Nick

Yes, we can provide this. I'd also like us to get together to talk about the opportunities to improve so that we do this jointly.

Can you advise who in Network (2 or 3 in addition to you) that we could do this with. From my team, it would most likely be me, Steve and Tim Green.

Steve - can you get the stats together and share them before we get together. Could you also draw up a list of areas we know are an issue eg BT, cabling, keeping branches informed etc,

Could you also get Amy to set the meeting up.

Thanks

Hi Dave

So I can gauge the scale of this kind of problem, it would be very helpful if I could have some data that summarises service issues - how many branches experience and outage of some sort, how long for, how many get a payment etc.

Hopefully this is available without any extra work.

Happy to discuss.

Rgds

Nick

Kevin,

I recognise that the time taken to restore service at Histon is well below acceptable, particularly as we're trying to grow our income and customer base.

So, in addition to Steve's note below, we will look at the information provided to branches about their incidents. We know they need to have a good understanding for their own purposes and so that they can advise their customers accordingly.

I also want to look at the processes we have operating between Fujitsu and BT to make sure they are slick and robust. I know this issue has been impacted by some elements outside of our direct control, but I recognise that overall we have improve; looking at different approaches etc, if we are to avoid similar from occurring.

Regards

Dave

Rebecca,

Thanks for the update.

In addition :-

1. I will raise via the Branch Support Programme activity that we need to look at linking the IT / RoMEC processes to better support branch issues where multiple services are affected, ie Horizon, Phones, Alarms & Cabling etc., as these do not interact smoothly at present, as evidenced during this incident.

2. We have put Histon to the top of the list with regard to the Aerial service improvement, in order that we can improve the Wireless back-up service that is currently very intermittent and as such has not been fit for purpose during this incident.

Regards,
Steve

Good Afternoon,

Update

Steve Beddoe has been in contact with the branch and senior escalation points within Fujitsu.

Nick Crowe (senior Fujitsu engineer) will be attending site with BT tomorrow - ETA to be confirmed.

The branch have opted out of the PSTN option as this affects their phone line which they use for other means of custom and trade.

Thanks

Kind regards

Rebecca Morton

Hi Rebecca

Who is liaising with the branch - someone from the PO team needs to be working with them to explain this - please do not leave it to the engineer.

Please confirm this will be the case.

Thx

Nick

Good Afternoon,

Update

Upon contacting the branch I was advised WWAN had in fact become unavailable again.

I have spoken to both the branch and our escalation contact within Fujitsu to arrange for a PSTN modem to be installed at site. This was initially refused by branch, but at present this is the only way for the branch to provide a service to customers.

The PSTN modem allows for a 'dial up' connection allowing the branch to trade effectively.

The engineer will be on site to complete this activity this afternoon.

Next Update 16:30pm

An interim update will be provided should Fujitsu engineers have completed the PSTN connection before this time

Thanks

Kind regards

Rebecca Morton

Good Morning,

Update

The Fujitsu engineer on site has been able to resolve the WWAN and create a strong connection, from which the branch should be able to trade without intermittent drops

Duty Manager will keep in regular contact with the branch to ensure service on WWAN remains stable, and should any issue occur, we will raise immediately to Fujitsu.

Further to this, the branch have been added to the Aerial Roll Out Project as explained on a previous e-mail.

The site will also be added to our list of 'Hot Sites' to ensure that any future call raised will be tracked immediately.

BT Issue and Router Fix

The main issue that required a router re-build cannot be completed at this time. Fujitsu have located several BT wiring issues in branch that prevent the Horizon Connection. The branch can still trade on WWAN as mentioned above.

The main connection point for the equipment in branch needs moving to the wall, and the face plate for the router needs re-cabling.

We have escalated back to Fujitsu and through to BT as a result of the impact this is having on the branch, and the expectation that this should have been resolved yesterday.

A work request has been raised to fix the incorrect wiring. The engineer is unable to establish the ADSL horizon connection with the router until this has been completed.

Next Update; 15:00pm

Thank you

Kind Regards

Rebecca Morton

Good Morning,

Update

The Fujitsu engineer was on site for 10:20am and is completing the full reboot of the router and establishing sync. Fujitsu expect another update from the engineer at 11:30-11:45am.

