POL and subsidiary Board appointments

Author: Veronica Branton, Head of Secretariat Sponsor: Jane MacLeod, Company Secretary
Meeting date: 27 March 2018

Executive Summary

1. Recruitment has concluded for Non-Executive Director appointments to Post Office Management Services. The Nominations Committee has approved the appointments of Tim Franklin and Andrew Torrance for **ratification** by POL. The Remuneration Committee has approved the fees for these appointments.
2. Recruitment has concluded for the CEO – Retail Services and Debbie Smith took up post in January 2018. The Nominations Committee has approved Debbie Smith's appointment as a Director to FRES and POL is asked to **ratify** this appointment.
3. Recruitment has concluded for the CEO – FS&T and Owen Woodley moved into his new role in February 2018. The Nominations Committee has approved Owen Woodley's appointment as a non-independent Non-Executive Director of Post Office Management Services subject to FCA clearance and as a POL Director of FRES. POL is asked to **ratify** these appointments.
4. The Secretary of State for Business, Energy and Industrial Strategy (BEIS) has approved the appointment of Tom Cooper to POL, acting in his capacity as Special Shareholder which allows him to appoint a Non-Executive Director. The length of time in the role is determined by SoS but is subject to the usual requirements to comply with POL's terms of appointment. Tom Cooper will take up post on 27 March 2018 when Richard Callard steps down. POL is asked to **note** Tom Cooper's appointment to POL and to **approve** his appointment to the Audit and Risk Committee.

Decisions

POL is invited to **NOTE**:

- 1) The appointment of Tom Cooper as a Non-Executive Director of POL with effect from 27 March 2018 and until such as time as the Secretary of State BEIS shall

determine, subject to the appointee complying with his terms of appointment.

POL is invited to **RATIFY**:

- 2) The appointment of Tim Franklin as a Non-Executive Director of Post Office Management Services for a period of three years from 20 March 2018
- 3) The appointment of Andrew Torrance as Senior Independent Director of Post Office Management Services for a period of three years from 20 March 2018
- 4) The appointment of Debbie Smith, CEO – Retail, as a POL Director of FRES for the duration of her time in post
- 5) The appointment of Owen Woodley, CEO – FS &T, as:
 - a non-independent Non-Executive Director of Post Office Management Services for the duration of his time in post following FCA clearance
 - a POL Director of the FRES Board for the duration of his time in post.

The Board is asked to **APPROVE**:

- 1) The appointment of Tom Cooper as a member of the Audit and Risk Committee for an initial period of three years with effect from 27 March 2018.

Post Office Limited
Board Meeting

**MINUTES OF A MEETING OF THE BOARD OF DIRECTORS OF POST OFFICE LIMITED HELD
ON MONDAY 29TH JANUARY 2018 AT 20 FINSBURY STREET, LONDON EC2Y 9AQ AT
12.15PM**

Present:	Tim Parker Richard Callard Tim Franklin Ken McCall Carla Stent Virginia Holmes Paula Vennells Alisdair Cameron	Chairman (TP) Non-Executive Director (RC) Non-Executive Director (TF) Senior Independent Director (KM) Non-Executive Director (CS) Non-Executive Director (VH) Group Chief Executive (CEO) Chief Financial and Operations Officer (CFOO)
In Attendance:	Jane MacLeod Marla Balicao Tom Cooper Debbie Smith Cathy Mayor Martin Kirke Julie Thomas Tom Wechsler Andrew Goddard Rob Houghton	General Counsel & Company Secretary (JM) Minute Secretary (MB) UKGI Observer (TC) Chief Executive, Retail (DS) Finance Director, Retail Group HR Director (MK) DMB Programme Director Programme Manager Mediation Scheme (TW) Head of Payment Services (AG) Group Chief Information Officer (RH)
		(items 5,6,7 & 8) (item 5 & 7) (item 6) (item 6 & 8) (item 7) (item 7) (item 9)

Apologies: None

ACTION

**1. INTRODUCTION, CONFLICTS OF INTEREST, MINUTES OF THE PREVIOUS
BOARD MEETING INCLUDING STATUS REPORT**

- 1.1 A quorum being present, the Chairman opened the meeting.
- 1.2 The Directors declared that they had no conflicts of interest in the matters to be considered at the meeting in accordance with the requirements of section 177 of the Companies Act 2006 and the Company's Articles of Association.
- 1.3 Minutes of the meeting of the Board held on 23rd November 2017 were APPROVED and AUTHORISED for signature by the Chairman.
- 1.4 The actions status report was NOTED as accurate.

2. CEO's REPORT

- 2.1 The Board NOTED the CEO report. In response to questions, the CEO made the following additional points:
- 2.2 The CEO:
 - (a) noted the strong retail trading performance over Christmas, which would be covered in more detail in the report from the CE, Retail later in the meeting.
 - (b) provided an update on Peregrine discussions following the conversations with the new BoI CEO., as a result of which negotiations have been more positive. BoI appear keen to do a deal and hope to get formalised through Heads of

Post Office Limited
Board Meeting

Terms by the end of February. The scope of discussions includes FRES however they have flagged that they do not want to change the 'contract construct' which we interpreted that they wish the contract to remain evergreen.

- (c) reported that the payroll module of Success Factors ("SF") had gone live on 8th January with only a minor issues, and congratulated Martin Kirke and his team for their work delivering to that timetable. Overall feedback has been positive.
- (d) advised that she had met Stephen Jones, CEO UK Finance in December in relation to the Banking Framework. **A further update would be brought to the Board in May on the further development of the Banking Framework.** DS/M K
- (e) noted that RMG have signed a deal with the CWU although details of this deal still to be announced. Post Office was in discussions with CWU through ACAS to seek to resolve the dispute about the move from weekly to monthly pay. There are a number of other discussions ongoing with CWU in relation to operational developments such as telemetry etc.
- (f) noted that the L300 event was taking place the next day with three main areas of discussion around IT Strategy, wider digitisation and people change, with a focus on strategy and key priorities.
- (g) informed the Board that due to Prime Minister's reshuffle, there is a new Postal Minister – Andrew Griffith MP. This is still to be confirmed officially and PV is still to meet him.
- (h) reported that Martin Kirke, Group HR Director has announced his intention to retire later in the year and a search for his replacement has started. Debbie Smith joined as Chief Executive, Retail on 8th January.

The Chairman questioned whether Post Office would seek compensation from Gemalto in relation to the disruption to our AEI services in December. PV responded that contractual compensation had been discussed and that this had been reported at the ARC earlier in the day.

3. FINANCIAL PERFORMANCE REPORT

- 3.1 The CFOO presented the P9 financial performance report covering December 2017.
- 3.2 The Board NOTED the financial performance report and in discussion the CFOO made the following points:
 - (a) There had been strong Christmas trading however he noted that this only added an extra £600k to EBITDAS reinforcing that mails are a low margin business.
 - (b) EBITDAS for P9 was £6.8m, giving us a £1.7m upside against forecast, but £1.5m adverse to budget, driven by strong mails trading, interest rate rises supporting POCA performance and accelerated IT costs savings, offset by additional agents pay.
 - (c) Balance sheet headroom in P9 was £127m which was £129m worse than P8 due to Christmas trading, but £36m better than forecast.

Post Office Limited Board Meeting

- (d) POMS trading performance was behind by £(0.5)m predominately due to profit share not being met.
- (e) ATM performance is being watched as availability has fallen: 420 ATMs have been experiencing issues resulting in 65% availability. This is partly due to the introduction of new £10 notes. Both BoI and Post Office are reviewing performance and seeking to understand the impact of the new interchange fee structures. **AC noted that ATMs would be part of the cash strategy which would be coming to back to the Board in May. The Board requested that this review also consider whether there was value in talking to manufacturers, and review the location strategy.** DS/
MK

3.3 The CFOO noted that the Scorecard was showing positive outcomes (slide 3 in the Performance paper), and the following were discussed:

- (a) Number of branches and 'trapped Postmasters' and **PV responded that this, together with the 'white space' strategy would be coming back to Board as part of the review of the retail strategy.** DS
- (b) Branch technology conversions are progressing however there is a need to exit from BT and onto Verizon and this is affecting the shape of the delivery.
- (c) Health & safety performance in Supply Chain was starting to cause concern. There are no significant trends or particular issues requiring specific intervention but rather a higher incidence of not taking care, especially on our premises. This will be addressed through activities seeking to engage peoples' hearts as well as their minds.

3.4 Other matters flagged by the P9 report included:

- (a) Forecast EBITDAS for the year was still expected to be c£33 million, however there were a number of issues that would need to be managed to achieve this outcome.
- (b) Project costs were much closer to forecast than they had been, apart from changes in the timing of DMB announcements.
- (c) There is still ongoing work to reduce network cash levels back to the pre-Christmas levels, and branch cash are being managed more proactively.

KM queried the relationship between reductions in staff costs as franchising was rolled out, and increases in agents pay, and queried whether costs were reducing at the expected level? The CFOO noted that there were a number of factors affecting agents' pay including simplification and product mix. On staff and non staff costs, the next step change required the deployment of new technology and this could not be introduced scalably until the underlying systems programmes such as Back office Transformation are complete. He expected costs to be broadly flat in 2018/19, falling in 2019/20 and achieving more significant savings in 2020/21.

4. ANNUAL BUDGET 2018/19

4.1 The CFOO presented the Annual Budget for 2018/19 as set out in the paper which was NOTED by the Board. The CFOO highlighted the following:

Post Office Limited
Board Meeting

4.2 (a) The focus of the paper was on EBITDAS. The GE had reviewed progress during December and January and detailed budget reviews would start the following week.

(b) The CFOO noted that in October, the Board had approved an EBITDAS target of £40m for 2018/19. The impact of accounting changes including the exclusion of the costs of the Group Litigation meant that £47m would be consistent with the 3 year plan and was recommended. This represented significant growth given that there was no profit share from the Bank of Ireland (c£11 million), a significant Ofcom pricing challenge (c.£15 million gross impact) and growth in marketing of c. £15m. The CFOO noted that the gap still to close against the 2018/19 target was £12 million.

(c) The Board discussed the EBITDAS target and indicated that £47m now felt conservative and the target should be at least £50m. It was noted that the FS&T revenue lines were disappointing. The CFOO noted that savings products were still being impacted by low interest rates, and POMS had been struggling due to changes within Post Office relating to the withdrawal of mortgage and financial specialists, and the delay in roll out of marketing plans, as a result of which the 'hockey stick' uptick had been delayed. The CEO noted that a new marketing director has been appointed for POMS which should start to see a difference and she noted the new advertising campaign which had just been launched.

(d) The Board commented that the portfolio should be reviewed to ensure that Post Office could compete effectively in the financial services market, and consideration should be given to focussing efforts in those areas where the Post Office brand would allow us to compete most effectively. The Board challenged whether the balance was right between short and longer term objectives, and whether management were sufficiently ambitious for the POMS business. **The CEO undertook to come back to the Board to update on the POMS acquisition strategy, and the Chairman noted it would be helpful to get some wider background briefings from PV insurance experts.**

(e) TP noted that he would like a target figure of at least £50 million for 2018/19, that the Board needed to understand how the growth fund would contribute to this, and there should be some contingency in the plans. He noted that he was encouraged by initiatives however those projects that underpin the plan – and deliver longer term benefits, will be key.

(f) The Board then discussed how other initiatives such as Panther, New Call acquisition and Identity would contribute to the overall strategy. **The CEO noted that the strategy for the retail business was being reviewed by the new Chief Executive, Retail who had only recently joined and would be covered at the Board away day in June, however an update would be provided at the March board.** **DS**

4.3 The CFOO noted that proposals would be brought to the Remco at its meeting the following week, for the STIP and LTIP measures. He noted that management's view was that the measures for the two incentive schemes should be different, and that following discussion at Remco, the recommended measures would be brought back to the Board in March. He noted that the GE had debated supplementing a retained EBITDAS with two critical pieces of delivery: (i) the replacement of legacy and

Post Office Limited Board Meeting

outdated infrastructure including POLSAP, HRSAP and HNGX; and (ii) the delivery of customer hub functionality with products available for customers in Travel and Identity.

5. CE PERFORMANCE REPORT – RETAIL SBU

5.1 The Chairman welcomed Debbie Smith, the new Chief Executive, Retail and Cathy Mayor and the Board NOTED the paper.

5.2 DS noted that she had attended the recent opening of the first 24 hour branch in New Oxford Street.

5.3 CM reported on the following:

- Christmas trading had been strong with increased customer sessions and trading as compared with the previous year, although these had come through later in the trading period, and reflected structural changes in the market.
- Customer services levels had improved year on year, including customer effort scores and wait time acceptability. The no queues at Christmas initiative had brought wait times down by an average of 2 minutes, an improvement by 4%.
- Mails performance was underpinned by continued growth in home shopping returns and local collect which help offset ongoing decline in stamps.
- Overall, the trading trends are positive and the current forecast is that Retail will end the year £7m ahead of EBITDAS budget.
- The Board brought up the discussion of Agents pay and it was agreed **DS would be looking into this and come back to the Board in June with a strategy.** **DS**

5.4 The Board NOTED that transaction simplification was a key enabler for much of the network and was materially important to the larger multiples. DS commented that being able to convince retailers of the footfall benefits that Post Office could deliver through the Banking Services Framework, click and collect, etc, was key to leveraging the Post Office brand. Further work remained to be done on quantifying the DPC of the various products – presently many of the central costs are not well understood and therefore are not taken into account which may mean that products look more profitable than they actually are.

6. DMB STRATEGY

6.1 The Chairman welcomed Julie Thomas and Martin Kirke to the meeting.

6.2 The following points were highlighted to the Board:

- DS introduced the paper and noted that it was clear that DMB's are not meeting customers' needs due to the restrictions on opening hours, and are not profitable due in part to the significant central costs required to support them. Work is ongoing to consider options to reduce costs including property options, reviewing employment terms, franchising options etc; nevertheless exiting DMBs becomes progressively more expensive due to the related central costs.
- JT reported that the proposed revised franchising programme has been designed to enable the franchise of all 227 DMB's and staff over a three year period, however at this point approval was only being sought for the first phase of the

Post Office Limited
Board Meeting

roll out. JT explained the model worked in two stages: (i) temporary operators would be approached to operate a franchised DMB in the same premises, with flexible lease terms. This should enable immediate staff cost savings while the recruitment of the long-term operator and branch location is progressed in parallel.

- c) While there are currently 3 well established organisations who each can manage approximately 30 branches on a temporary basis at any time, it is proposed that a compliant procurement process should be undertaken for operators of temporary branches across the network. The proposition should be attractive for temporary operators as it is low risk and involves minimal investment.
- d) The Chairman queried the impact on employees and whether union consultation would be required? JT noted that under the current structures, it can take up to six months to complete a franchise and that employees are often keen to leave but are prevented from doing so because of the local consultation processes. She advised that the plan was to start the staff consultation process by telling staff about new Branches being advertised in the area and the strategy of replacement of DMB's over the next three years.
- e) The Board queried the impact of the proposal on the underlying costs of the business and JT replied that the benefits step down over time as set out in the table on page 5 of the paper.

The Board was supportive in principle of the revised strategy however approval was only sought for a one year roll out following which the strategy would be re-assessed. **APPROVAL** was given on this basis including drawdown of the first year of funding of £23.1m for 2018/19 which would allow the roll out of the Franchise Programme to 56 branches.

7. PROJECT PANTHER

7.1 The Chairman welcomed Tom Wechsler and Andrew Goddard to the meeting.

7.2 DS summarised the benefits of Project Panther and TW and AG took the Board through the progress of negotiations to date. The Board raised a number of questions about Payzone and the proposed transaction, and in the course of addressing those questions the following points were made:

- a) the biggest hurdle would be CMA approval as the effect of the transaction would be to reduce the market to 2 participants and to increase Post Office's market share. Additionally Paypoint would be incentivised to challenge the transaction. The deal team were working with legal advisers to prepare for these issues.
- b) Significant due diligence had been undertaken on the Payzone technology and added security costs on implementation had been factored into the business case. There was also potential value add from their technology and an opportunity cost on building on their technology.
- c) State Aid challenges had been considered, however analysis confirms that there are sufficient financial resources independent of State funding that should enable any challenge to be successfully rejected.
- d) Significant additional value to Post Office has been identified resulting from the transaction – included avoided cost, which would provide 'upside' over and above the actual assets being acquired, and this supports management's

Do for
No reply
as yet

Post Office Limited Board Meeting

valuation of the business.

e) The model assumed a 12% cost of capital and a 3 year RoI which were the standard Post Office investment metrics.

7.3 The Board discussed the implications of the proposed transaction and were in agreement that this was a good opportunity for Post Office and that management should be authorised to proceed to the next stage including entry into non-binding Heads of Terms. **Management were however requested to review the language in the Heads of Terms regarding conditions to the CMA clearance.**

TW/
AG

It was proposed that a further update on progress should be provided to the Board later in February which would, seek to confirm the valuation, satisfy outstanding questions and recommend that we proceed to signing Heads of Terms. This could be supported by a Board call if considered appropriate.

7.4 It was **RESOLVED** that the Board authorised management to progress Project Panther in line with recommendations set out in the Board paper. It was further agreed that once valuation had been confirmed and outstanding questions resolved then a further Board meeting be called in February to sign Heads of Terms.

8. EUM

8.1 The Chairman welcomed Julie Thomas back to the meeting to present the business case for EUM paper.

8.2 Debbie Smith introduced the paper which was noted by the Board.

- a) JT explained that since the Board approved the initial EUM business case of £7.8m in January 2017, it had become clear that a key design assumption that all training could be delivered through Success Factors could not be delivered and the current Horizon system does not support web-enabled training.
- b) This updated Business Case requests £2.53m of additional funding to deliver: new IT developments needed to ensure EUM will work for agents using the current Horizon system.
- c) Approval of funding will allow the programme to rollout to the entire network of c11,600 branches by November 2018 with a workable design, allowing us to be fully compliant with all relevant sales-related regulation and contractual requirements.
- d) To the extent possible, EUM had been designed to ensure compatibility with HNGT.
- e) Data collection regarding postmasters and their assistants was taking longer than expected, however those branches which were critical for POMS sales were being prioritised and it was still expected that the target of July 2018 which POMS were relying on, would be achieved.

8.3 The Board noted their concerns over the delay in the roll out of this programme, and queried what could be done to accelerate delivery to ensure delivery for POMS by the July target date? The Board also commented that management needed to review the project and understand what could have been done differently.

