

Memos are presented in a list containing all non-expired memos ordered by Unread, most recent first, followed by Read most recent.

### 7.5.5 Layout and Example Content

## 7.6 Engineer Reports

This section describes the reports that can be produced from hardware tests.

- *7.6.1 Counter Printer Test*
- *7.6.2 Slip Printer Test*
- *7.6.3 Office Printer Test*
- *7.6.4 PIN Pad Installation*
- *7.6.5 PIN Pad Test*

## 7.6.1 Counter Printer Test

### 7.6.1.1 Description

This report can be invoked to test the functioning of the counter printer's tally roll printer component.

### 7.6.1.2 Frequency

As required.

### 7.6.1.3 Notes

The report's data is produced automatically.

### 7.6.1.4 Sequence

N/A

### 7.6.1.5 Layout and Example Content

## 8 Migration to Horizon Online

### 8.1 Pre-Migration Report

#### 8.1.1 Description

The Pre-Migration report is initially run on Horizon, and prints an office snapshot with Foreign Currency details. This report can be re-generated on HNG-X using data provided by Horizon.

#### 8.1.2 Frequency

Immediately preceding migration to Horizon Online.

#### 8.1.3 Notes

Mandatory for migration to Horizon Online. It can be reprinted.

Note that on line 2 of this report and any reprints of it, TP is the Branch TP, not the Stock Unit TP/BP.

#### 8.1.4 Sequence

The report has the following sections:

##### **Discrepancies Detail**

##### **Value Items and MoP**

Total Value Items and MoP

##### **Receipts**

Balance B/Fwd

Sales Receipts

Remittances In

Discrepancy Over Transferred

Discrepancy Short Resolved

Total Receipts

##### **Payments**

Remittances Out

Discrepancy Short Transferred

Discrepancy Over Resolved

Total Value Items and MOP

Nett Discrepancies

Total Payments

Transfers In

Transfers Out

##### **Balance C/Fwd**

##### **Stock Volumes**

Balance by volume of all stock items held by volume

##### **Foreign Currency**

The arithmetic is:

$$\text{Receipts} + \text{Balance B/Fwd} = \text{Total Receipts}$$

HNG-X Branch and Counter Reports  
COMMERCIAL IN CONFIDENCE

*Payments + Value Items + Net Discrepancies = Total Payments*

*Value Items + Net Discrepancies = Balance C/Fwd*

Remittances are included in the respective Receipts and Payments totals. Transfers in and out are not included in the balance carried forward.

Within the VALUE ITEMS & MOP section, main RECEIPTS section, and main PAYMENTS section, products are listed in product order (PLU number), within Sub-group within Group, where Sub-group is equivalent to Level 1 and Group is equivalent to Level 2.

Within the STOCK VOLUME section, products are listed in Product order (PLU number), within Sub-group within Group, but the Sub-group and Group headings are suppressed.

Within the Foreign Currency section, products are listed in Product order (PLU number), within Sub-group equivalent to Level 1.

## 8.2 Post-Migration and Comparison Report

### 8.2.1 Description

The Post-Migration report is run on first logon to HNG-X and prints the same information as the Pre-Migration report, together with any differences.

### 8.2.2 Frequency

Immediately following successful migration to Horizon Online.

### 8.2.3 Notes

Mandatory following migration to Horizon Online. It can be rerun.

Note that on line 2 of this report and any reprints of it, TP is the Branch TP, not the Stock Unit TP/BP.

### 8.2.4 Sequence

The report is produced automatically immediately after the completion of migration.

For the sequence of sections within the report see section 8.1.4.

### 8.2.5 Layout and Example Content

**8.2.5.5 Definition**

The definition of fields is the same as for the Pre-Migration report in section 8.1.6.  
The report is immediately followed by the hard-coded report shown below.

**8.2.5.6 Comparison Report (with differences)**

**Note:** this is an example of the format and layout only. As many example lines of data as possible have been included, so the report does not show a consistent or realistic set of figures.