I have contacted branch and left 2 voicemails to ensure they are kept up to date from POL, as well as the engineer on site.

Fujitsu advise that a previous router swap was completed, but they were not able to gain sync as a result of the BT Exchange fault. The Fujitsu engineer can now complete all activities to establish service now the main fault with BT is resolved.

Next Update; 12:00pm

Thank you

Subject: Update Wednesday 09:00am - Histon post office INC0003137

Good Morning,

Update

BT have completed all works successfully and there is no outstanding fault at the exchange.

Fujitsu attempted to reboot the router in order to gain 'sync', which would allow for the branch to trade. Fujitsu were unable to complete this activity, and so a router swap will be taking place in branch this morning. The SLA for the engineer to be on site is 10:20am. Duty Manager will contact the branch to update, and we have requested that Fujitsu contact us as soon as the engineer is on site.

In the meantime, we have challenged Fujitsu as to why a router swap was not completed during initial engineer visits, and we await their response,

Next Update; 11am.

Thank you

Kind regards

Cc: Dave Hulbert; Nick Beal; Steve Beddoe; Lesley J Sewell; Jackie Meylak; Rebecca Barker; Emily Harley
Subject: Interim Update 14:50pm - Histon post office INC0003137

Good Afternoon,

Interim Update

Fujitsu have found an alternative branch line, and offered the branch a PSTN modem. A PSTN modem offers a dial up connection to the branch, allowing them to trade. However, a PSTN modem uses the branch phone line, and therefore the branch have refused this option on the basis that they need to make outbound calls.

The BT engineer was advised to complete a 'lift and shift' - taking service off one line, and putting this on another. The BT engineer did not complete this activity as requested this morning. BT have confirmed that the issue is within their domain as the port in the exchange is faulty.

Fujitsu expect confirmation of a BT Engineer ETA within the next hour.

Thank you

Kind regards

Rebecca Morton

Subject: RE: 9:30am Update - Histon post office INC0003137

Good Afternoon,

UPDATE

The BT engineer has advised that there is neither sync nor noise on the Horizon line, and therefore this needs to be defaulted back to BT Wholesale.

Fujitsu have escalated within BT to obtain an engineer date, and we are awaiting BT's response.

We have reinforced the SLA deadline to ensure that this is met.

Going forwards I have requested that the branch be added to the 'Aerial Roll Out Project'. The project aims to increase availability and signal to branches running on wireless back up. Roll out should commence within the next 14 days.

Next Update; 16:30pm

Thanks

Kind regards

Subject: RE: 9:30am Update - Hilton post office INC0003137

Good Afternoon,

Fujitsu are confident that this issue is definitely within BT's domain, and are awaiting the notes from the engineer visit this morning to understand why BT have advised this is outside of their domain. The notes are expected within the next 45 minutes, at which point we can act based on BT's findings.

Both BT and Fujitsu's SLA contract allows them until end of day tomorrow to have this resolved, but please be assured that we have escalated within Fujitsu, and requested that they do the same within BT.

I have contacted branch to keep them updated.

Unfortunately in terms of compensation, this is not something that POL offer. In accordance with process, the branch will be put through the automated Goodwill procedure. The branch will qualify for goodwill payment if they have been solid down for 48 hours, without the service being restored in that time.

Next Update; 14:00pm

Thank you

Kind regards

Subject: Re: 9:30am Update - Hilton post office INC0003137

I've spoken the agent twice, the office is still not trading and wasn't up and running either over the weekend.

BT attended the branch this morning and said there was no problem from their side. A Fujitsu engineer has now turned up and said it's a BT issue.

As you might imagine the subpostmistress is very upset as she has not been able to trade for days - she has a history of this type of failure and she believes we have never got to the bottom of this.

We are driving her out of business and to compound matters she became a grandmother for the first time at the weekend. At a time that should be one of the happiest times of her life, she is beside herself because of the poor service she continues to receive from pol.

She has kept the horizon engineer in branch because she doesn't know where to turn to next.

Can someone contact the branch urgently please and get this resolved.

Nick - I'd like us to compensate her when this is finally resolved please.

Kevin