Post Office Limited
Board Meeting

8.4 It was **RESOLVED** to approve the revised scope and business case including the further funding of £2.53m, including an immediate draw down of £1.3m. The Drawdown of the balance £1.23m in due course should be brought to the Investment Committee.

9. BACK OFFICE TRANSFORMATION

9.1 The Chairman welcomed Rob Houghton to the meeting and the CFOO presented the replacement Back Office Transformation business case.

9.2 a) The CFOO gave an update on the progress of Back Office Transformation since the last update in September and explained the proposed changes to the Business Case with a request for a further drawdown of funds that will allow the programme to complete Phase 1.

b) Phase 1 remains focused on ensuring we exit from POLSAP by June 2018, delivering as much transformation as possible. In the next 2 months deliveries include: Agent Remuneration process transformation & data migration from HRSAP to CFS, and Cash Processing functionality migrated from POLSAP to Transtrack for Belfast cash centre (soft launch).

c) It was noted that while costs have increased slightly by £0.3m to an expected total of £21.2 million, the annualised IT benefits have reduced by £0.8m to £3.1m as set out in the Board paper

d) RH noted that Credence had now transitioned and that this creates further capacity in the Fujitsu environment, which of itself, decreases the risk.

9.3 The Board queried whether the CIO had now addressed the resourcing challenges in his team, and whether he was confident in the capability and capacity of that team to deliver the necessary changes required? RH advised that the Chief technology Officer had been the last key role to fill however there now remained a challenge to recruit the necessary IT architecture skills, although this was underway, with a much better operational team in house now in place.

9.4 It was **RESOLVED** that the Board approve the revised business case and additional £5m drawdown of budgeted spend to enable the completion of Phase 1, noting the reduction in IT cost benefits.

10. BOARD COMMITTEE CHAIR UPDATES (VERBAL)

10.1 ARC

CS as Chair of the ARC noted that all directors other than VH had attended the ARC which had been held that morning, and accordingly agreed to provide a separate brief to VH.

11. ITEMS FOR NOTING

11.1 Sealings

It was RESOLVED that the affixing of the Common Seal of the Company to documents numbered 1604 to 1636 inclusive in the seal register was confirmed.

11.2 **Health & Safety**

The Board NOTED the report.

- a) The CFOO noted that 'across the pavement' attacks were the greatest current area of concern in Supply Chain. Supply Chain is trialling body cameras to test usability: attacks are rare and they cannot be tested for impact. It is likely that if workable the cameras would be rolled out across high risk areas.
- b) The Board noted that the expansion of the Banking Services Framework would result in increased cash in branches and that management would need to review whether MI and technology were adequate to cope with increased risks and demands.
- c) The CFOO noted that work was underway to assess the impact of the expansion of the banking Services Framework, and further that an external audit of the Health and Safety framework had been commissioned, the results of which would be shared with the Board once available.
- d) The Chairman noted that **it would be helpful if the reporting could separate robberies and criminal activity from the more traditional health and safety measures, so as to enable management and the Board to prioritise what needs to be done to reduce violence to employees.**

AC/
MH11.3 **Conflicts of Interest**

The Board NOTED that the Company secretary would circulate details currently held about other directorships and conflicts and that these would be updated and presented to the March board.

JM

11.4 **Meeting Dates and Forwards Agenda**

The Board NOTED the future meeting dates and January's agenda.

12. **AOB**12.1 **Bank Ring-Fencing Changes**

The Company Secretary advised that the Board previously approved Post Office entering into a Facilities Agreement dated 26 November 2015 with the Royal Bank of Scotland plc (RBS) under which RBS makes available: a £400m intra-day facility; a £350m overnight NRF facility (for the purpose of providing overnight collateral to the Bank of England); and a £1m collateral facility used in connection with our crime insurance (Facilities Arrangement).

As a result of the UK government's ring-fencing requirements which come into force on 1 January 2019, RBS has to restructure their activities and legal entities (which includes the National Westminster Bank plc (Nat West). Nat West will sit within the ring-fence of retail & business banking within the RBS Group.

Consequently, POL needs to enter into an Amended and Restated Facilities Agreement with RBS and Nat West to allow Nat West to provide the Facilities Arrangement going forward.

12.2 **IT WAS RESOLVED THAT:**

Post Office Limited
Board Meeting

- 1) The terms of and the entry by the Company into the Amended and Restated Facilities Agreement with RBS and Nat West ('ARA') and the other 2018 Ring-fencing Documents, and all other documents which are required to be entered into by the Company from time to time in connection with or pursuant to any of the foregoing (the "Ancillary Documents"), be and are hereby approved;
- 2) The CEO or CFOO be and is hereby authorised for and on behalf of the Company and in its name to agree such amendments (whether additions, deletions or other changes) to the ARA and the other Ring-fencing Documents and the Ancillary Documents as they shall deem appropriate subject to them being satisfied that the credit standing of any new legal entity counterparty is equal to or better than the existing legal entity (and whether such amendments are agreed before such documents have been entered into or are agreed after such documents have been entered into and are effected by entering into new documents or otherwise);
- 3) The CEO or CFOO be and is hereby authorised for and on behalf of the Company and in its name to execute and enter into (and in the case of any deed, to execute and deliver) the ARA and the other Ring-fencing Documents and the Ancillary Documents (including any and all amendments as detailed in the preceding paragraph);
- 4) The CEO or CFOO be and is hereby authorised for and on behalf of the Company and in its name to do all such acts and things as may be required in connection with the ARA and the other Ring-fencing Documents and the Ancillary Documents (and any such amendments thereto) and to carry into effect the purposes of the resolutions passed at this meeting, and to give or execute any notices, communications and other documents on behalf of the Company in connection therewith;
- 5) The CEO or CFOO be and is hereby authorised for and on behalf of the Company and in its name to approve and execute other documentation with any other UK regulated bank which is of a similar nature and has a similar effect as the ARA and the other Ring-fencing Documents and the Ancillary Documents, and to which the Company and such other UK regulated bank (being one of the Company's bankers) is a party subject to the CFOO being satisfied that the credit standing of any new legal entity counterparty is equal to or better than the existing legal entity, and the terms of these resolutions shall be deemed to apply equally to such other documentation as if passed specifically in respect of thereof.

12.3 Postmaster Litigation Update

JM provided the Board with a verbal update on the Postmaster Litigation noting that there was a procedural hearing scheduled for Friday 2 February. At that hearing the Court would be requested to determine the scope of disclosure required to be given by Post Office to support the trial in November 2018.

The Board NOTED the update and RESOLVED to establish a sub-committee for the purposes of monitoring the development in and strategy for the litigation. The members of that sub-committee would be the Chairman, Ken McCall and Tom Cooper

Post Office Limited
Board Meeting

(once appointed as a director). JM was requested to provide the committee members with details of the key dates mandated by the Court so that JM appropriate time could be scheduled for the sub-committee to be briefed.

12.4 There being no further business the Chairman declared the meeting closed at 16:00pm.

CEO's Report

Author: Paula Vennells Meeting date: 27th March

Executive Summary

Context

Our target for 2017/18 is to achieve EBITDAS of £30m. Our 3 year goals are to:

- Accelerate the transformation of the Post Office.
- Secure commercial sustainability for the long term.
- Establish a business that can ultimately fund investments and the social purpose from profits rather than subsidy.

Bellay

In summary, our strategy is to secure our position as the UK's number one parcels and letters retailer, grow in financial services and protect our network and social purpose – all supported by a much leaner central organisation.

Gender pay gap - exclude PMS

Input Sought

The Board is invited to note the report and highlight any issues where a future discussion would be welcome.

The Report

Looking Back

WHAT HAS GONE WELL?

- **Financial Performance**

- P11 benefitted from continuing strong trading and delays in programme spend versus forecast expectations. EBITDAS (excl. GLC) was £0.2m, £1.4m favourable to forecast and in line with budget. YTD EBITDAS (excl. GLC) is £20.1m, £4.4m favourable to forecast and £4.0m favourable to budget.
- Balance sheet headroom in P11 was £299m. This was £10m lower than prior month as increases in cash holdings £66m and investment spend £22m were funded through an increase in the bond facility. Cash holdings increased by c.£40m due to the temporary impact of introducing high speed note counters in cash centres. Headroom will tighten again as we approach Easter and move more cash into the network.
- Retail P11 performance is strong and YTD on track. FS P11 performance EBITDAS is £(1.3)m adverse to forecast. Revenue overperformance offset by additional costs and different revenue mix in agents pay, annual mortgage check fees and a reconciliation of full year performance on FRES.

- **Financial Services**

- The Savings book will end the year strongly at £14bn (vs expectation of £12bn) following the base rate change in November and lower than expected attrition on the back book. The new mortgage lead generation and qualification model through the Chesterfield contact centre went live on 12th March and our new mortgage proposition launches next month.
- Peregrine negotiations continue in depth following the arrival of the new BOI Group Chief Executive in November. We are likely to be offered an enhanced package across both the core products and FRES and expect to make a recommendation to Board, with some independent advisor analysis, in May.
- Moneygram - work continues to improve our commercial terms and we have a proposal which will be discussed later in this Board.
- The Q4 insurance campaign continues to perform in line with plans and is showing a 300% increase in protection sales versus P11 16/17. We are building our new home insurance model and have released an invitation to tender to underwriting companies to work with us on design and the customer solution. We aim to have this in place by June and will then move to the design phase.
- Telecoms - Project Galaxy [voluntary pricing agreement between BT and Ofcom in the HomePhone only market; POL has 10% market share] has now moved into implementation with around 100,000 customers already contacted

and response levels under 10% and lower than expected, which is encouraging. The agreement between BT and Ofcom is to reduce monthly customer pricing by £7 per month (£18.99 to £11.99), Post Office have agreed to offer eligible customers HomePhone customers, free Broadband or the option of HomePhone only at £11.50pm to maintain price competition with BT.

→ Customer Hub: The first launch is targeted for May 2018. The initial proposition is focused on the Travel Monday Card and Travel Insurance products which will be served through a new Post Office Travel App. The project is in development with both FRES and BOI. Following the launch, all new TMC customers will be directed to the Customer Hub where we will also be able to offer them travel and gadget insurance add-ons; this will be introduced as part of our summer campaign.

• **Retail**

→ Work continues on the Future of Cash business case to be presented at the May Board. Following the recent reorganisations, both ATM and POCA strategies will be included.

→ Banking Framework continues to over perform with increased Business Banking supporting performance above budget and forecast. Increased engagement from banks as well as new engagement with Credit Unions helps support our Financial Inclusion agenda. We continue to work closely with UK Finance on a joint proposal to send to John Glen MP, Economic Secretary of the Treasury, regarding the future plans for the framework.

→ The VOC results remain very strong with YTD Waiting Time Acceptability maintaining the all-time high of 94.2% against a target of 95% and Effort at an equally impressive 80.6% against a target of 76%.

• **Mails**

→ Royal Mail re-entered the FTSE 100 on 19th March with shares closing at 564p on the FTSE cut-off date; up more than 50% from a closing low of 370p in November. The market has responded positively as the risk of industrial action faded and the terms of the principle agreement with CWU became clear. The deal was unanimously agreed by the CWU's Postal Executive and will be recommended to the union's 110,000 postal members in a forthcoming national ballot.

→ Discussions regarding the prospect of extending the current MDA have begun and the Mails team will provide an update on progress at the May Board.

• **IT**

→ Everest (Fujitsu negotiation) continue and there is good progress on application maintenance, cloud migration and commercial contracts. The contract note on

the principle of switching revenue from operational expenditure to capital expenditure has been signed. FJ demonstrated good innovation and customer journey ideas to the Group Executive at our recent GE meeting.

- The network and branch technology rollout continues and is going well. We have passed the 10,000 branch level on network and hope to be virtually complete and transitioned to Verizon by end of March. Branch rollout is around 7,000 counters and the Admin network is almost complete with a complex set of issues overcome. There will be a high level of change taking place in the last two weeks of March to complete these plans.
- Our 101 digital innovation centre is fully active; we have employed our first software engineers and developments in customer hub, agent portal and the next generation Horizon (HNGT) are ongoing.

WHAT HAS NOT GONE WELL?

- **Severe weather and impact on the Network**
 - Due to the recent snow and bad weather all branches were affected across the network, but with minimal impact. 400 branches needed to close at some point due to severe conditions, however a maximum 210 branches were closed at anytime, which means at all time Post Office maintained around 98% of branches open to the public. Supply chain was affected minimally. During this time branch transactions were down as people chose not to travel.
 - Royal Mail and ParcelForce were unable to collect and deliver in some areas and special delivery guarantees were cancelled during this time. Our POMS call centre in Scotland closed for two days and the NSBC closed early on two days; no branches reported any issues with this. Our IT equipment continued to operate as normal.
 - Overall Post Office continued to operate as near normal throughout resulting in little impact and no customer complaints. We estimate £200k in lost revenue.
- **IT Transformation**
 - The full year target has slipped as a number of controls are currently actioned to be delivered in June/July, these controls are reliant on the implementation of the Security Operations Centre which will be fully commissioned in July. A review of the TrAction Controls Management tool tool is currently underway to ensure that control issues are being reported consistently.
- **Branch safety**
 - There were two incidents in branches recently due to branch colleague negligence with electrical appliances. An explosion in our DMB in Romford and a fire in the Houndsditch branch; thankfully both branches were closed and no one was hurt. Both issues were dealt with quickly and both reopened quickly. We have issued new communications to all colleagues highlighting the

importance of turning off equipment when the branch is closed as well as reviewing and reissuing our white goods security policies.

Looking Ahead

FUTURE FOCUS

• Simplification

- Having assessed our change portfolio and the current strength of our proposition with agents, we have changed our plans on Simplification. Phase 1 of Mails simplification is fully implemented and will deliver £4.6m of recurring EBITDAS benefit through reduced remuneration. We have reviewed Phase 2 (which would deliver further efficiencies and £6.5m recurring benefit) and decided not to continue for three main reasons:
 - 1 - the agent reaction to this particular Simplification approach has been as expected negative and we believe that implementing could put future numbers at risk;
 - 2 - implementing Phase 2 would require a further £8.0m, (and the time of key subject matter experts), which we can re-allocate to other change initiatives;
 - 3 - we need to minimise any further investment in our current codebase 'HNGA' given we are developing 'HNGT', which will radically simplify our customer and user experience. Our message to agents will be that simplification remains critical to our success and we are deferring, rather than stopping, plans to reduce remuneration where we can create genuine savings for agents.

• Back office Transformation

- The first phase of Back Office Transformation is live with agents now being paid through the new systems. This was on time and on budget. However, the remaining phases are signalling delay and our expectation is that the programme will be re-planned to complete end September rather than end June to avoid compromising testing, controls or management information. The CIO's view is that the infrastructure can sustain this delay. However, further delays would not be acceptable. The cash module has been more complicated than anticipated and the Belfast pilot has successfully gone live, 2 months behind plan. We are also behind on design and testing of the sales and finance workstream. A full re-plan is close to completion and will be subject to independent challenge.

• Government Affairs

- I am meeting with the new Minister for Postal Services, Andrew Griffiths MP on 19th March. Andrew was appointed Parliamentary Under Secretary of State at the Department for Business in the January 2018 reshuffle. This is the first

meeting we have had and will provide an opportunity to update the Minister on our strategy and our key priorities.

- I will also be attending the first meeting of the Financial Inclusion Policy Forum, jointly chaired by the Economic Secretary to the Treasury (John Glen MP) and the Minister for Pensions and Financial Inclusion at the Department for Work and Pensions (Guy Opperman MP). The purpose of the forum is to ensure that individuals, regardless of their background or income, have access to useful and affordable financial products and services.
- Debbie Smith will be attending the Future of the High Streets Forum, hosted by Jake Berry MP the Ministry for Housing, Communities and Local Government.
- The first phase of a brand activation campaign called #CommonUnity - celebrating communities and local activities, has been launched. The campaign explores the changing nature of community in the UK, with the Post Office telling the story in the context of modern Britain. We are giving Post Offices the chance to win upto £1,000 bursary by nominating and highlighting how community matters to them. Prize funds can be used for anything that supports the community.

- **Building an inclusive culture**

- I have implemented a campaign internally which stresses the importance of speaking out against bullying and harassment. On the back of this we have received an increase in people coming forward to speak out, which is both encouraging and worrying. I am committed to ensuring we provide a safe and transparent workplace for our colleagues and that we remember and live by our PO values: Care, Challenge and Commit.

- **Personnel & Business unit changes**

- Martin Edwards has formally moved into his role as Managing Director of the newly created Identity Services business unit.
- I have created a new Strategy Group working to agile principles which will be led by Tom Moran, who also retains his role as Network Development Director. Tom will have a small central team reporting into him and they will be responsible for the broader business strategy, as well as leading on strategy for Retail and the preparations for the Board Away Day. There are three key topics for that agenda: Retail, IT and Post Office Insurance.
- Nick Kennett left the business last month and I have made two changes to the Retail and FS business units; Banking has moved into the Retail business and I have promoted Owen Woodley to Chief Executive of Financial Services & Telecoms (FS&T).

SMG's

POST OFFICE

RISKS OR CONCERNS?

- **Postmaster Litigation**
→ A verbal update will be provided in the Board meeting.

February 2018 (P11) - Performance

Author: Micheal Passmore

Sponsor: Alisdair Cameron

Meeting date: 27 March 2018

Executive Summary

Context

YTD P10 EBITDAS, excluding Group Litigation Costs (GLC) £19.8m. £3.0m favourable to forecast and £4.1m favourable to budget.

At end of FY 16/17, cash in Network was £666m and balance sheet headroom was £189m.

P11 forecast EBITDAS (excl. GLC) £(1.2)m, budget £0.3m. Balance Sheet headroom forecast was £286m from the facility limit, £86m from the Board limit.

Questions this paper addresses

1. What is the financial and scorecard performance in P11?
2. Does the performance highlight concerns over future delivery?
3. What are we anticipating for the full year outturn?

Conclusions

P11 benefitted from continuing strong trading and delays in BAU programme spend versus forecast expectations. EBITDAS (excl. GLC) was £0.2m, £1.4m favourable to forecast and in line with budget. YTD EBITDAS (excl. GLC) is £20.1m, £4.4m favourable to forecast and £4.0m favourable to budget.

