Multiple Opportunities

Siebel References: Globe - ŪKR&RMG-JRU-55315 DMS - UKR&RMG-SKI-52484

1st June 2009

Andy Startin

Objectives:

- Update on Globe and Device Managed Service
- 2. Agree bid budget for each opportunity
 - . Globe £61.2k
 - DMS £49k

© Fujitsu Services 2009

Bid Approval - Introduction

The Objectives of a Bid Approval Review are as follows:

- · Review/revise the win strategy as appropriate
- · Review the critical success factors for the opportunity
- · Confirm the baseline and 'deliverability' of the solution
- To approve a price and the basis of the price to be quoted
- Ensure that the resource is available to bid and deliver the solution
- Secure the authorisation to make an offer or commitment to a customer

To facilitate the achievement of these, the sequence of slides in the presentation template should be retained and no slides removed from the set. If any slide is felt to be unnecessary for a given opportunity, the blank template should be retained in sequence.

Review context

- Update PSD on progress with 2 of RMGA's significant opportunities
- Both opportunities are at an early stage, therefore we don't have all the answers
- Multiple review due to time constraints
- The success of the Account is dependant on securing these opportunities – and then delivering them to the plan.

Opportunity Review

Version 7.4 January 2008

Post Office Ltd - Business summary

- •A wholly owned subsidiary of Royal Mail Group plc
- •The largest post office network in Europe
 - £1bn Turnover
 - 9,200 Employees
 - 11,700 Branches
 - 33,000 Counters
 - 63M transactions per week
 - 15p in every £1 transacted in the UK handled via POL
 - •POL are looking to utilise their existing footfall and customers to increase their capacity of financial products
- · POL provides:
 - · postal services
 - · financial & banking services
 - · travel services
 - · home phone and telephony services
 - leisure services like gift vouchers and cards, lottery products and license applications.
- •The largest ADSL network in UK
- •Currently in talks with Government regarding the 'de-merger' of POL and RMG following recommendations in the Hooper Report

Opportunity Review

Version 7.4 January 2008

Fujitsu's Relationship with Post Office

- Fujitsu is Post Office's Preferred System Integrator and largest IT supplier
- The existing Horizon system supports all Post Office branches and forms the spine of their IT system
- The HNG-X Programme will replace Horizon with an up-to-date and more cost effective system during 2010
- Fujitsu also hosts the separate POL Financial System (POLFS) and the new Management Information and Master Data systems (POL MI)
- Fujitsu making excellent progress with POL SAP project.

4 © Fujitsu Services Ltd. 2009 Opportunity Review Version 7.4 January 2008

FUJITSU

Globe - UKR&RMG-JRU-55315

- Business Requirements
- POL want to introduce a mainstream current account (codenamed "Globe") featuring internet banking etc. in May 2010, in partnership with Bank of Ireland
- In the past, they've partnered with "White Label" product suppliers, thereby relinquishing control of their sales processes and systems, and losing the opportunity to invest in reusable IT
- But this new product is big enough to support some strategic investment in parallel, so POL will underpin "Globe" with a new Service Oriented Architecture (SOA) codenamed "Plug and Play" – this means an alternative to "White Label" allowing POL to retain control, and improve IT reuse
- POL want to use Globe as a vehicle to enable their Plug & Play strategy
- POL believe this will make future projects quicker and cheaper to deliver, though they haven't qualified this view
- The initial load for Globe is based on 85,000 users in year 1, 2 x Data Centres, 1,500 Use Cases, 7 year audit, ...

| 5 | © Fujitsu Services Ltd. 2009 | Opportunity Review | Version 7.4 January 2008 | |
|---|------------------------------|--------------------|--------------------------|--------|
| | | | | FUÏTSU |

Opportunity Context

Importance to Post Office

- · Biggest single spend before 2011
- Critical to bringing Post Office into financial balance a commitment made to government
- Plug and Play architecture underpins POL's "11-16 Strategy" increases speed-to-market, reduces product development costs.

Importance to Fujitsu

- SOA is the future for our Business Solutions, and a critical-enabler to growing our AS business. (It was once called "TRIOLE for Applications")
- We're short on experience and references, and this project would make a compelling case study
- · We need our best people on this, for the good of the account and for Fujitsu.

