ETHICAL CULTURE ASSESSMENT

Preamble

- Fujitsu (“the organization” or “the Company”) retained Ethisphere, LLC (“Ethisphere”) to evaluate and report on employees’ perceptions of ethical culture inside the organization. Ethisphere conducted this evaluation using its proprietary Ethical Culture Assessment (“survey”, “assessment”, or “Ethical Culture Assessment”) and associated methodology.
- Ethisphere’s findings set forth in this report (“Report”) are owned by Fujitsu except that Ethisphere retains exclusive proprietary ownership rights to the Ethical Culture and Perceptions Assessment and related methodologies (“Proprietary Rights”). By using this Report, Fujitsu agrees not to take action to interfere with such Proprietary Rights.
- In addition, Ethisphere retains the right to use the numerical information and supporting data from which the Report was derived for future benchmarking and other analyses done for other Ethisphere clients. Ethisphere will ONLY use this supporting data in an aggregated and anonymized format with information from other Ethisphere clients such that the information cannot be identified as Fujitsu information.

ETHICAL CULTURE ASSESSMENT

Top Recommendations & Resources

1

Provide resources to facilitate manager discussions.

Only 18.9% of managers are having discussions about E&C topics/issues at least monthly. This is 14.8% below benchmark. 43.3% of managers are have discussions Occasionally (once per quarter, on average). This also lags benchmark by 2.6%. There is a strong correlation between frequency of manager discussions on E&C topics and the overall favorability in other topic areas (Knowledge of the Code and Policies, Speak Up, non-retaliation, pressure, organizational justice, and perceptions of leadership).

2

Layer survey results with other inputs to determine effectiveness of communications.

Among respondents, only 73.3% agreed they know where to find the Code of Conduct. This was 20.4% below benchmark. Fujitsu lagged benchmark across Pillar 1: Awareness of Program & Resources and Pillar 2: Perception of the Function. Consider incorporating engagement or click metrics surrounding key E&C communications to determine if employees are reading and engaging with them. Also look into training completion data.

Layering Data is an Opportunity for Insights

Key takeaway: Layer survey results against other data where possible. Do trends emerge?

Compliance Data	Other Control Function Data	Other Culture Inputs
Case management data	Manager turnover by region	Exit interviews
E&C training completion speed	Phish testing failure rates	Focus groups
Engagement with E&C communications	Near-miss data	Feedback from site visits
Conflicts of interest disclosure patterns	Vendor due diligence data	Intra-company feedback tools (e.g., Yammer)
Gifts and entertainment exceptions	Audit areas of opportunity	Social media
	Litigation patterns by region	
	Training data outside of E&C

3

Educate employees on the full spectrum of available disciplinary actions and reporting

Fujitsu lagged benchmark most significantly in Pillar 5: Organizational Justice. 50.6% of respondents believe disciplinary actions are taken when misconduct occurs, 28.3% below benchmark. Additionally, only 52.4% of respondents believe disciplinary action is the same for every employee, 25.8% below benchmark. Respondents showed a general distrust in the reporting and investigations process. 39.3% of respondents reported misconduct they observed citing "Fear of retaliation" and "I did not believe that corrective action would be taken" as the most common reasons for not reporting.

ASSESSMENT METHODOLOGY

How to Interpret the Scores

Defining the Scores

Scores are a proportion of positive or favorable responses to all responses collected for a given question. Favorable responses vary but are generally “agree” and “strongly agree.”

A higher score always represents more favorable perceptions

How Pillar Scores Are Calculated

The Pillar scores are a weighted average of the questions scores within a Pillar.

Questions are given a lower weight if skip logic is used. This prevents a low response question from having an oversized impact on the score.

Benchmark Scores

Benchmarks are an average of the selected companies' favorability scores for a question. Similarly, Benchmark Pillar scores represent an average of other companies' Pillar scores, and the Overall Survey Benchmark score represents the average score of all other companies' Overall Survey scores.

Ethisphere uses only those questions selected by the organization for use in this survey when calculating Benchmark question, Pillar, and Overall Survey scores.

PROJECT CONTEXT