Balance sheet headroom in P11 was £299m. This was £10m lower than prior month as increases in cash holdings £66m and investment spend £22m were funded through an increase in the bond facility. Cash holdings increased by c.£40m due to the temporary impact of introducing high speed note counters in cash centres. Headroom will tighten again as we approach Easter and move more cash into the network.

Network numbers are 11,510 which is very close to the contractual minimum of 11,500 branches. A number of new openings are planned and we anticipate the year end number will be closer to 11,600.

Change and capital spend of £28.6m, £3.0m more than 5+7 forecast suggesting continuing improvements over control and delivery.

The full year outturn is now anticipated to be c£36m, £6m above forecast due to higher Bank of Ireland Profit Share and release of Growth Fund.

Input sought

The Board is asked to note the financial performance.

The Report

Scorecard

Key Performance Indicators	P11			YTD			Full Year Target

1. Net Profit metric target based on 5+7 forecast for Depreciation.

2. Attendance: Data currently not available due to Success Factors implementation.

Growth

1. Headroom at P11 was £499m (£299m above the £200m board limit) and security headroom was £223m. Ensuring facility headroom was higher than security headroom was a key target of the cash work as set out in the summer.
2. Net profit YTD is £11.0m favourable to budget; EBITDAS (incl. GLC) up £2.3m. Underspend on change charged to the profit and loss account is £3.9m and unbudgeted profit on disposal of property of £4.6m drive the remainder of the variance.

Customer

3. Acceptable Wait Time scores remain at 96% and continue to track above targets for DMB, agency branches and W.H. Smith. Acceptable Wait Time is 1% below target ytd.
4. P11 Branch compliance was rated Amber following 3 months of red ratings, YTD the rating remains Amber. Improvement was due to BoI reviews of FS promotional material held in branch that are no longer rated Red. Whilst this is encouraging we need to maintain our focus to ensure these improvements have been embedded.
5. The overall rating is Amber due to Counter Mystery Shopping continue to produce challenging results. The key reason for non-compliance was the failure to provide a Savings Summary Box leaflet with the application pack as well as BoI's assessment of other compliance requirements. To address this we have published a Branch

Focus communication, online training for completion by 7th February and focussed the Business Control Team to support the network with compliance issues.

People

6. **Attendance Reporting:** Still not available following the implementation of Success Factors in P9. Absence and hours reports for P10 and P11 are being worked on but a number of anomalies have been identified with the data. A fix has been identified but has not been implemented.
7. **Safety LTIFR:** There were 7 employee accidents during P11 and 104 YTD v 112 for the equivalent period last year. However, LTIFR which measures the severity of the impact of accidents as a proportion of hours worked remains above budget.

Modernisation

8. **Network:** Network numbers are 11,510 which is very close to the contractual minimum of 11,500 branches. A number of new openings are and we anticipate the year end number will be closer to 11,600. YTD there have been 201 unplanned closures with 104 branches remaining closed following postmaster suspension.
9. **NT and ND Transformation:** 466 branches have now been transformed in the year exceeding the full year target of 400.
10. **Branch Counter and Network Rollouts:** Snow delays in the week commencing 26th February resulted in a 30% reduction to the weekly deployment. This will be addressed in week commencing 19th March schedule where 83 branches will be rescheduled. Project currently tracking green.
11. **IT Transformation (% of IT controls implemented):** The full year target is now unlikely to be achieved as a number of controls will be implemented when the Security Operations Centre is delivered in July.

POMS	2.1	0.2	0.3	0.7	17.4	(0.6)	(2.0)	(0.6)
Other	(22.8)	(1.3)	(1.0)	(1.0)	(239.1)	(1.3)	(6.6)	7.6
EBITDAS (excl. GLC)	0.2	1.4	(0.0)	0.5	20.1	4.4	4.0	23.9

12. P11 EBITDAS was £0.2m, £1.4m favourable to forecast with strong revenue performance dropping through to the bottom line. Costs delays from programme spend were offset by incremental costs in the month. The full year outturn is now anticipated to be c.£36m, £6m above forecast due to higher Bank of Ireland Profit Share and release of Growth Fund.
13. Retail performance driven by Government Services revenue overperformance +£1.9m (POCA +£0.9m and Verify +£0.6m) and delays in programme spend £1.1m until 2018/19.
14. FS&T shortfall due to true-up in FRES position £(0.4)m for full year given volume shortfalls and annual mortgage check fees £(0.3)m not forecast.
15. POMS +£0.2m with strong response from the Q4 campaign (including DRTV) driving incremental Protections revenues. Still anticipating to achieve full year forecast position (less impact of Russet).
16. Other costs include the annual audit fee £0.4m (timing) a provision for losses £0.5m and a £0.3m fine for non-compliance with AML regulations. Change spend expenditure is £6.6m above forecast but this was shifted from capital spend in the period.

Total	28.6	(3.0)	(5.4)	209.0	23.8	71.3			

17. In month, the total capital and change spend was £28.6m, £3.0m higher than forecast but continuing the trend of being much closer to forecast than prior months.
18. The key programmes have a number of major milestones and cost trigger points in P12 and it is currently anticipated that up to £35m of costs in the P5 reforecast could fall into 2018/19.

Network Subsidy Payment	-	-	-	
Network cash inventory (gross)	(65.6)	(95.3)	(310.8)	
Working capital - client related	(2.9)	(22.6)	(15.9)	
Capital, investment and financing	(22.0)	3.0	1.9	
Net cash inflow / (outflow)	(90.2)	(113.0)	(362.2)	

19. Our net funding position increased by £90m to £721m in P11 as cash in the network increased by £66m and £22m of capital and investment spend in the month.

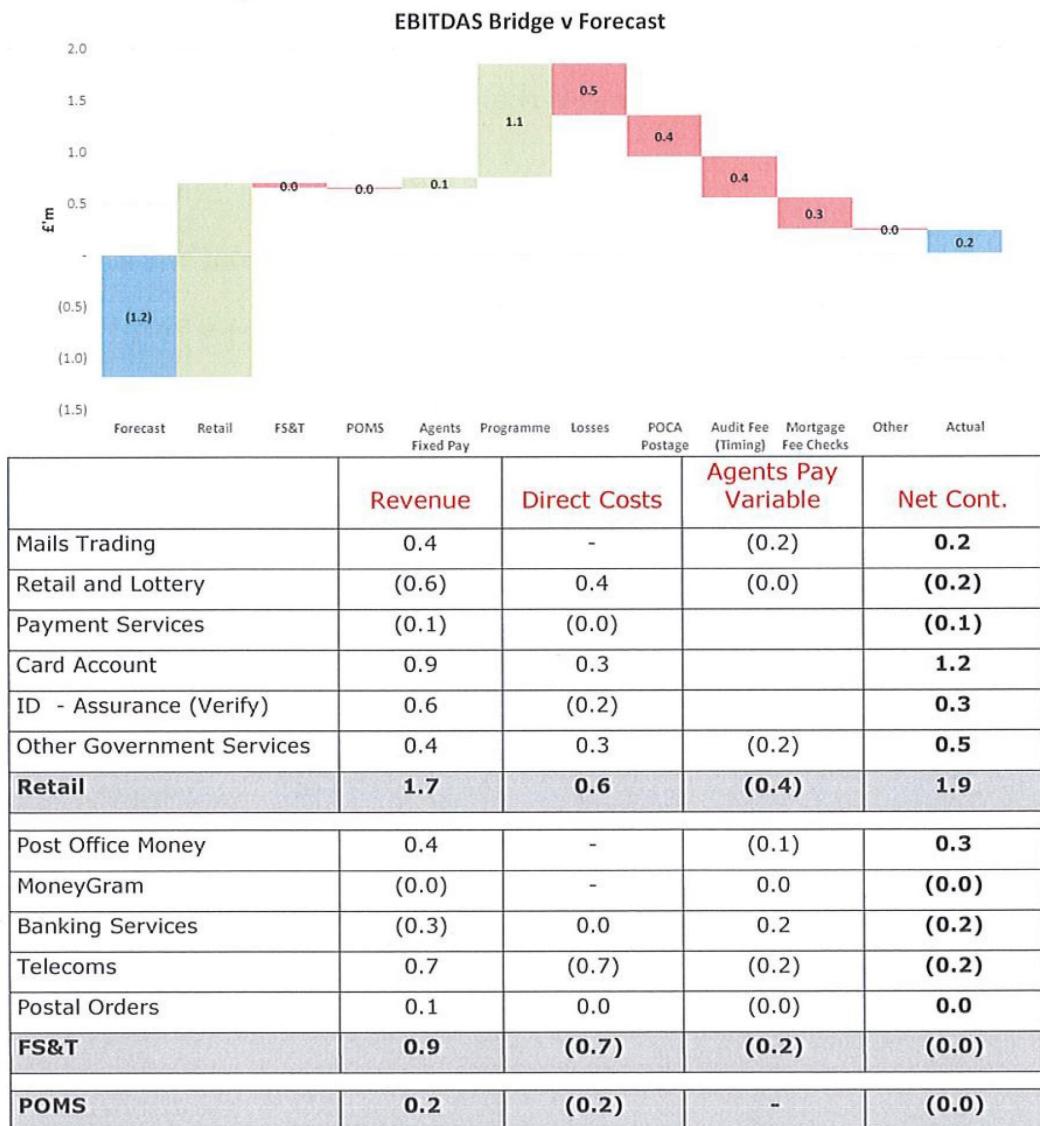

20. Cash in the network increased primarily due to an increase in Cash Centres balances of £39m. This is a temporary increase as the new note counting machines were rolled out.

21. The loan balance with BEIS increased by £10m but headroom of £299m above target is maintained against the facility. This is anticipated to reduce as we approach Easter.

Total Revenue	41.6	1.7	1.6	(0.5)	492.7	6.7	20.7	(25.9)

P11 EBITDAS £3.8m favourable to forecast driven by strong revenue performance and delays in programmes spend until 2018/19 as identified as part of the P9 risks and opportunities update.

Gross Income beat forecast by £1.7m:

Government Services +£1.9m with POCA +£0.9m (£0.5m Interest Rate, £0.3m closed accounts, £0.1m volumes) and Verify +£0.6m due to strong trading performance with volumes doubling to c.11,000 per month. Small volume gains in Passports & DVLA also.

Mails +£0.4m with continuation of recent trends.

Retail and Lottery £(0.6)m, being £(0.3)m shortfall for trading (timing with no impact on full year) and £(0.3)m accounting impact for the new contractual agreement with WHSmiths where margin only is recognised (minimal EBITDAS impact as offset in COS also)

Agents Pay +£0.1m: In line with revenue mix. Revenue overperformance in products with limited agents pay impact.

Non Staff Costs +£1.4m: Due to delays in programme spend (costs deferred until 2018/19) and delays in marketing spend, partially offset by incremental costs of £(0.4)m in the month for POCA statements.

4. FST

£m	P11				YTD			
	Act	Var Fcst	Var Bud	Var PY	Act	Var Fcst	Var Bud	Var PY

Total Revenue	27.8	0.9	0.0	3.6	323.4	3.0	(2.0)	33.6

P11 EBITDAS £(1.3)m adverse to forecast. Revenue overperformance offset by cost pressures and a true-up of full year performance on FRES.

Gross Income +£0.9m better than forecast:

Post Office Money +£0.4m due to Credit Cards and Lending, Moneygram back in line with forecast in the month.

Telecoms +£0.7m continues to over perform with higher ARPU and customer numbers.

Banking Services £(0.3)m (reversal of overestimate in prior month – no impact on next year budget target)

Agents Pay £(0.4)m adverse: In line with revenue mix.

Non Staff Costs £(0.5)m: predominantly due to annual mortgage check fees £0.3m (not accrued).

FRES £(0.4)m: adverse based on the revised full year expectation now anticipated given decreasing volumes.

5. POMS

Total Revenue	4.5	0.2	0.3	1.0	43.5	(1.1)	(3.2)	4.0

POMS has performed ahead of P5 forecast in the month and is in line with the updated view performed at the end of P9 (comparatives above refer to the Board approved P5 reforecast). The full year EBITDAS target is £19.9m and management continue to believe that this is deliverable (P5 forecast adjusted to remove the impact from the removal of Mortgage Specialists £0.3m).

The decisive factor in POMS hitting its full year EBITDAS target is the continued performance of the Q4 campaign which includes the Life Over 50's DRTV test and learn and associated activities. The campaign launched on the 22nd of January has achieved a step change in performance. In P11 3,464 Protection (Life, Easy Life and Over 50's) policies were sold which is 2,462 higher than P11 last year, an increase of 246%.

Budget Update

Author: Cem Oztoprak

Sponsor: Alisdair Cameron

Meeting date: 27 March 2018

Executive Summary

Context

The purpose of this paper is to finalise the annual plan for formal submission to Government. At its review in January the Board requested EBITDAS of £50m, up from £47m.

RemCo has agreed on STIP targets and recommending a gateway criteria for STIP to remain above 11,500 branches, with incentives paid on three measures: EBITDAS; removing POLSAP, HRSAP and HNGX from the business; and having the Customer Hub operational, serving customers in two pillars of Travel and Identity.

Questions addressed in this report

- 1- How has the budget moved since the last Board meeting?
- 2- What is the 2018-19 change plan?
- 3- How are we proposing to manage the balance sheet in 2018-19?

Conclusion

There have been a number of moving parts within the budget which largely net off. We are not recommending any change to the £50m EBITDAS target.

We are budgeting for a change plan of c. £255m.

We will maintain cash control staying within headroom limits in spite of the growing banking framework.

Input Sought

The Board is asked to approve the annual Plan for submission to Government as summarised in this paper and detailed in the attached slides.

The Report

How has the Budget moved since the last Board meeting?

1. The Board paper in January proposed a number of changes to finalise the budget delivering £50m EBITDAS. These changes have now been incorporated and the final proposed P&L is as following:

£m	2017-18 P5 Forecast*	2018-19 Budget	Variance	YoY
Gross Income	949	968	19	+2.0%
Cost of Sales	(121)	(121)	-	
Net Income	828	847	19	+2.3%
FRES	35	34	(1)	
Agents' Pay	(369)	(364)	5	
Staff Costs	(184)	(182)	2	
Non-Staff Costs	(276)	(285)	(9)	
EBITDAS	34	50	16	+66.7%

* Latest view on 2017-18 EBITDAS is £36m and overperformance vs budget is due to underspend in growth fund and increase in Bol profit sharing which will not recur next year.

2. There are still a number of moving parts which might have an impact on 2018-19 EBITDAS. However, it is anticipated that these will not have a net negative impact on EBITDAS and expected to be managed within business unit targets.

Retail: Decision on not proceed with Simplification Phase 2 (£2.7m)

A decision not to implement network simplification Phase 2 which would reduce the agents' pay by £6.5m pa however materially increase our network risk through increased resignations and disengagement of partners.

FS&T: Moneygram Deal £2.0m - £3.0m

Negotiations to get additional guaranteed payments against the reducing volumes and change the existing exclusivity clause to allow us to pursue digital capabilities.

3. We don't have a deal with Bol and therefore no assumption has currently been made with regards to the wider negotiations with BOI (Peregrine) and it was agreed with the Board in January that the impact of this would lead to a change in the budget targets.
4. Although the growth on EBITDAS looks like only £14m YoY (from latest view of £36 to £50m). On a like for like basis the growth is £54m.

17/18 expected EBITDAS	£36m
Bol value share, not recurring next year as we don't a deal with Bol	(£13m)
Impact of Ofcom regulatory changes	(£15m)
YoY Marketing increase, including £5m growth fund	(£12m)
£40m Change benefits plus trading improvements	£54m
18/19 EBITDAS Target	£50m

What's the 2018-19 change plan?

5. 2018-19 is the first year of 3-Year Plan. The budgeted change spend for this year is £255m and the expectation by strategic priority is as following:

Strategic Priority	Forecast
Simplify the retailer proposition	£55m to £65m
Build innovative, flexible and secure IT	£80m to £90m
Modernise our products and services	£70m to £80m
Digitise and optimise the business	£15m to £20m
Modernise our skills, culture, HR policies and processes	£4m to £6m
Regulatory & Group Litigation Costs	£11m to £14m
TOTAL	£235m to £275m

6. Among the projects planned for 2018-19, the below projects are crucial to deliver the EBITDAS target given that these projects will contribute with ca. £40m in-year benefit.

	2018-19 Investment	In-Year Benefit
Simplify the retailer proposition	£61.5m	£11.8m
- Further franchising DMBs	£22.8m	£1.6m
- Network Expansion	£18.7m	£2.0m
- Multi-year Crown Projects	£17.9m	£8.1m
- Self Service Kiosk Rollout	£2.0m	£0.1m
Build innovative, flexible and secure IT	£33.8m	£7.3m
- Branch Printer Replacement	£3.6m	£0.5m
- CDP re-procurement	£1.4m	£0.5m
- EUC Branch Deployment	£6.4m	£0.6m
- HNGT Lite	£1.8m	£0.9m
- PCI/Payments Hub	£2.5m	£0.2m
- Project Everest – Cloud enablement	£15.2m	£4.0m
- Project Nelson	£2.5m	£0.5m
- Software Asset Management	£0.4m	£0.1m
Modernise our products and services	£19.7m	£17.1m
- POMS Investments	£11.3m	£4.6m
- Project Galaxy	£4.8m	£11.6m
- Falcon – Travel Hub	£3.6m	£0.9m
Digitise and optimise the business	£0.3m	£3.5m
- Success Factors Ph1 Completion	£0.3m	£3.5m
Modernise our skills, culture, HR policies and processes	£6.0m	£0.5m
- Back Office Transformation	£6.0m	£0.5m
Group Litigation	£9.0m	(£9.0m)*
TOTAL	£130.3m	£31.2m

* Group Litigation costs will be reported as exceptional spend and will not impact EBITDAS. Please see the appendix for YoY EBITDAS reconciliation.

7. In addition to the above projects, there are further key investments to secure either the current income stream (income protection) or contribute to the future profitability beyond 2018-19.