8 © Fuiltsu Services Ltd. 2009 Opportunity Review Version 7.4 January 2008

9 Opportunity Review Version 7.4 January 2008

Key Sales Issues

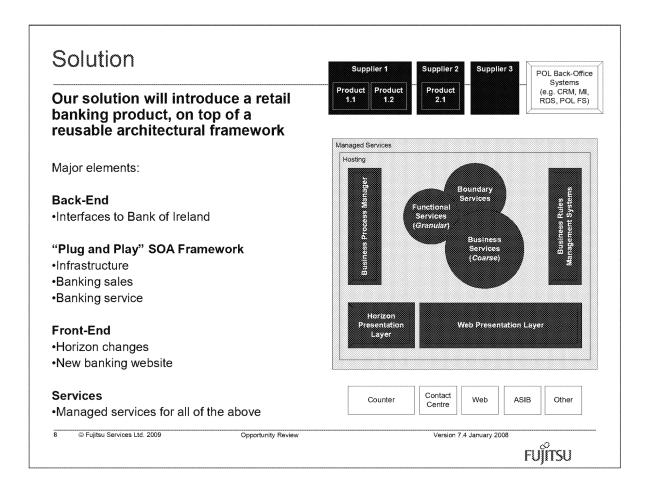

- Credibility problem in Fujitsu delivery of major application projects
- This must become the accounts No.1 priority opportunity for 2009/2010. We must let POL know this.
- There is a risk that "Plug and Play" (70% + of TCV) might be pulled, because Globe alone could be delivered much more quickly and cheaply
- We know that some of POL's costs are currently missing from the business case
- SOA is not yet one of our core capabilities
- Further HNG-X slippage would impact Globe timescale.

Opportunity Review

Version 7.4 January 2008

Decision Guidelines / Evaluation Criteria

| Criteria | Weight | How do we match up? | How do our competitors match up? |
|---------------------------------------|--------|---|--|
| Timescales | High | POL want to beat Tesco and Boots to market with a current account. POL believe they can avoid OJEU by going single tender to Fujitsu. We haven't committed to timescales yet. | Accenture are spending millions helping POFS to enhance the current Alnova mechanism for integration with Bofl |
| Confidence in Supplier Delivery | Medium | POL Exec. Team worried about Fujitsu delivering a large, critical project on time. | systems. This ought to be easier than delivering Plug and Play, but Mike |
| Price | Medium | We've assisted with the business case, but price is subject to change after due diligence phase. | Young believes it will still take too long. |

9 © Fujitsu Services Ltd. 2009 Opportunity Review Version 7.4 January 2008

FUĴITSU

Do we fully understand the customer's evaluation criteria and weighting? How do we match up to these?

See the Sales Methodology Guide to learn more about decision guidelines (follow the linked symbol on the page)

Procurement Process and Timetable

| Milestone | Date | Owner |
|--|--|--------|
| Business Case Development | 21st April 2009 | POL |
| IC Approval | 29 th April 2009 | POL |
| POL funded Due Diligence phase (Scope, Requirements, Outline Architecture) | From 5 th May for 3 months, with INCREMENTAL MONTHLY MILESTONES | POL/FJ |
| Horizon Requirements for Globe baselined | End of May | POL/FJ |
| POL Go/No Go decision on Fujitsu proposal | End of June | POL |
| Development and Delivery | Q2 to end of year | POL/FJ |
| Globe Current Account live | May 2010 | POL/FJ |

FUĴÎTSU

Procurement Process and Timetable Detail Key milestones in procurement timetable (highlight critical dates such as submission)

Value Proposition (Internal, 1st draft and WIP)

- Fujitsu's existing contract allows POL to avoid OJEU which saves them 3 to 6 months and £800k procurement costs
- Fujitsu have a proven track record in Horizon delivery and service, although this has been dented recently
- Fujitsu have the knowledge, capability and resources to link Globe into Horizon Online, and we have unique experience in working with other POL systems
- We have insight and influence into Post Office's IT strategy
- This prevents a competing apps developer from getting close to our key customer.

11 © Fujitsu Services Ltd. 2009

Opportunity Review

Version 7.4 January 2008

FUĴITSU

Value Proposition:

Do we sufficiently understand the customers business drivers to ensure that they can see tangible value in our proposals? True value means that the customer is wiling to ascribe a monetary value to the benefit it brings to them (or add cost to a competitors proposal).

Can we articulate this in plain language that is easy to understand and assimilate? It needs to communicated at all levels in the customer organisation with nothing left to chance

Overview of Relationship Plan

Competition:

Provide detail on the strengths and weaknesses of the competition against those of Fujitsu Services How we will counter the competitors tactics?

Ensure that these competitors are qualified by using the Qualification Tool

Winning Behaviours

- · Work hand in hand with POL to define scope, requirements, timescales and costs
- · Need the right people with the right skills, now
 - · Treat this as a bid and demonstrate hunger and a change in behaviour
 - · Field strong calibre people for initial study
 - Field complementary consultancy
 - · Evangelise P&P
- · Emphasize our commitment to delivering this
 - Delivering this properly will help recover our poor past performance
 - · Demonstrate we can deliver to an agreed plan
- · Look and feel differently to HNG-X engagement behaviour changes
 - · Work alongside HNG-x without disrupting it
- · Co-exist with SAP Consolidation, and ensure it continues to deliver well
- · Seek Fujitsu Group support for investment?

14 © Fujitsu Services Ltd. 2009 Opportunity Review

Version 7.4 January 2008

FUÏTSU

Win Strategy:

Provide an overview of the sales strategy for winning this piece of business How are we planning to win this bid? Do we have the right relationship(s) in place? Describe Fujitsu Services unique strengths which will ensure that we win the bid

Early View of Finances

Set-up charges in 2009-10 will be approximately £12M to £13M +/-25%, comprising ...

- £7m-£8m for development (for 1,500 Use Cases)
- £3m-£4m for testing
- £1.5m-£2m for hosting, hardware, P&PM, transition etc. (excludes software licences).

