## Witness Statement

(CJ Act 1967, s9; MC Act 1980, ss.5A(3)(a)  
and 5B, MC Rules 1981, r 70)

Statement of **William Leslie Mitchell**

Age if under 18      Over 18      (If over 18 insert 'over 18')

This statement (consisting of -04- pages each signed by me) is true to the best of my knowledge and belief and I make it knowing that, if it is tendered in evidence, I shall be liable to prosecution if I have wilfully stated in it anything which I know to be false or do not believe true.

Dated the 7<sup>th</sup> day of March 2005

Signature

**GRO**

I have been employed by Fujitsu Services, Post Office Account, formally ICL Pathway Ltd., since the 22<sup>nd</sup> September 2003 as Security Manager where I am responsible for audit data extractions and IT Security. I have working knowledge of the computer system known as Horizon, which is a computerised accounting system used by Post Office Ltd. I am authorised by Fujitsu Services to undertake extractions of audit data held on the Horizon system and to obtain information regarding system transaction information processed on the Horizon system.

I have been asked to provide details and information on the reports that monitor faults, polling failures, equipment failures and calls for advice and guidance logged by the Horizon System Helpdesk recorded during the period from the 9<sup>th</sup> May 2001 to 20<sup>th</sup> March 2002 for the **Abbots Cross SPSO – FAD Code 247704**.

I have reviewed the helpdesk calls pertaining to this office and during the period 9<sup>th</sup> May 2001 to 20<sup>th</sup> March 2002 there were 11 calls from Abbots Cross Post Office – FAD Code 247704 to the Helpdesk. None of these calls relate to faults which would have had an effect on the integrity of the information held on the system. A breakdown of the root causes is as follows:

1. Postmaster requesting help and advice on using Horizon System functions = 1.
2. Software problems = 2.
3. Hardware problems = 3
4. Printer problems = 1.
5. Non Polling Issues = 2.

## Witness Statement

(CJ Act 1967, s9; MC Act 1980, ss 5A(3)(a) and 5B, MC Rules 1981, r 70)

Continuation of statement of William Leslie Mitchell

6. Office closure = 1.

7. Office reopening = 1

Details of the calls and an overview of the calls are given below in date order below:

23<sup>rd</sup> July 2001, 1105hrs, Call Reference E-0107230632 – **Service Management Centre (SMC)** reports this FAD has not polled for 4 days since 18<sup>th</sup> July 2001 – Line fault Energis/BT to investigate, BT have advised that fault was cleared on secondary cross connection point, site is now communicating and is off the non polling list – Call Closed.

22<sup>nd</sup> August 2001, 1324hrs, Call Reference E-0108220873 – **Postmaster (PM)** reports back office printer (BOP) is printing rubbish. PM is trying to print suspense account, PM has told it to print once – Passed to **Horizon Incident Team (HIT)** for print queue deletion, PM advised to retry printing – Call Closed.

11<sup>th</sup> September 2001, 1154hrs, Call Reference E-0109110540 – PM reports he is having problems with his screen on counter 3. It is badly out of alignment and the screen has red bars down and across the middle of it. He has called before about this one (no record of earlier call found) and a reboot fixed the colours last time, but the alignment is getting worse, PM would like engineer to check the monitor – Engineer booked, recommend the engineer check the cables to the monitor, if all OK, then swap out the monitor – Call Closed.

13<sup>th</sup> September 2001, 1140hrs, Call Reference E-0109130597 – PM reports that screen goes blank periodically – Contacted PM his monitor on counter 3 keeps going blank, the green light stays on, this screen was replaced last week. PM says the screen goes blank 3 – 4 times a day they have to turn the screen off and on to get it to come back, but when it comes back the contrast level is very dark and they have to adjust it – Engineer tasked, cables reseated and loosened cable length, tested OK – Call Closed.

16<sup>th</sup> October 2001, 0929hrs, Call Reference E-0110160226 – Reported by the SMC. This FAD has not polled since 13<sup>th</sup> October 2001 – Energis/BT asked to investigate – 17<sup>th</sup> October 2001, BT have advised that fault was cleared in joint aerial cable underground – Call Closed.

30<sup>th</sup> October 2001, 1138hrs, Call Reference E-0110300536 – PM reports his screen is flickering

Continuation of statement of William Leslie Mitchell

then turning itself off – Contacted PM he says the screen keeps flickering and turns itself off, this screen was replaced a few weeks ago for the same problem – Recommended engineer to site to swap out the monitor and check cables are fixed correctly – Engineer swapped out monitor and main cable, tested OK – Call Closed.

6<sup>th</sup> January 2002, 0428hrs, Call Reference E-0201060008 – SMC reported Critical counter event received for node H24770400101 "corrupt storage unit was detected on volume 1 with LPN 2128, unit type 0" @ 0339. No evt on TEC. Unloading event log – Event received on TEC: corrupt sub-source = RIPOSTE TRAINING, call can be closed – Call Closed.

8<sup>th</sup> February 2002, 1214hrs, Call Reference E-0202080430 – Office is closed due to robbery, possibly reopening on Monday – SMC notified - Call Closed.

11<sup>th</sup> February 2002, 1238hrs, Call Reference E-0202110950 – Julie @ **National Business Support Centre** (NBSC) says that the office has reopened after a robbery – Admin Call – Call Closed.

23<sup>rd</sup> February 2002, 0411hrs, Call Reference E-0202230004 – SMC reported critical NT event received on 23<sup>rd</sup> February 2002 @0340, a fatal error has occurred, a corrupt storage unit was detected on volume..... LPN .....Unit Type .... (0xC105003F). The message store will be shut down abnormally. **Known Error Log** (KEL) Ref: pcarroll909z states check the sub\_source of the event on the TEC, or by retrieving an event log. If error is in the Training Message Store – Ignore the event – Training Message Stores deleted – Call Closed.

19<sup>th</sup> March 2002, 1203hrs, Call Reference E-0203190462 – Clerk reports that she suspended a transaction (customer not enough money) SWAP icon is flashing, unsure how to clear – Advised clerk to press home and swap, clerk is happy with advice – Call Closed.

At various times on the 23<sup>rd</sup> February 2005 hardcopy printouts of the 11 calls detailing the information recorded on the helpdesk database for the required date period were produced. I now produce the hardcopy printouts as Exhibit WLM/14.

Any records to which I refer in my statement form part of the records relating to the business of Fujitsu Services. These were compiled during the ordinary course of business from information supplied by persons who have or may reasonably be supposed to have personal knowledge of the matter dealt with in the information supplied, but are unlikely to have any recollection of the

Caller:	Rodger Henry Adams	Phone:	GRO	Site:	247704
Title:	Ann-Marie Collin - SMC	Login:		Department:	
		Caller ID:		Location:	
Call Problem Details					
Product Type:	PT03	Call Type:	S	ProbType:	SD11
Problem Text:	Critical NT event received on 23.02.02 @ 03.40: A fatal error has occurred: A corrupt storage unit was detected on volume ... with LPN ... UnitType ... (0xC105003F). The message store will be shut down abnormally. Kel Ref: pcaroll909z states: 1) SINGLE COUNTER SITE (for multi-counter sites see (2) below) 1.1) Check the SUB_SOURCE of the event on the TEC or by Retrieving an event log 1.2) If it's in the Training MessageStore - ignore Event, it should clear itself 1.3) If it's in RiposteMirror Delete all Squirrels (first) THEN swap the *MIRROR DISK* (NOT THE COUNTER !!) on the same day (i.e. before cleardesk runs at 03:00 next morning).