	2018-19 Investment	Pro-Forma NPV
Simplify the retailer proposition	£6.0m	
- Agents/Postmasters Portal	£6.0m	TBD
Build innovative, flexible and secure IT	£20.5m	
- Full Thin Client Deployment (Solar Full)	£9.0m	TBD
- End-of-Life Replacements	£4.0m	TBD
- Risk & Resilience	£7.5m	TBD
Modernise our products and services	£46.7m	
- Identity Services Investments	£11.4m	£25.5m
- Banking Framework – Future of Cash incl. vehicles	£10.0m	£1.1m
- Mails Projects	£8.0m	£3.5m
- Falcon – Additional Verticals	£11.3m	£13.0m
- Property	£6.0m	TBD
Digitise and optimise the business	£15.5m	
- Enabling supply chain and back office improvement	£12.0m	£2.0m
- Project Arrow (BI Strategy)	£3.5m	TBD
Regulatory	£4.0m	
- GDPR	£4.0m	(£4.0m)
TOTAL	£92.7m	

8. The above project are currently either at their design stage or even initiation stage and therefore the NPVs are high level estimates. All these projects are subject to Investment Committee/Board approval before being kicked off.

9. The projects with in-year benefit (£130m) and further key investments (£93m) represents over 85% of the planned spend for 2018-19. The remaining is made up of smaller projects and are also subject to governance approval.

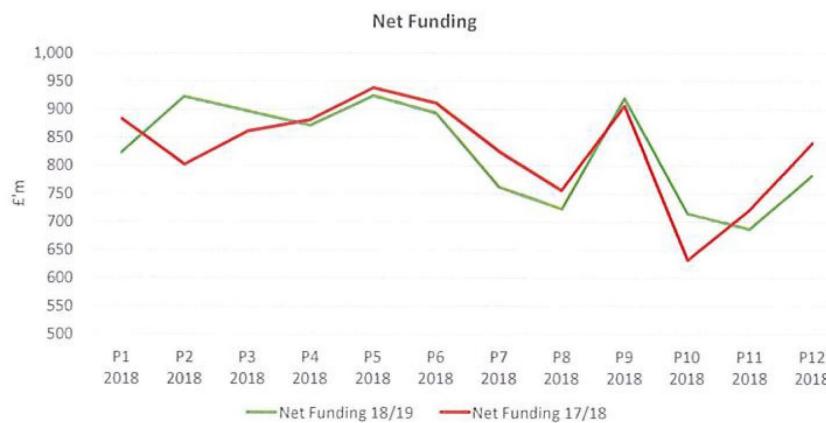

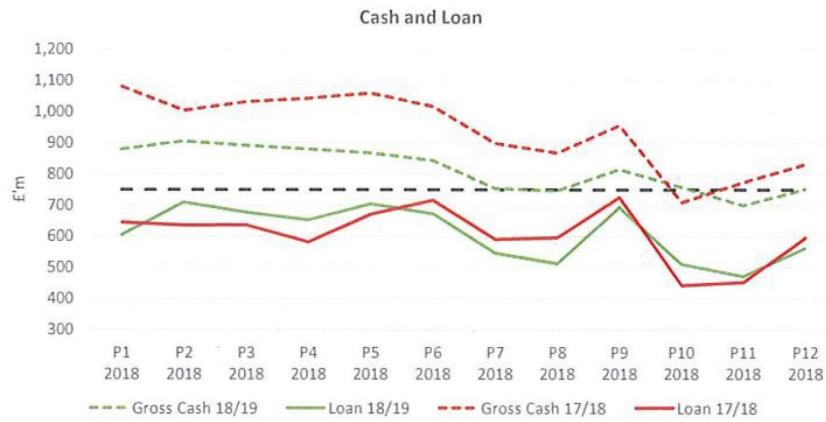

10. Current plan doesn't reflect Project Panther costs. If this materialises, the project will be self-funded.

How are we proposing to manage the balance sheet in 2018-19?

11. The Balance Sheet, Cash and Headroom positions have been prepared and are subject to update following the final 2017-18 outturn position. The key assumptions made are:

- Government funding will be drawn down on a quarterly basis in line with the proposed spending pattern and there will be no significant fluctuations in spend profile vs. drawdowns.
- Banking Framework is assumed to require an additional £36m of cash in the network (future of cash paper is still in development)
- Branch holdings are reduced down to £486m, including the adverse impact of banking framework by end of next year vs. 2017-18 ytd avg. of £550m.
- Cash centre balances are held at current levels, subject to seasonal fluctuations.

12. The net inflow for the year is ca.£60m leading to a reduction in the net funding position. Month-end headroom is not expected to exceed the £750m threshold but as always will be tight over the Christmas period and will need to be closely monitored.

1

2018/19 Budget

Al Cameron
27 March 2018

1 Strategic context and priorities

- 2 Overview of 2018/19
- 3 Income
- 4 Margin
- 5 Costs
- 6 FTE
- 7 POMS
- 8 Risks and Opportunities
- 9 Capital and Investment Spend
- 10 Cashflow and Headroom

Overview

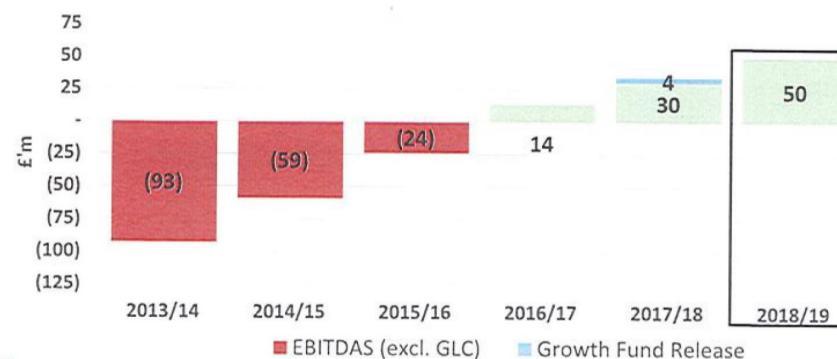

2017/18 Another year of progress:

- We continue to modernise, over 7,500 branches now modernised. These branches are delivering longer opening hours, more efficient ways of working and more attractive environments for customers in their local communities.
- Supply Chain rationalisation (Project Iris) implemented in early 2017 is now embedded into the organisation and settling down as BAU.
- Back Office Transformation continues with Phase 1 implementation ongoing and expected to complete in Aug 18.
- IT transformation continues with the network change to Verizon expected to complete by Mar 18 and Branch Technology upgrade in Aug 18.
- 3 year funding plan agreed and EBITDAS (excluding Group Litigation Costs (GLC) ahead of 2017/18 targets as we continue to deliver momentum towards commercial sustainability.

But trading conditions look challenging:

- £50m EBITDAS (£3m ahead of funding plan*) in spite of challenging trading conditions in Retail, Telecoms and Financial Services.
- 2018/19 will represent a year of stabilisation and delivery of key transformation projects as we set ourselves up to successfully deliver the next round of significant cost reductions in 2019/20.

* 3 Year Plan adjusted for known changes. See reconciliation on slide 7.

As identified in the 3 Year Plan the Post Office still faces major challenges that must be addressed to secure its long-term sustainability

Income is declining in our core markets with more work to do on costs

- **Government services, payments and traditional mails products are all facing downward pressure** due to the continued shift to alternative channels and growing competition.
- While we have reduced costs significantly since 2012, because of legacy operating systems across the business we still have **more work to do to reduce costs** which otherwise drag on our profitability.
- In the absence of further investment to complete the transformation we estimate that we **will revert back to an EBITDAS loss** of nearly £30m by 2020/21, compounded by the fire sale of assets to generate cash.

Our digital capabilities are insufficient to meet consumer expectations and drive growth

- **Limited digital capabilities across our product range**, with no single view of customer. We are at risk of losing relevance to customers, with 60% of customers in our target segments saying they prefer to access services online.
- This is particularly crucial for **financial services and identity, but even in mails** many customers want to be able to start their journey online, accelerated by developments like the roll out of eBay's online shipping platform.

We need to secure the right retailers to host our network

- **Retailers have more choice than ever** for ancillary services which range from self-serve coffee machines to parcel services.
- **While retailers see the value of hosting a post office, for many this is offset by concerns** around the operational cost and complexity and the prospect of declining direct remuneration.
- **These issues are creating the potential for network instability**, with 1,000-2,000 branches at risk over the next few years if we don't act.

Our major commercial partnerships need to be realigned

- We are **approaching the sunset years of the current contract with Royal Mail**, with an urgent need to work more effectively together to respond to intensifying competitive pressures.
- The current relationship with **Bank of Ireland is no longer delivering decent growth prospects**, due to a combination of their balance sheet constraints and the wide ranging exclusivity which prevents us from working with new suppliers better equipped to support our commercial plans.

Our IT systems need modernising to provide greater stability, security and flexibility

- The core operating system used in the branch network (**Horizon**) **was designed two decades ago** in a paper-based, non-networked world, and for a different purpose to the one we need today.
- Both our branch and back office systems are at the end of their life, leaving us unsupported by suppliers or exposed to unacceptable cost demands and operational risks. We have suffered several significant service outages in recent months, and these incidents will continue if we do not invest.

Comment

- Core retail revenues declining .
- Detailed cost reviews ongoing
- Budget assumes continuing investment spend in line with 3YP

- Customer hub launched in 2018/19 with marketing investment to support. Benefits expected in outer years.

- Continued network transformation and plan assumes delivery of c300 additional sites in 2018/19

- Negotiations ongoing with Royal Mail around Simplification roll-out.
- Plan currently assumes no agreement with BOI

- Back office transformation and branch technology roll out expected to delivery by Au 18. Significant IT cost savings included in 18/19

Five strategic priorities address these challenges and complete the transformation

STRATEGIC PRIORITY	KEY INITIATIVES 2018/19 – 2020/21	INVESTMENT 2018-2020 (£M)	BENEFITS & OUTCOMES	2018/19
Simplify the retailer proposition	<ul style="list-style-type: none"> Simplification of product transactions and branch operations Network expansion in urban areas to meet customer demand Further franchising of DMBs (177 assumed in Plan) Roll out of self service kiosks for agency branches, development of more flexible POS solutions (via HNGT) and the creation of an 'agent hub' to digitise and simplify services to postmasters 	£190 TO £210M	<ul style="list-style-type: none"> ~£36m pa benefits by 2020/21 Increased retailer demand for post offices, strengthening our ability to attract and retain the best agents (at lower remuneration). A better network for customers, with more locations in areas of high demand. 	C.£12m of benefits from transformation in plan.
Build innovative, flexible and secure IT	<ul style="list-style-type: none"> Replace end-of-life branch hardware and invest in improving security and addressing recurring outages and system failures Transition Horizon to cloud based architecture with increased business flexibility via development of 'thin client' Restructure IT operating model to take back control of core functions at lower operating cost 	£80M TO £90M	<ul style="list-style-type: none"> ~£23m pa benefits by 2020/21 Operational risk profile shifted to within acceptable parameters. Flexible IT architecture to enable better services for customers, agents and staff 	IT program continues with £9m benefit.
Modernise our products and services	<ul style="list-style-type: none"> Creation of integrated digital platform (the 'Customer Hub') to drive growth across financial services and our wider product range Development of multi-channel mails services to deliver improved convenience for both SMEs and consumers Investment in capabilities to lead the market in digital identity Further expansion of the Banking Framework 	£90M TO £110M	<ul style="list-style-type: none"> ~£31m pa benefits by 2020/21 10% of revenue base from new products & propositions, stabilising overall top line Digital innovation used to improve every possible product transaction 	Customer Hub, Identity Services & Banking Framework growth included
Digitise and optimise the business	<ul style="list-style-type: none"> We will deliver a further 20% reduction in central staff costs by streamlining and automating key processes across the organisation and digitising our services to agents Supported by transformation and replacement of back office systems to deliver improved processes and the MI our people need to run the business 	£30M TO £35M	<ul style="list-style-type: none"> ~£16m pa benefits by 2020/21 Our people are able to focus more of their time on serving customers and adding strategic value – not doing processes that are better performed by machines. 	BOT ongoing in 18/19 with cost reductions from 19/20 planned
Trust our people to find the best way to do their jobs and help our customers	<ul style="list-style-type: none"> Talent and career progression: provide an environment where our people have a chance to learn, grow and thrive, with the right succession planning and early career talent development. Learning & Development: everyone who wants to learn and develop will be fully supported through a range programmes. Reward and Recognition: attract and retain the talent we need. 	~£5M	<ul style="list-style-type: none"> Underpins delivery of the above Culture and talent in place to deliver the next stage of the POL transformation Improved staff engagement levels 50% of senior roles filled by internal candidates 	Review on going

6

The 18/19 proposed budget delivers £50m EBITDAS. +£3m ahead of 3 Year Plan target

	2018/19 Bud	2017/18 P5F ^	Var P5F	% Var
Gross Income	971.3	949.2	22.1	2.3%
Direct Costs	(125.7)	(121.1)	(4.5)	3.8%
Net Income	845.6	828.1	17.5	2.1%
Net Margin	87.1%	87.2%	(0.2%)	
Agents Pay	(363.7)	(368.5)	4.8	(1.3%)
Staff Costs	(181.9)	(184.3)	2.4	(1.3%)
Non-Staff Costs	(283.8)	(276.0)	(7.8)	2.8%
Expenditure	(829.4)	(828.8)	(0.6)	0.1%
FRES - Share Of Profits	33.8	35.0	(1.2)	(3.4%)
EBITDAS (pre GLC)	50.0	34.3**	15.7	45.7%
GLC	(9.0)	(2.4)	(6.6)	275.0%
EBITDAS	41.0	31.9	9.1	28.4%

Target Reconciliation

	2018 / 19
Per 3 YP	40.0
Project Costs into BAU*	2.0
GLC (per 5YP)	5.0
Target pre GLC	47.0
Board Challenge	3.0
2018 / 19 Budget	50.0

* 3 Year Plan approved by the Board included a £5m adjustment for project costs moving into BAU. Net adjustment in 2018/19 is £3m leading to the "target" being increased by £2m.

^ P5 Forecast updated to reflect assumed release of Growth Fund £3.9m.

** Latest view on 2017-18 EBITDAS is £36m and overperformance vs budget is due to underspend in growth fund and increase in Bol profit sharing which will not recur next year.

Gross Income

- Revenue growth 2.3% despite continuing pressures in Retail underlying trading, Telecoms pricing pressures (Ofcom) and removal of the profit share agreement with Bank of Ireland.

Direct Costs

- Growth in costs driven by Telecoms and Government Services growth. Slight margin decline.

Agents Pay

- Reductions in agents pay with simplification savings offsetting incremental costs from franchising DMB's. Changing revenue mix drives year on year improvements.

Staff Costs

- 3.0% payrise assumption impacts by c.£5m partially offset by £3m pension saving.
- £8m benefit from franchising DMB network (offset by increase in agent pay)
- £4m Incremental investment to fund skills gaps identified.

Non Staff Costs

- Marketing and growth spend, including a £10m growth fund (2017/18 estimated to be c.£5m) and £5m of incremental marketing year-on-year.
- Significant IT cost reductions of c.£10m.
- Increase in regulatory costs from POCA £6m and £2m card processing.

FRES

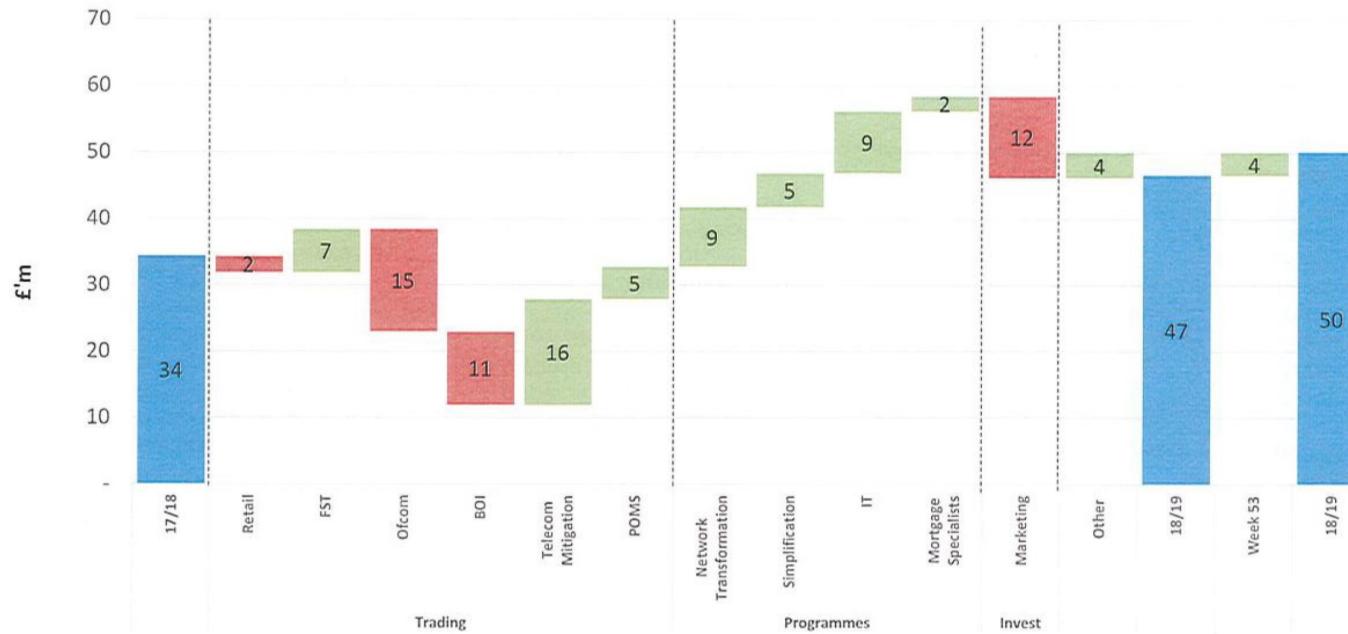

- Reduced trading performance due to AML regulations.

Group Litigation Costs

- Excluded from targets. Costs anticipated to be £7-£9m in 2018/19.

£16m year on year EBITDAS improvement achieved against significant trading challenges

- £7m growth from FST including growth from Banking Services due to inflationary increases and continuing growth in Banking Framework
- £15m potential impact of Ofcom price reduction offset by volume growth and mitigating actions.
- £11m BOI value share and guaranteed income excluded from 2018/19 (currently under negotiation).
- Network Programmes deliver £14m of improvement – Network Transformation £9m and Simplification £5m.
- Transformation of the IT cost base continues with significant year on year savings delivered.
- Savings from Mortgage Specialists with announcement in January.
- £12m of incremental marketing costs (inc. Growth Fund) and £2m increase in marketing headcount.

Note: £34m is 2017/18 anticipated outturn as per the P5F adjusted for £2m impact of GLC and £4m anticipated release of the Growth Fund.