Estimate for ongoing charges up to a further £2m pa

Total potential TCV = £20m.

This must become the accounts No.1 priority opportunity for 2009/2010. We must let POL know this.

15 © Fujitsu Services Ltd. 2009

Opportunity Review

Version 7.4 January 2008

Delivery Resource Requirements (early view)

"Requirements and Scoping" work from Tuesday 5th May needs:

- •Programme Manager (Mike Nardin FJ to fund)
- •Solution Architect (John Heath need to secure him)
- •2 x Requirements Analysts (Phil Boardman, Chris Bailey)

We need to use "John Heath" - a CSA experienced in SOA and banking, but currently on Thomson Reuters

In later phases, we'll need significant AS, IS and Service Transition resource

We'll also need some Horizon Online skills, to ensure Globe integrates with the counter.

POL funded for 3 months

DMS - UKR&RMG-SKI-52484

Business Requirements

- POL have several engineering companies undertaking similar tasks visiting the branch
 - ROMEC
 - Ingenico
 - CSC
 - Etc.
- POL have a desire to consolidate the engineering visits by appointing a prime contractor who:-
 - · Reduces visits of a similar nature
 - Reduces cost
 - Enables POL to manage a single accountable provider
 - · Improves service
 - · Actively reduces incidents
- Our indicative proposal will build POL's business case for change
 - ET approval will allow POL to work with us to build a formal offer.

23 © Fujitsu Services Ltd. 2009 Opportunity Review Version 7.4 January 2008

FUĴſTSU

Opportunity Context

Importance to Post Office

- · Facilitates independence from RMG and their suppliers
- · Cost reduction both immediately and over time
- POL are hugely supportive of our approach to Service they want to move our expertise across the entirety of their estate
- · Managing a single prime will reduce overheads within their business
- · A supplier with a single view of their estate is seen as a big benefit.

Importance to Fujitsu

- This would protect our current Service from other suppliers
- Over time this could generate £60m of new TCV
- · Making this a success would gain credibility for us with RMG
 - RMG expected to tender DMS in 2009/2010.

24 © Fuiltsu Services Ltd. 2009 Opportunity Review Version 7.4 January 2008

Opportunity Review Version 7.4 January 2008 FUNTSU

Key Sales Issues

- · We do not understand the current value of the contracts that exist
- We are working under an NDA
- We haven't approached this as an opportunity to date
- There will be complex commercial terms to negotiate
 - TUPE
 - Novation?
- We need to work with POL to develop a roadmap for this task
- Lack of Lotus Notes capability
- POL expect us to do this better and cheaper than the other providers do.

25 © Fujitsu Services Ltd. 2009

Opportunity Review

Version 7.4 January 2008

Solution scope

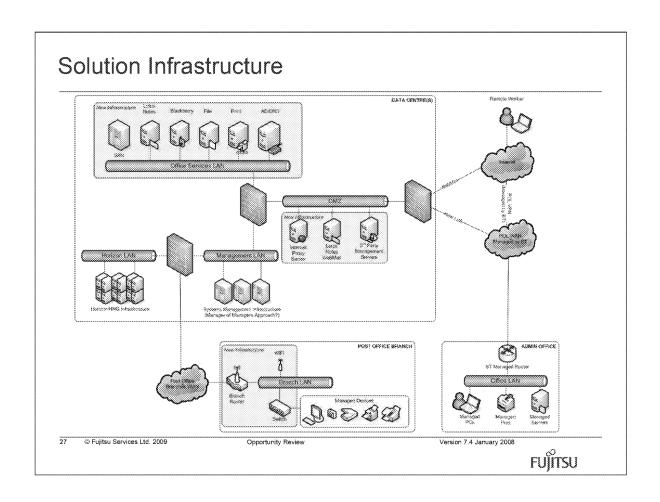

- Delivery of a desktop managed service to 4,500 users within Post Office's admin offices across the UK (to include Crown Branches, Logistics and Remote/Home Workers)
- Hosting of email services, blackberry integration, file/print, and internet access
- Simplification in the help/support desk arrangements in use across all post office branches and admin offices
- Service management of current branch application providers
- Improvements in the engineering services for branch based IT equipment
- Reduced operating costs of support services
- Delivery of continual improvement in service delivery across the supplier base
- A technical refresh of the Horizon counter EPOS
- · Hardware and software asset management.

Procurement Process and Timetable Detail Key milestones in procurement timetable (highlight critical dates such as submission)

Value Proposition (Internal, 1st draft and WIP)

- · Fujitsu have an impeccable track record of Service with POL
- They have no other provider who undertakes Lean & Sense & Respond
 - · POL have benefited from this and truly believe in its benefits
- · They have no other provider who pro-actively adds value
- · We can demonstrate our ability to manage third parties
- · Fujitsu has strength in data centre hosting with a large existing POL estate
- We understand POL's strategic ambitions and how technology fits into their service layer ambitions (POL came to Fujitsu for help in writing their IT Strategy)
- · POL use us as an example of what good looks like in front of their other suppliers
- · We have insight and influence into Post Office's IT strategy
- This prevents a competing service provider from getting close to our key customer.