Key income drivers, initiatives & investments in 3 Year Plan

KEY DRIVERS	MAILS	IDENTITY & GOVERNMENT SERVICES	BANKING SERVICES	PAYMENTS
KEY INITIATIVES	<p>Traditional mails volumes declining by 2-3% pa due to increased digitisation and competition. Our plan seeks to offset this by tapping into faster growing segments of the parcels market as set out below. Overall income also held up by RPI linked fee mechanism with RMG.</p> <p>Up to £40m invested to strengthen our network coverage and multi-channel capabilities, including through:</p> <ul style="list-style-type: none"> Drop & Go: growing the SME user base and improving the online service with additional features like loyalty discounts. Click & Collect: improving the customer journey for parcels collections and potentially extending to other carriers and platforms. Multi-channel expansion and eBay integration: enabling customers to start transactions online and complete in branch, and potentially selling RMG tracked services directly through our own digital channels. 	<p>Legacy services in continued decline, with net income from POCA, DVLA, UKVI & passports declining from £62m to £33m. Plan partly offsets this with growth in digital identity.</p> <ul style="list-style-type: none"> Launch of Digital Check & Send for passports: improving the customer journey and supporting HMPO's aim to remove paper. Delivers c£12m income by 2020/21. Identity services: building the UK's digital identity market to improve security & convenience for customers and reduce costs for clients. Underpinned by c.£20m investment in digital platform and in-branch technology. 	<p>Continued bank branch closures (nearly 500 in 2017 alone) and increased awareness of Banking Framework driving growth of c5% pa.</p> <ul style="list-style-type: none"> Further enhancements to the Banking Framework: ongoing programme of product innovation, such as quicker deposit processes for business customers. Discussions underway with major banks around further extensions to the Banking Framework to support more radical reconfiguration of their network, which would necessitate additional investment and financing arrangements. 	<p>Traditional bill payments market declining by >5% pa due to shift to alternative channels, although our strategy seeks to drive outperformance vs the market.</p> <ul style="list-style-type: none"> Targeting large clients directly and enabling the technical capability required to leverage growing segments such as pre-pay smart metering and transport ticketing. Project Panther currently being assessed – seeks to accelerate improvements to our network, retailer technology & product range (£15-20m investment). ATMs: new contract required during Plan period – options under review.
RISKS	<ul style="list-style-type: none"> Significant uncertainty associated with both the pace of market developments (e.g. shift to eBay shipping platform) and the outcome of negotiations with RMG – impact of these events could worsen mails income by £10-30m pa by 2020/21. 	<ul style="list-style-type: none"> Up to £15m pa profit at risk by 20/21 if identity market does not evolve as planned. Potential for additional regulatory costs of £5-10m pa on POCA. 	<ul style="list-style-type: none"> New framework agreement needs to be negotiated with the banks before the end of the plan period, presenting both risks & opportunities. 	<ul style="list-style-type: none"> Bill payments income and volumes subject to significant binary risk associated with winning large client contracts against intense competition.

Key income drivers, initiatives & investments in 3 Year Plan

	PO MONEY	POMS	TELECOMS
KEY DRIVERS	<ul style="list-style-type: none"> Bank of Ireland balance sheet constraints and alignment of incentives are the major factors influencing outlook for PO Money product range – currently assuming £7m income drop from savings. Offset by investment in own capabilities (see below). Plan assumes we maintain our c25% share of a broadly flat travel money market. 	<ul style="list-style-type: none"> Against the backdrop of a competitive market, POMS plan seeks to deliver c£20m profit increase by 2020/21, by building on the investments to date to increase control of the value chain, retain more value and improve distributional capabilities. 	<p>Fixed line net income – traditionally the mainstay of the PO telco business – is set to decline, not least from impact of Ofcom interventions. Our plan seeks to offset this through growth in new products & customers.</p>
KEY INITIATIVES	<ul style="list-style-type: none"> Negotiations with Bank of Ireland ongoing, with aim to recalibrate FRES value share, establish greater product sourcing flexibility and align sales incentives. Outcome currently uncertain (see Sept 2017 Board paper for further detail). Building the digital platform ('Customer Hub') required to support our future growth in financial services and other B2C product lines, delivering an integrated proposition to customers to meet their needs. Requires investment of c£30m over the period. Developing the product and proposition roadmap to put through the new platform, starting with those which are already within our control like travel, identity & insurance. Intention to launch retail investment products in 2019. 	<p>POMS strategy review underway, reporting to POMS Board in Nov 2017 – assessing range of options for driving growth:</p> <ul style="list-style-type: none"> Further increasing control over end-to-end product delivery to improve value capture, including by re-negotiating (or exiting) the arrangement with JBF (the intermediary for motor & home insurance). Deepening capabilities in pricing management, digital sales and analytics, leveraging the investment in the wider Customer Hub. Potential acquisition opportunities to broaden distribution reach and move into MGA / underwriting capabilities. 	<ul style="list-style-type: none"> Improving the efficiency of the current operations, driving higher yield from more efficient targeting of existing customers, channels and pricing propositions. Broadening the customer reach to appeal to new customer segments, leveraging the investment in the Customer Hub. Expanding the product portfolio to capture greater revenue and increase retention rates – potentially including TV, energy and mobile.
RISKS	<ul style="list-style-type: none"> Inevitable uncertainty around our ability to gain traction in new product areas like investments (forecast to generate £8m pa revenue by 20/21). As indicated above, relationship with Bank of Ireland is the key swing factor over the plan period, with both risks and opportunities against our baseline forecast. 	<ul style="list-style-type: none"> POMS plan is predicated on ambitious profit growth – a combination of external factors (regulation, Competition, macroeconomics) and internal capability dependencies could put some of this £20m growth at risk. The impact of Russet (£2.3m) and funding of additional central marketing costs are included. 	<ul style="list-style-type: none"> Precise impact of Ofcom review of landline pricing currently unknown – could add £5-10m pa risk. Broadband market remains subject to intense price-led competition.

Key 2018/19 planning assumptions

- **Bank of Ireland** – No value share included (targets would change dependant on outcome of negotiations). Prior year forecast had c.£11m impact.
- **VAT** – 9% irrecoverable rate assumed, no change from 17/18.
- **Inflation** – Where possible specified contract terms used, if not CPI at 2.6% used.
- **Interest** – assumes rate remains constant
- **Pay rises** – c.£5m budgeted (3%).
- **Bonuses (inc. NI)** – LTIP (£1.6m) and STIP (£16m) budgeted on a consistent basis with 2017/18

Mail

- Overall trading flat with favourable variance driven by RPI increase and additional week.
- Fixed fee £4m decrease split between contractual efficiencies and Annual Count reduction.
- Royal Mail request for changes to Mailwork pricing to be mitigated and will not impact 18/19 income.

Retail and Lottery

- Retail sales impacted by DMB closures offset by new WHS contract.
- Camelot lottery sales declines by 9.5%.

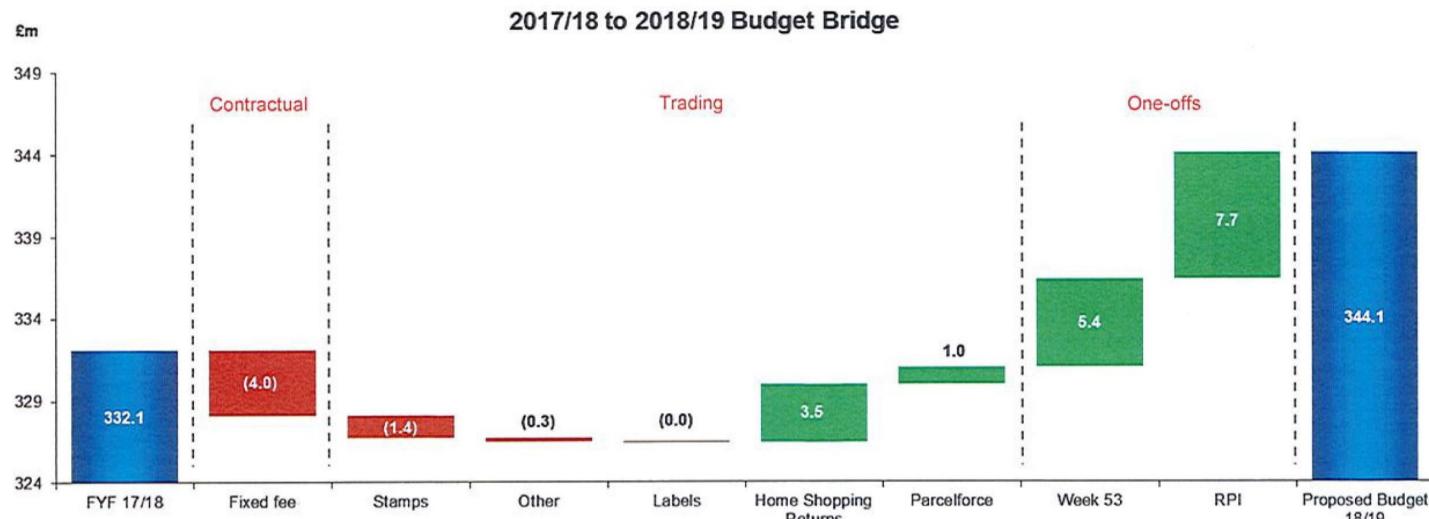

Payment Services

- HNGT Lite & new contract opportunities offsetting payments decline.
- POCA decline reduces ATM usage. Improvements in availability to 96% embedded in 2018/19.

Government Services

- POCA interest gains partly offsetting volume declines
- Passports decline led by HMPO announcement on differential pricing that makes online applications cheaper.
- Verify expecting consistent YOY volume growth vs. latest view of 17/18 exit

Mails: Fixed fee reductions offset by RPI increases. Growth driven by home shopping returns ad Week 53.

Decline Items

- Fixed fee reduction includes efficiency £(2)m and annual count £(2)m. No reduction in Mailwork fees budgeted.
- Stamps declining by 6% in line with volume YTD trend.
- Labels include 1st class £(0.4m) and 2nd class +£0.4m trending in line with volumes YTD.
- Other includes; special delivery £(0.8m), signed for +£0.3m, acceptance £(0.3)m and international +£0.6m.

Growth Items

- Home Shopping Returns increasing 21%, reflecting growth slowdown from latest 22% trend and broader industry trend slowing.
- Parcelforce increasing 4% in line with volumes YTD trend. Parcelforce confirm Rewards4U promotion will continue.
- RPI rate assumed in budget was 4% (RPI-1% applied to calculate contractual rate increase).

Mails: 5 priority initiatives to defend income and build improved customer journeys as part of our strategy to be No 1 in mails and parcels

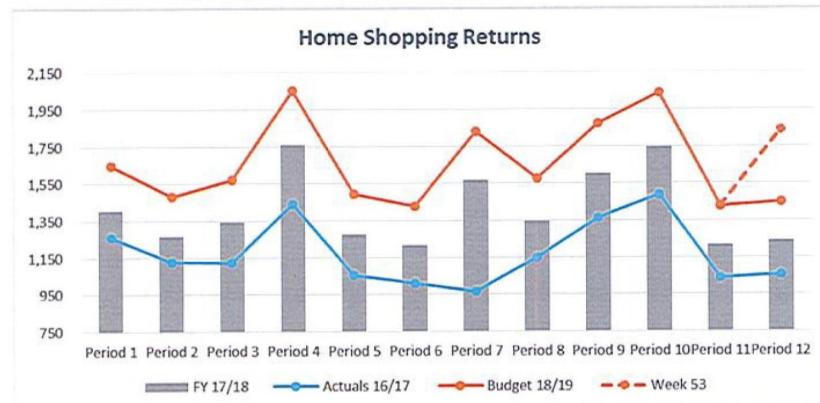

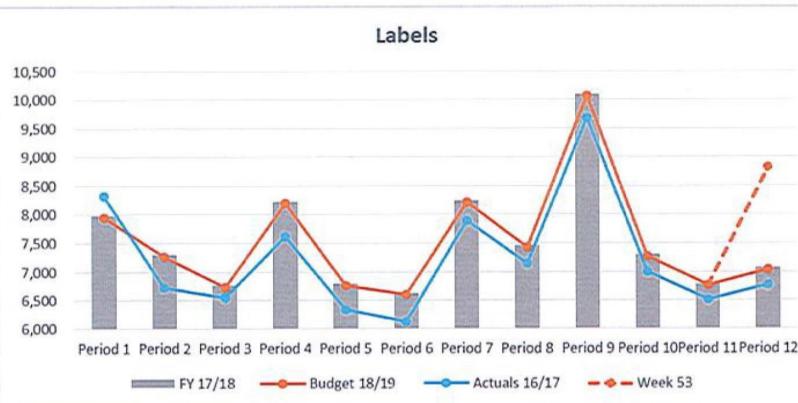

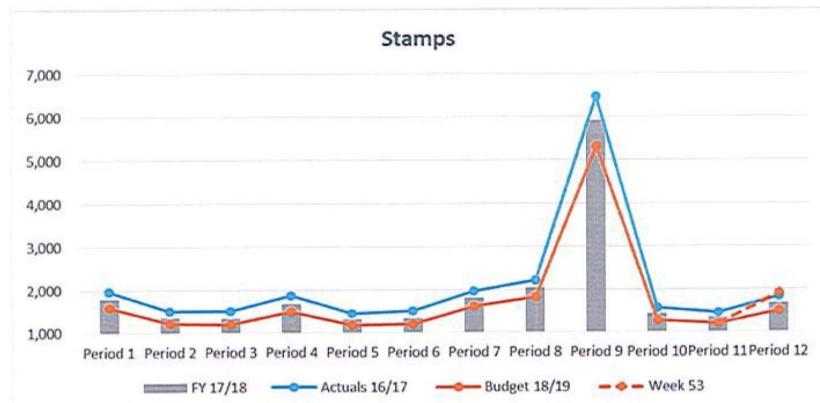

- 2018/19 Mails initiatives are focused on retaining core income and profit streams in the marketplace segment while preparing for the imminent renegotiation of the MDA with Royal Mail.
- This includes proactive creation of optionality in the Click and Collect market inline with our strategic ambitions, and ensuring we are able to react to the possible inflection point created by Royal Mail's response to eBay's shipping platform.
- The scale and phasing of some initiatives have been revised as our strategy has progressed this year

Initiative	What?	Why?	How?	Costs	Benefits
Mails Strategy	Preparation, execution and implementation of MDA renegotiation including POL NBA	To secure new agreement with RM from 2020 that delivers best value for Post Office	Continued funding of dedicated project team and specialised resource. Includes provision for legal and implementation costs	£3.4m reduced from £4.9m (exceptionalised)	Secure mails income of ~£330m p.a. for next 10 years
Small Business Club/Drop & Go	Continue technical development of Drop & Go and create of a dedicated small business CRM programme	High volume marketplace sellers account for ~£60m of POL parcels income and are vulnerable to competition & online	Upgrading Drop & Go platform to reduce user attrition, provide user visibility & MI allowing direct communication & incentive programme	£2.2m	£1.2m p.a. recurring income retention (£0.5m EBIT)
Click and Collect	Increase POL's market share from 6% to 31% by 2025.	Defend core mails by preventing competitor building brand and user awareness & grow income stream	Improve existing customer journey and extend network to increase capacity and convenience including possible automation	£3.6m	£22m pa incremental income by 2025 DPC at 22% = £5m
eBay/Online	A range of responses to secure POL's relationship with high value e-Bayers depending on speed and scale of customer migration plus RM's response	RM new Tracked Online service & eBay shipping platform challenges POL high value sellers transactions	Range from dedicated eBay role to acquisition of full online sales and pcw platform. Includes POL building RM Tracked online journey on horizon	£4.6m (£15m exceptional deferred until trigger points reached)	Minimises risk of ~£16m pa income (£6.5m EBIT) loss by yr 3 (from volume loss or rate dilution)
Multi-channel customer journey	In branch preparation to accommodate online or part online customer journeys	Some changes may be required in customer journeys, dependent on the response to eBay above	Options include prepare online, complete in branch, in branch printing	£0.2m seed funding £5m capex deferred to 2019/20	Retain £6-9m p.a. income (£2.5 -3.6m EBIT) by 2021/22 based on RM joint strategy

Mails and Income Graphs

Stamps – Continues to decline 7% YoY (excl. Christmas) due to e-substitution and overall market decline. UK letters market decline is (5%) including high volume business mail (statements and direct mail. (Note: RPI formula doesn't apply to Stamps).

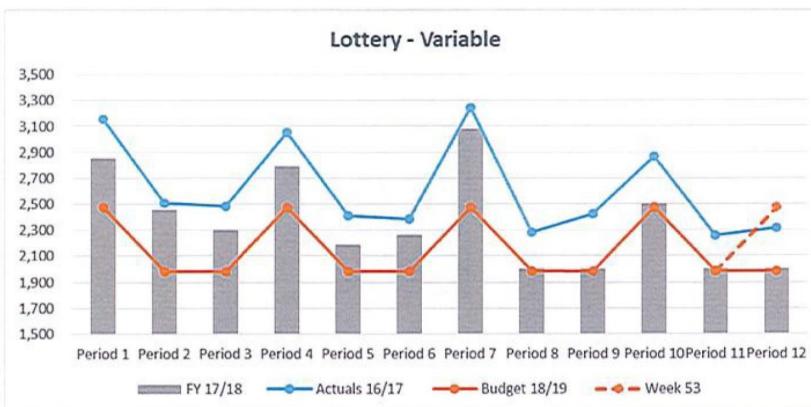

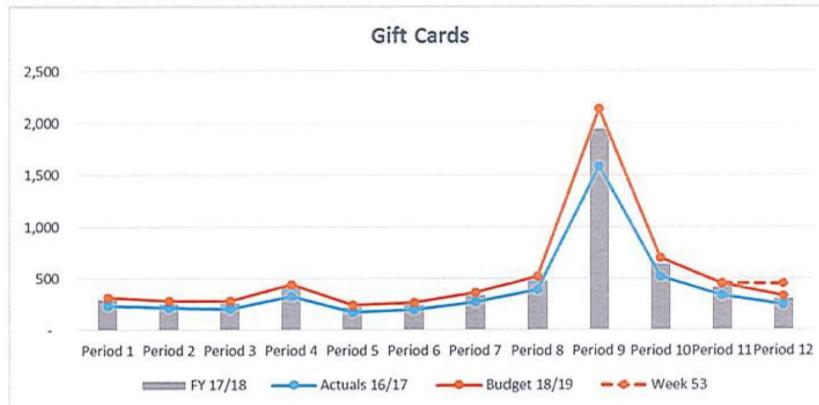

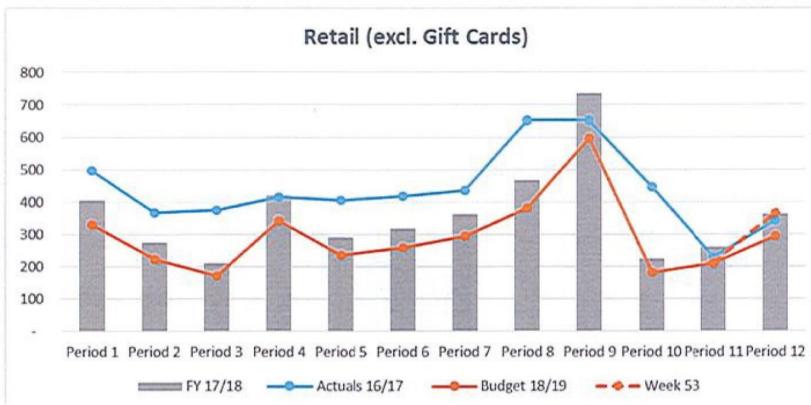

Labels – YoY income broadly flat with 1% decline in 1st class volumes and flat 2nd class volumes.

2017/18 volumes have held up despite challenges from Hermes and eBay price promotions and RM's channel strategy (online price differential and delivery confirmation)

Labels remains the main area of risk and opportunity going forward with substantial challenges deferred from this year.

Home Shopping Returns - Continues to grow +21% inline with UK online sales. Retailers facing growing economic pressure to reduce paid for returns are challenged by growing customer expectation and competition offering improved returns and refunding experiences

Continuing decline in Retail and Lottery. Gift cards continue to grow over and above market.

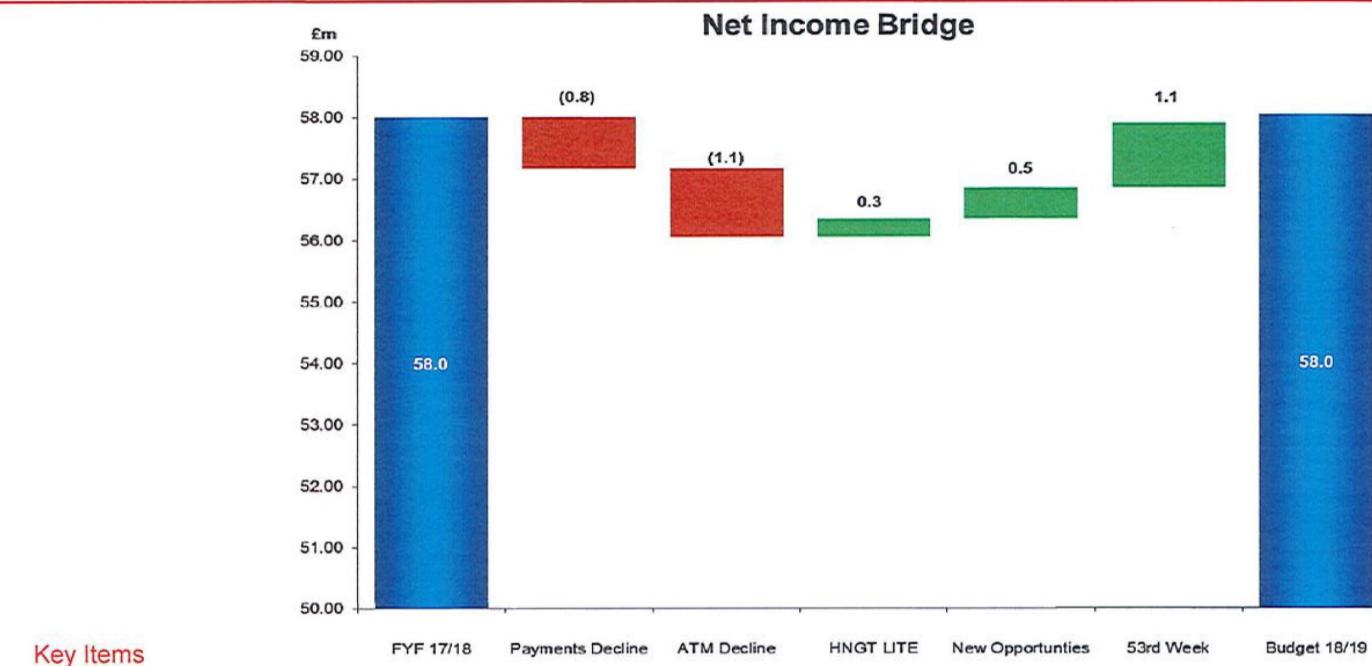

Retail (Includes Photo-Me booths) - decline driven by DMB closures (23 residual from 17/18 and 38 planned for 18/19). Retail sales income reflects the new WHS contractual arrangement and assumes a sales uplift of 40% due to new fit out and product range. c.£3m reduction in revenue and cost of sales (minimal EBITDAS impact) as we move to recognising commission only.

Gift Cards – Continues to grow +10% YoY above overall market growth (5% in 2016).* Predicted slowing of growth due to Amazon's departure.

Lottery Variable – Continues to decline 8% YoY based on prior two year average trend. The fixed fee for Camelot is assumed the same but is subject to a new mechanism based on our success in audits of prize payout tickets.

*Source: UK Gift Card & Voucher Association 2016 Summary H2

Payment Services: ATM declines from POCA volume reductions offset by increased availability and HNGT Lite.

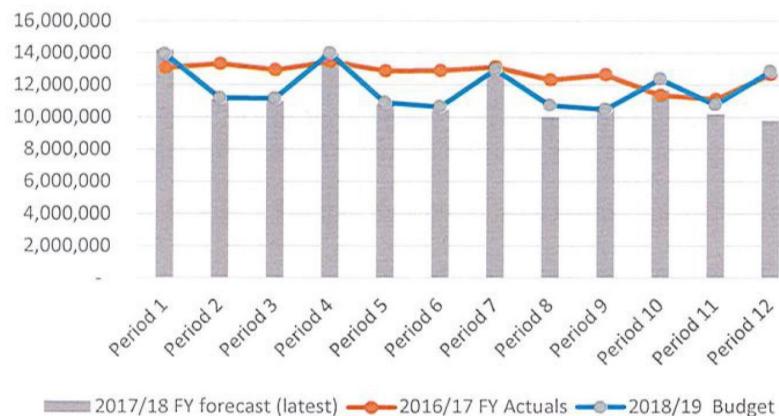

- Direct Clients budgeted at 8% YoY decline & reseller a decline of 6%. Currently both direct and reseller volumes are declining at 9% YoY.
- Payment Services are expected to generate 102.5m (Bill Payments 95m + mobile top up 5m + 2.6m HNGT) transactions for 18/19 vs 104.4m in forecast.
- Decline in ATM resulting from a decline in POCa volume of (3.5)m withdrawals, partially offset by improved ATM availability from 94% to 96% which increases withdrawals by 2.8m YOY.
- HNGT Lite business case assumes annual benefits of £2.3m, of which £0.3m will be realised in 18/19.
- New Opportunities includes: Allpay exclusive £0.2m, smart £0.1m & payout £0.1m & BT payout £0.1m.

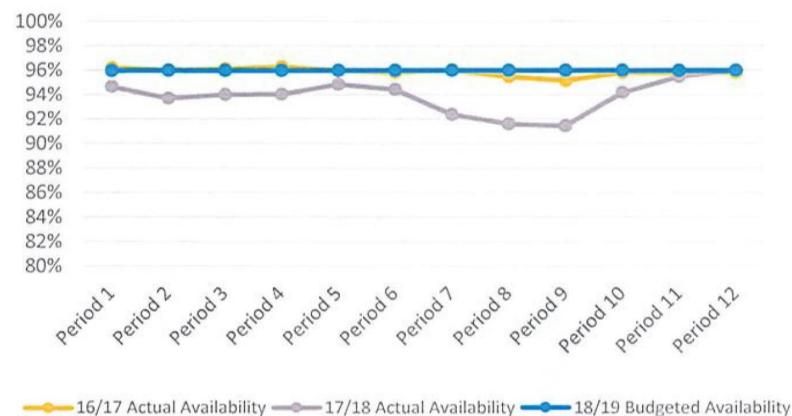

ATMs £(0.5)m Income driven by 10% volume decline

ATM Volumes

ATM Availability

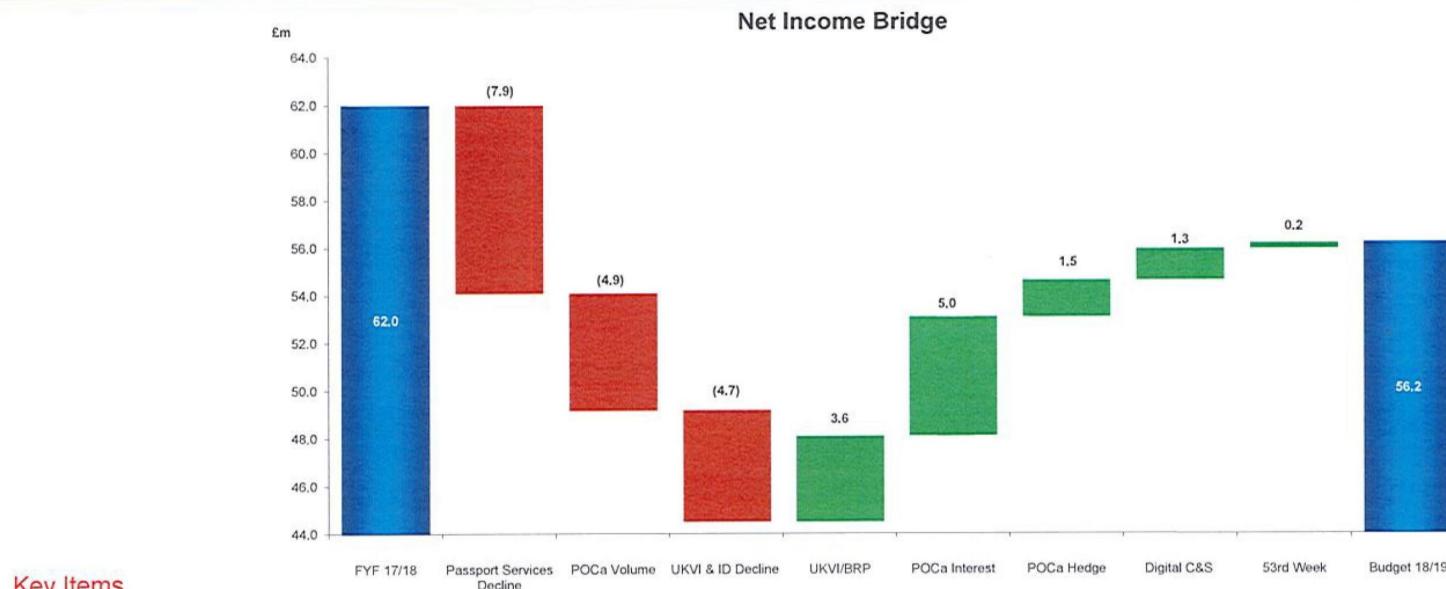

- Decline in ATM resulting from a decline in POca volume of (3.5)m withdrawals, partially offset by improved ATM availability from 94% to 96% which increases withdrawals by 2.8m YOY.

Availability issues:

- Of 2,370 live ATMs 2,110 are transacting at average availability of 98.2% (i.e. 2.2% above 96% target) @ P10 17/18
- The remaining 260 ATMs have been experiencing average availability of 65%. This is primarily being driven by a high number of cash dispenser faults and cash jams following the introduction of polymer £10 notes.
- YoY reduction (10%) is driven by POCA (3.2%), Out of Grounds ATM (2.6%) , Reduction in cash transactions (2.3%), Service issues (2%)
- 18/19 volumes will be supported through (i) service levels to remain above 96% target, (ii) £5 note dispense on additional 300 ATMs and (iii) 50 external ATMs to be installed in WHS

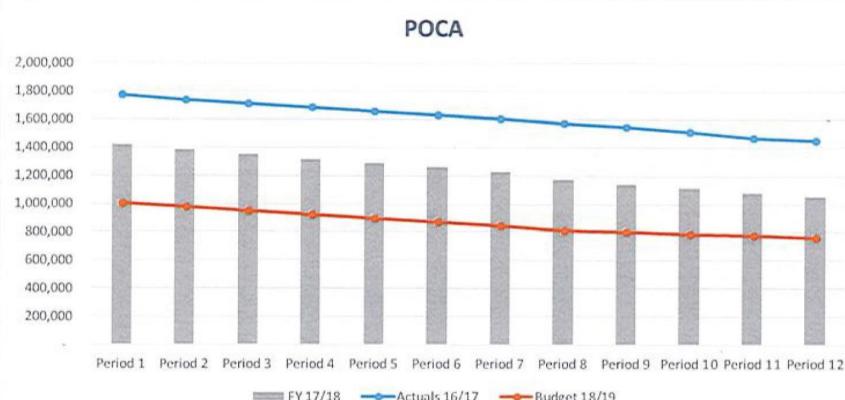

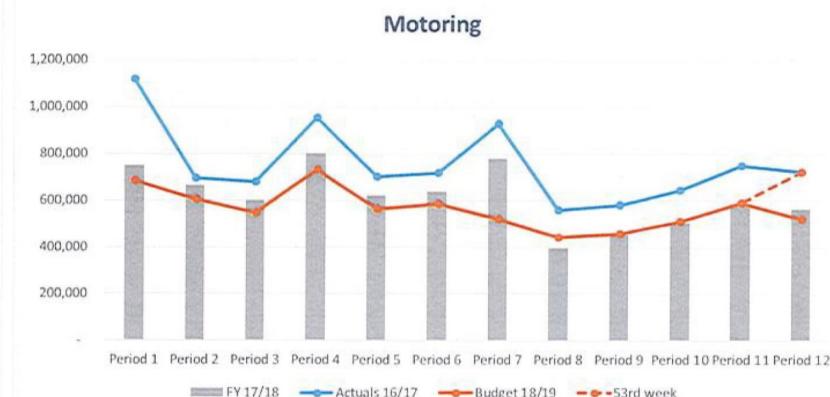

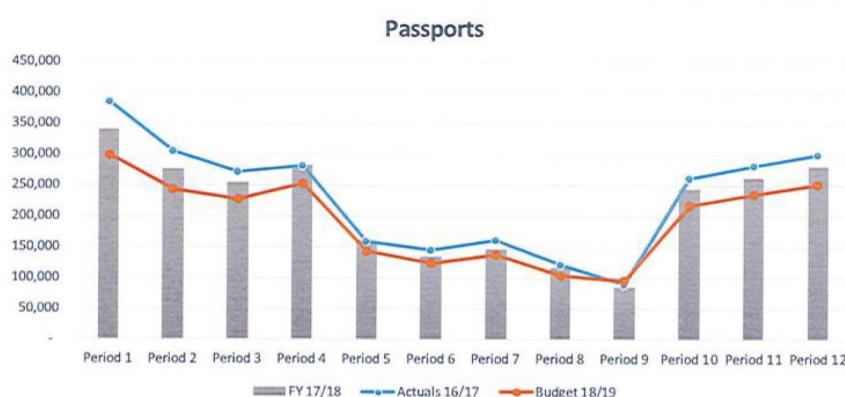

Government Services (excl. Verify) continues underlying decline.
Interest and hedge benefit from POCA offset declines but also
impacted by additional regulatory costs

- Assumed decline of £(6.5)m for Home Office pricing announcement. Continuation of current YOY run rate of 7% decline £(1.4)m.
- POCa Active accounts are dropping YoY by 30% due to DWP migration of customers onto basic bank accounts £(4.9)m, income from overnight balances is up YoY by £5.0m due to the uplift in LIBOR rate in Nov 2017 (following BoE increase in base rate).
- Current UKVI contract due to expire October 18, expected to delay until December 18 £(1.9)m, partially mitigated by £0.3m from winning the new Front End Service. Annualised volumes will decrease from 400k to 50k, with a price change from £16 to £25 per transaction. SIA and Secure Collect contracts expire in July18. Budget assumes that will extend for a further year mitigating £1.7m net income exposure.
- Planning to enter a 3-year interest rate swap, Libor hedged at 0.725% across the period. Assumption that actual Libor will be at 0.5% in April 18, increasing to 0.6% in March 19, resulting in annual hedging gains of £1.5m.
- Digital Passport implementation P7 onwards £0.8m, with assumption of 50/50 split of volume paper to digital.

21

Government Services Income Graphs

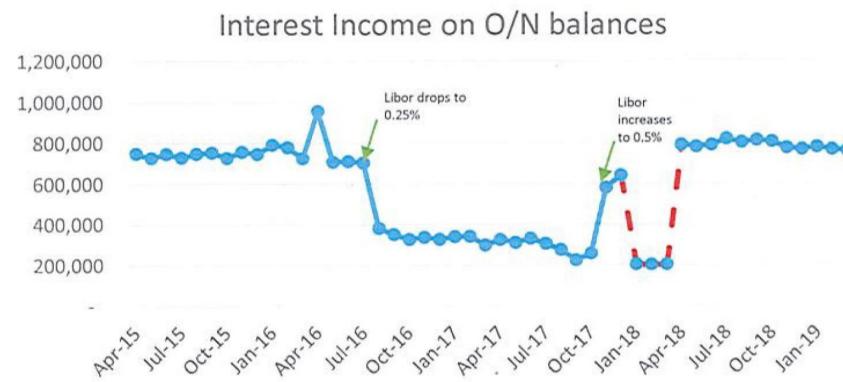

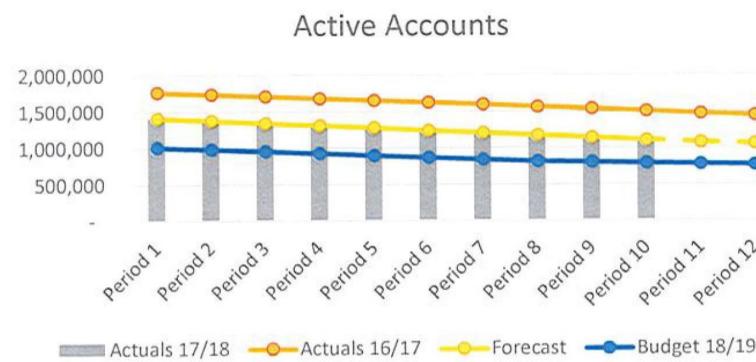

Passports - Budget has been revised and shows a year on year decline of 39%. The key driver of change is the HMPO announcement on differential pricing that makes online applications cheaper than those made through check and send. This change comes into effect at the start of the new financial year and will therefore impact branch volumes.

Motoring - volume decline is planned at 9% YOY, in line with current performance and reflects the slow down in decline over the past two years. The volume decrease is prominently led by tax discs, 10 year renewals are planned to remain static.

POCA - volumes are planned to continue to decrease steadily as account holders are migrated onto bank accounts.

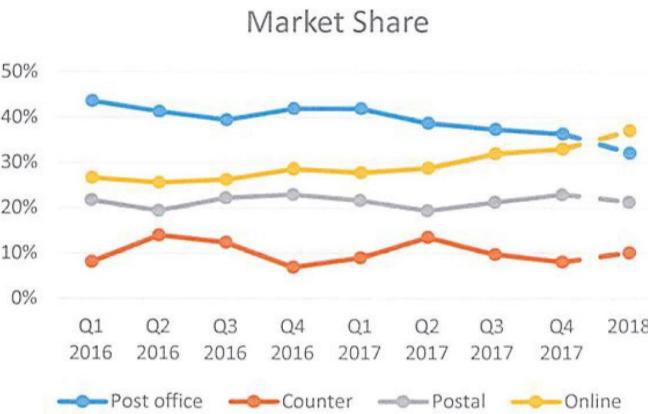

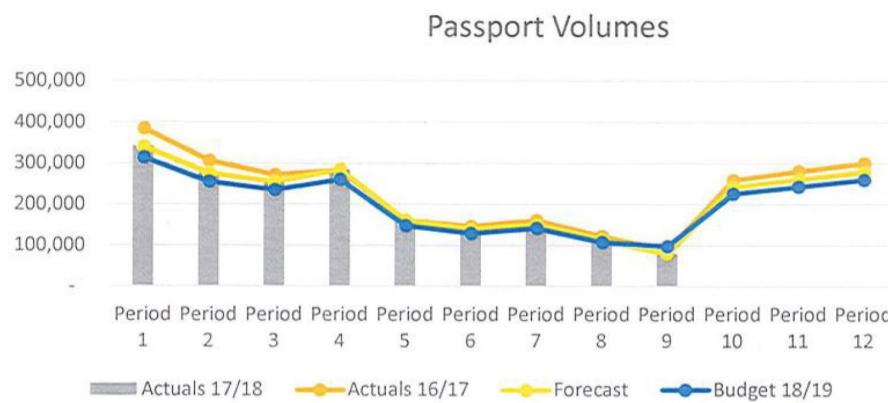

POCa – Income 30% volume decline offset by £6.5m Interest uplift following interest rate increase in Nov 17.
(Note: No changes to interest rates have been assumed in 2018/19)

- Active accounts are dropping YoY by 30% due to DWP migration of customers onto basic bank accounts. The rate of migration has been less than DWP targeted and therefore they have started to target young pensioners as well as working-age customers. This will continue throughout this year as they attempt to hit their target of 720k customers (they are currently about half way through).
- Income from O/N balances is up YoY by £5m due to the uplift in LIBOR rate in Nov 2017 (following BoE increase in base rate) and additional £1.5m from the interest rate swap (approved by ARC). This is also helped by total balances remaining higher than originally forecast although this is expected to return to forecast as pensioners are encouraged onto other products.

Passports £(0.7)m Income driven by 7% volume decline

	17/18 FYF	18/19 Budget
Net Income	£21.1m	£20.4m

- Budget assumes an 8% decline in volume YOY. The current trend shows a 7% YOY decrease which has been embedded into the plan, with a further 1% reduction derived from new Home Office digital product launches expected in 2018/19.
- Market share of passports has continued to decline between 0.2% and 0.5% per month in 17/18, with a market share of circa 37.5% anticipated in March 18 compared to 44% in March 2017. HMPO have announced that PMA registered companies (Photo Me, Timpsons etc) will be able to provide digital photographs to support online applications and also that the online service will be extended to 16-24 year olds. Both these actions are expected to impact 2018 volumes. We expect HMPO to increase the activity to promote online services in Q4 17/18, which may see additional pressure in 2018.

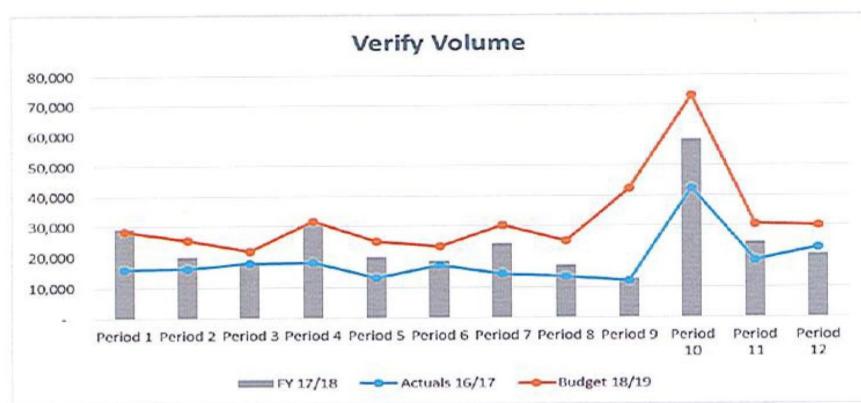

Identity Services revenue in line with recent volume trends

Key Items

- Overperformance expected over the remainder of 2017/18 based on recent month revenue trends.
- Level of Assurance (LoA) 2 volume growth assumed to remain static at 31% for 2018-19.
- LoA2 margin improvement of £1.45 per transaction gained via contractual volume achievements.
- LoA1 was launched in P5 17/18, budgeted consistently with recent trends circa 2,000 transactions per week.
- Verify in branch anticipated rollout in P9, dependent on digital passport implementation in P7, benefits phased with incremental growth, steady state is £1.5m per annum.

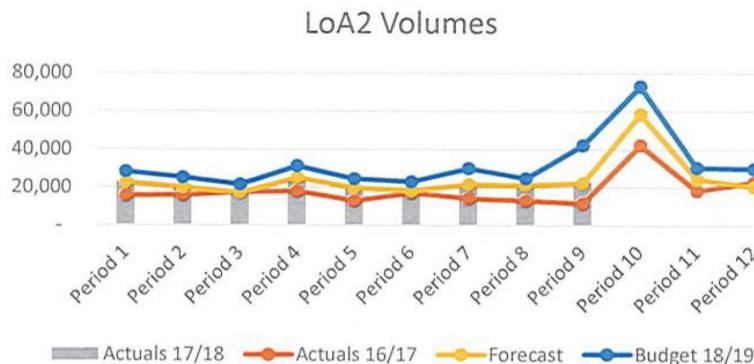

Volume Key Items

- Verify volume growth is anticipated to remain static at 31% YOY, this is in line with current year performance.

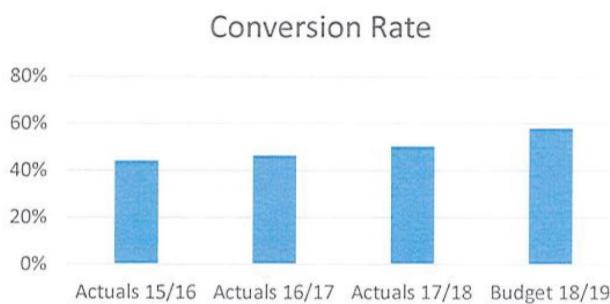

Verify +£3.1m Income driven by 31% volume growth

- Verify volume growth is anticipated to continue at 31% YOY, this is in line with P1-P8 2017/18 performance.
- Growth will be driven primarily by the on boarding of new services, which is handled by Government Digital Service. Improved conversion rate is the other driver, which itself is driven by improved and new data sources.
- LoA2 is still Verify's biggest income driver, contributing 93% of Verify income since LoA1s launch in Week 20
- LoA1s launch did not have the impact anticipated on LoA2 volumes mainly because DWP (View your state pension) service hasn't migrated away from LoA2 yet.
- Conversion rate has increased YoY from 46% to 50% and is expected to reach 58% in 2018/19
- PO remains market leader with circa 40% market share. We will be looking to improve this through marketing in 18/19, with an ambition of 47% during marketing campaigns

	17/18 FYF	18/19 Budget
Net Income	£4.4m	£7.5m

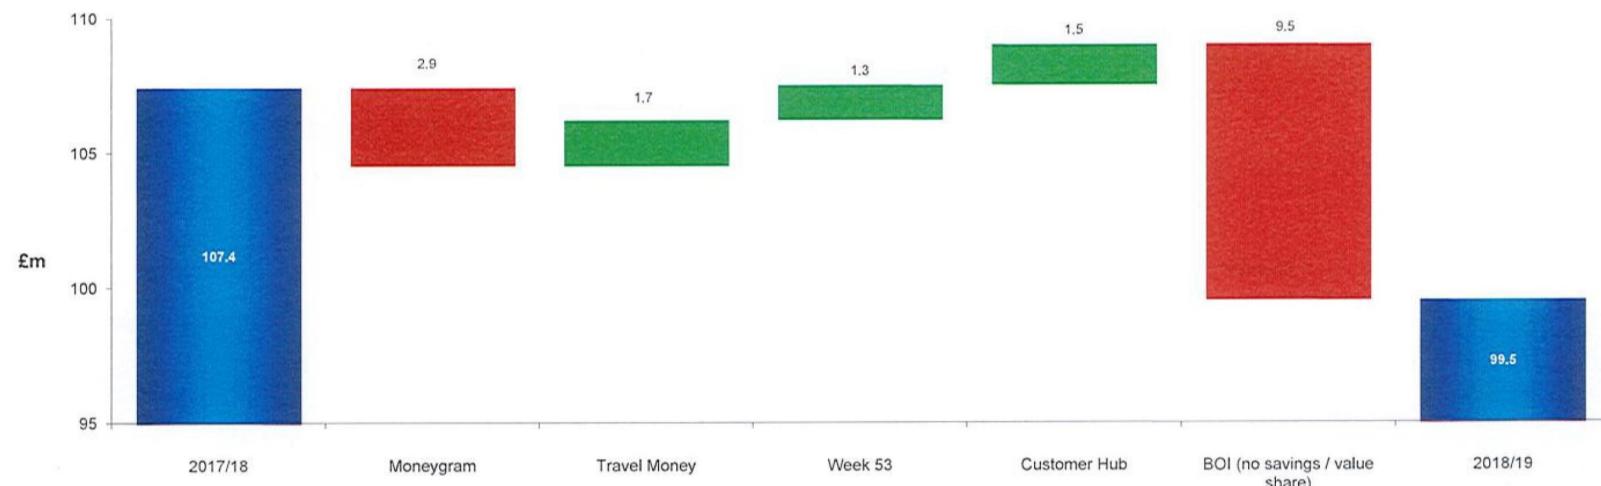

FS&T: £12m growth despite removal of BOI £(11)m and potential risk of Telecom pricing reductions c.£(15)m which have been mitigated

FS&T	371.3	12.2	3.4%	359.1	24.3	7.3%

- **Savings** - £9.5m reduction due to no Bank of Ireland income support not continuing into 2018/19 (Savings value share & no Savings guaranteed income). Negotiations with Bank of Ireland are ongoing. Additional shortfall in other income for £1.5m brings impact to £11m revenue shortfall y-on-y.
- **Moneygram** - decline in volumes anticipated to continue into 2018/19. Our international money transfer contract is up for renewal in 2018/19 and options being explored to mitigate downside risk.
- **Banking Services** - £2m inflationary rate increase and continuing growth in Banking Framework (£7m) and 53rd week (£1m).
- **Telecoms** - Impact of OFCOM pricing £(15)m mitigated by various initiatives (e.g. offering broadband, renegotiating supplier contracts).

Post Office Money: Bank of Ireland Savings and Value Share reductions drive significant year on year reductions

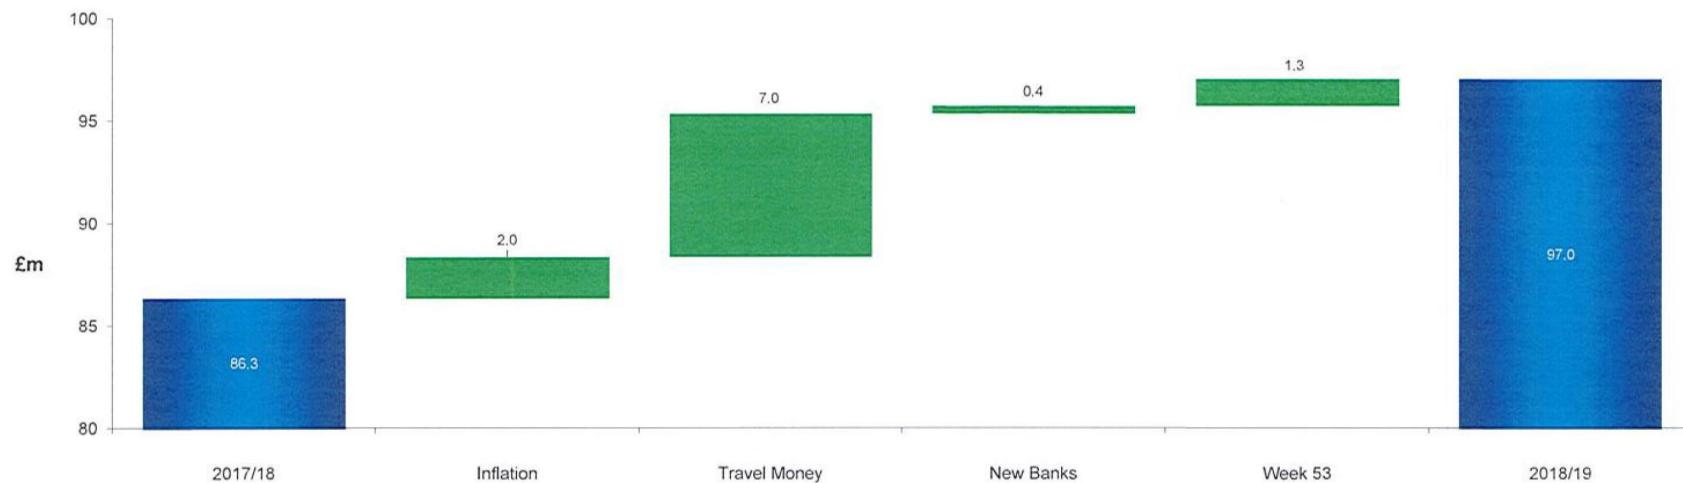

Key Items

- Moneygram year on year decline is a continuation of the current volume and value trends. No uplift included for any potential mitigation through contract renegotiation.
- Travel Money increase is due to higher transaction volumes, albeit at a lower average transaction value following the Anti Money Laundering regulations.
- Customer Hub is anticipated to deliver incremental revenue from the initial product launches.
- The impact of the BOI Income support (value share, guaranteed minimum savings commission) is not continuing into 2018/19. Negotiations with BOI are ongoing. Additional £1.5m shortfall in Other Income brings BOI impact to £11m.

28

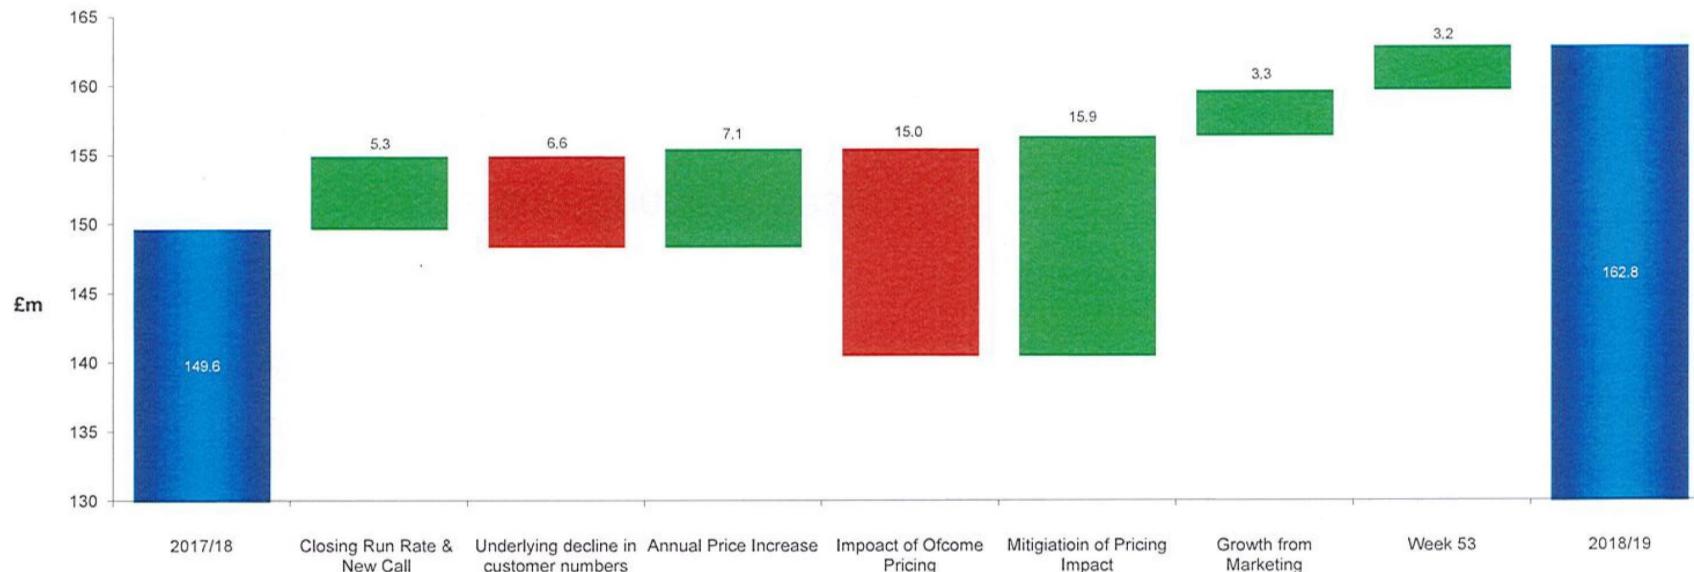

Banking Services: Inflationary increases and continuing growth from the banking framework agreement

Key Items

- £2m Inflation is the impact of the contractual RPI increase (3% assumed) on the rate card which we charge to the banks.
- Growth trends are driven by further bank closures and more customers using the service, including business banking.

£10m growth in Telecoms revenues despite c.£(15)m from Ofcom price ruling

Key Items

- The full year impact of the New Call / Fuel acquisition (completed P4 2017/18) is £3.8m in 2018/19.
- Telecoms numbers, particularly Homephone, are facing underlying decline, with a £(6.6)m impact in 2018/19 offset by £7.1m incremental revenue from the annual price increases.
- Impact of Ofcom price ruling is offset by mitigating actions.
- Incremental marketing activity is driving £3.3m of revenue from additional customers.

Comments

- Net margin remains stable at 87%.

Retail

- Retail reflects the new WHS contractual arrangement and assumes a sales uplift of 40% due to new fit out and product range.
- c.£3m reduction in revenue and cost of sales (minimal EBITDAS impact) as we move to recognising commission only.

FST

- Growth driven by Telecoms at lower margin impacts overall POL position.

Cost control maintained but planned investment in marketing and POMS growth plan

Expenditure by Cost Area

* Adjusted to include release of Growth Fund in 2017/18

Agents Pay

- Reduction in agents pay with simplification savings offsetting incremental costs from changing network shape. Changing revenue mix drives year on year improvement.

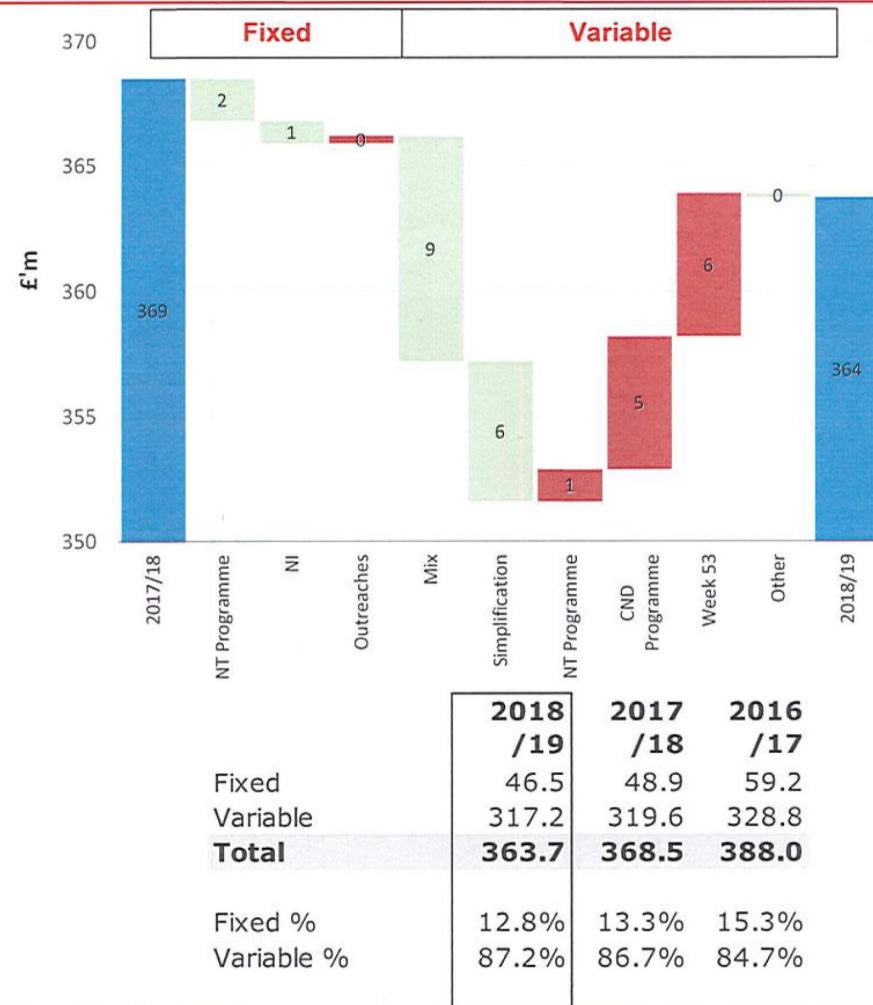

Staff Costs

- 3.0% payrise assumption impacts by c.£5m partially offset by £3m pension saving.
- £8m benefit from franchising DMB network (offset by increase in agent pay)
- £4m Incremental investment to fund skills gaps identified.

Non Staff Costs

- Marketing and growth spend, including a £10m growth fund (2017/18 estimated to be c.£5m) and £5m of incremental marketing year-on-year.
- Significant IT cost reductions of c.£9m.
- Increase in regulatory costs from POCA monthly statements £6m

Agents Pay: Reduction of £5m from £369m to £364m despite increased revenue volumes and additional trading week

Movements

- NT conversions planned for next year include 70 locals and 30 mains. Fixed cost savings expected to be c. £1.3m
- National Insurance will continue to fall in line with the network transformation, but at a slower rate as we convert contracts from a C2I basis to C2C
- Trading mix – £9.0m reduction in government (POCA) and lottery variable costs
- Savings from simplification broadly offsets the incremental cost from changing the network shape through further franchising.
- Variable costs are now 87.2% of overall agent spend as we continue to move from fixed to variable.

Agents Remuneration – YOY By Pillar

Total Agents Rem	368.5	363.7	(4.8)			

- Mails – agents remuneration increasing less than income as it includes £5.0m of simplification
- Government Services – agents remuneration reduction led by passports (-31%) YOY and anticipated loss of UKVI contract
- Payment Services – agent remuneration reduction led by reduction in rates due to contract renewals.
- Retail & Lottery – reduction in agents remuneration driven by decline in Camelot volume, increase in gift card remuneration based on 10% expected growth.
- FS&T – Agents remuneration falling faster than income led by mix, driven by Moneygram & Banking Services volumes.

The £46.5m fixed agents remuneration budget is built from £23.7m community costs, £7.1m of income related Mailwork costs and £15.8m from hard to place branches.

The £15.8m associated with hard to place branches is the future focus for cost reductions to fixed agents remuneration.

Fixed agents remuneration is decreasing £2.4m YOY to £46.5m

ND/NT conversions planned for next year include 70 locals and 30 mains. Fixed cost savings expected to be c. £1.7m

Planned to increase wage cost for outreaches by 10% in H2 18/19 (£0.3m), this is due to a pay freeze since 2013

National Insurance will continue to fall in line with the network transformation, but at a slower rate as we convert contracts from a C2I basis to C2C

Wages and Salaries

- Includes 3% payrise assumption impact c£5m.
- Incremental investments of c£4m to fund skills gaps currently identified in the organisation. £2m incremental support for Marketing heads.
- £1m increase in Central Staff costs due to payrise partially held centrally awaiting final decision.

Pension

- £3m reduction following the removal of the 1 year uplift in contributions following the closure of the DB scheme.
- Pension autoenrolment has limited impact in the current year.

Bonus

- Budget for STIP and LTIP consistent with current year.

Employers NI

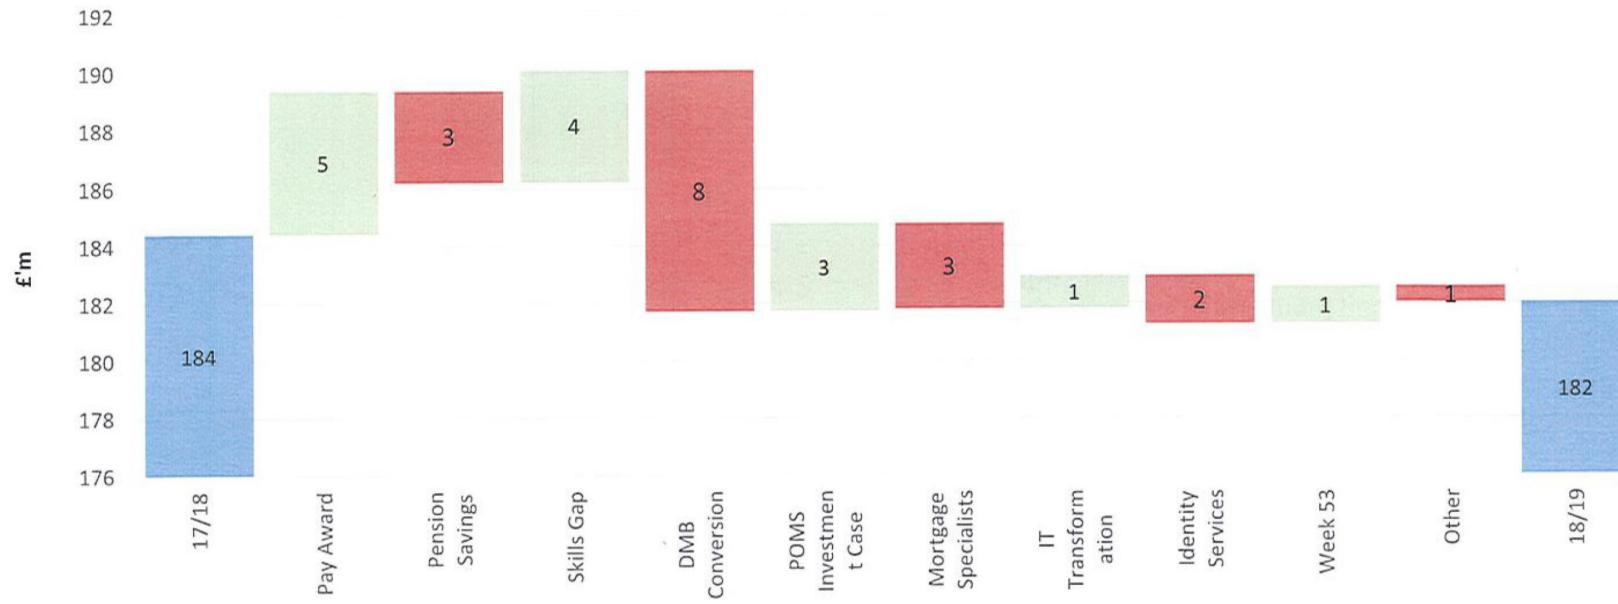

- Benefit from Network Transformation (Costs moved from Salaries to Agents Pay).

Efficiency

- £4.6m efficiency target to be identified in budget and detailed planning (primarily Finance & Ops).

£2m decrease in staff costs to £182m.

- **Pay award** at 3% c. £5m impact
- **Pension Savings** of £3.2m following removal of 1 year uplift in 2017/18 following the closure of the Defined Benefit scheme.
- **Skills Gap Investment** £4.0m to support Retail £1.4m, Digital Capability within FST £1.1m, F&O £1.0m for Supply Chain (revised structure post OSOP) and LRG £0.5m for compliance team currently not resourced.
- **DMB Conversions** savings of £8m (offset by incremental agents pay £6m)
- **IT** £1.0m to bring security team inhouse as part of continuing IT transformation programme.
- **POMS** £3.3m investment in POMS heads to support the investment business case.

Total	283.8	276.0	(7.8)

Consultancy & Advisory Costs

- Incremental contractual costs as part of the Bank of Ireland agreement.

Brand and Marketing

- £4.7m increases in marketing includes:
 - £4m to support POMS growth plan
 - £2m support for customer hub
 - £(1)m reduction driven by customer insights
- Additional £5m increase in Growth Fund (Other Operating Costs) supports overall investment.

IT and Infrastructure

- Continuing cost savings from the IT transformation programme.

Other Operating Costs

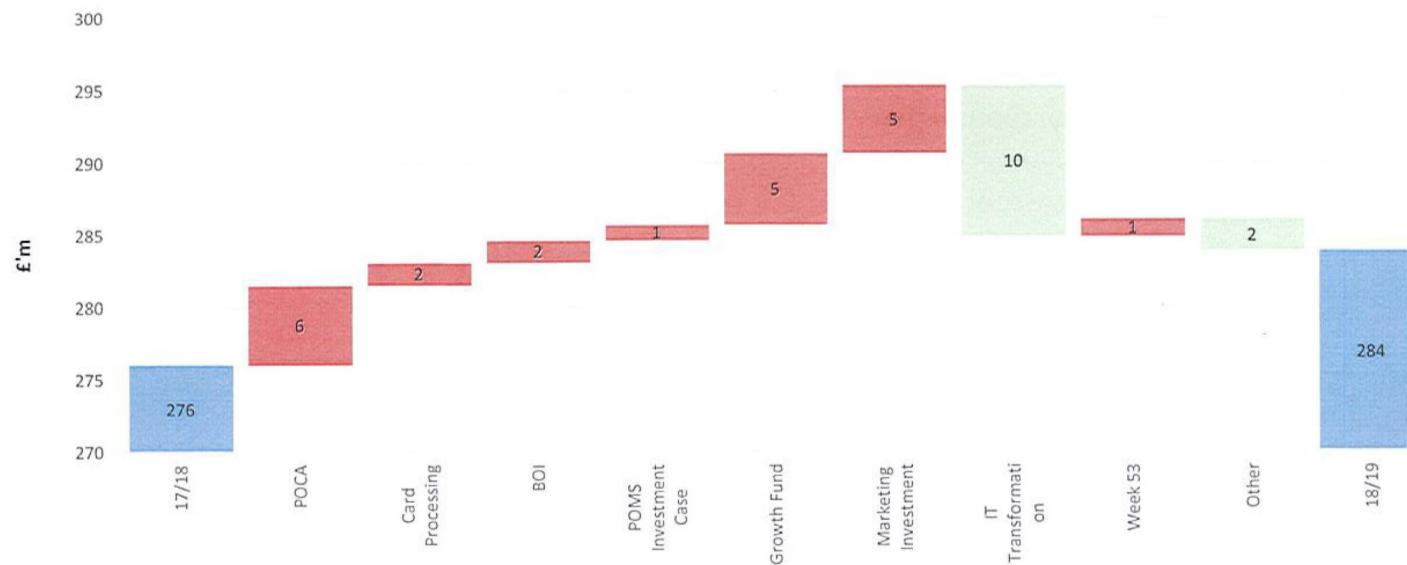

- Significant increase driven by POCA regulatory requirement to deliver monthly statements £6.3m

Growth Fund

- Growth Fund currently maintained at £10m in 2018/19 (2017/18: c.£5m).

Non-staff costs increase £8m, but includes significant marketing investments, support for POMS investment case and regulatory increases from POCA statements.

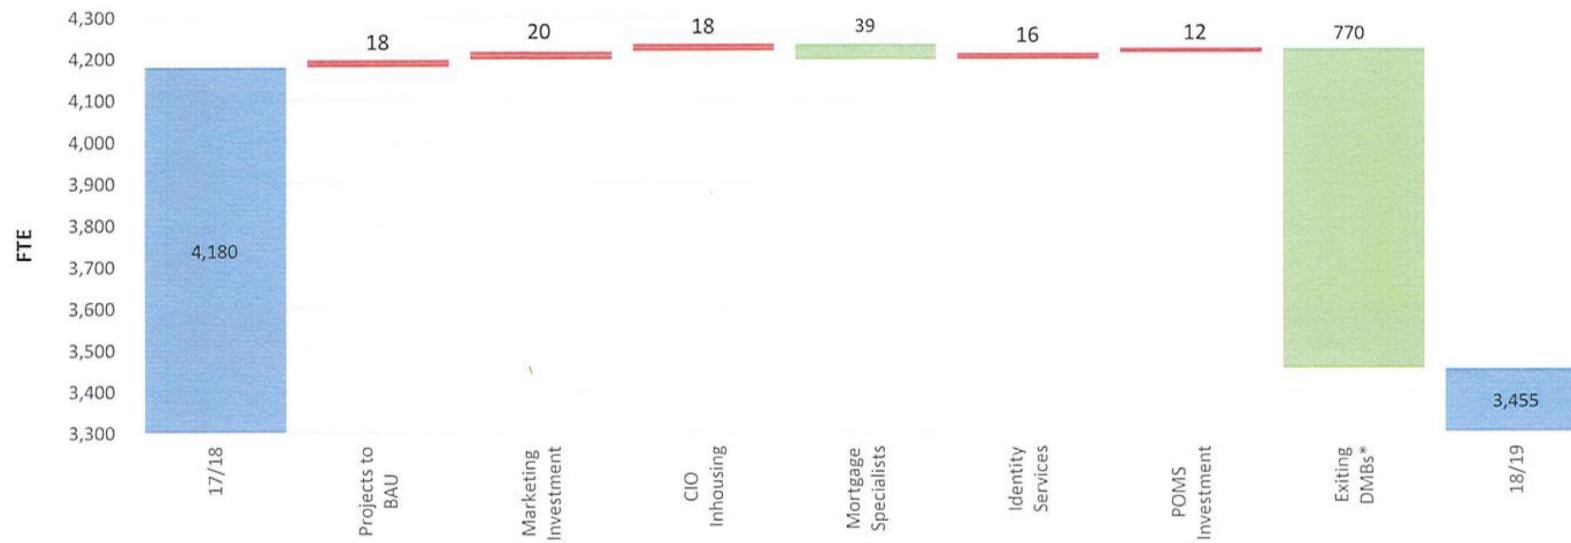

- **POCA** costs of £6.3m following the requirement to deliver monthly paper statements and technology refresh.
- **Marketing** increase to support POMS investment growth plan, customer hub and incremental Telecoms volumes. Growth fund held at £10m (£4m challenge to reduce gross marketing increase).
- **IT Transformation** continuing significant cost savings from the IT transformation programme.

FTE reductions driven by continuing programme to exit DMB's via franchising and temporary operators

Some planned investments in the year;

- c.18 heads identified as currently being project funded and moving to BAU
- Marketing increase to support POMS investment growth plan and move to digital capabilities. Current marketing is under resourced.
- CIO continue to reduce overall cost base by in housing activities.
- Removal of mortgage specialists reduces FST headcount
- Investments to support Identity Services growth and POMS

POMS – Exec Summary

18/19 will see POMS continue its transition. We will leverage developments delivered in 2017/18 and increase investment in product, pricing and direct sales capability. Each will deliver benefits in year and provide a platform for long-term growth. We will bring the transformation of a new Home insurance model.

- POMS has 3 strategic objectives:
 - Business Operating model designed for customer – led growth
 - Distinctive customer offer
 - Scalable customer management and distribution engine
- Our business operating model has evolved rapidly with Travel and Protection businesses being re-engineered generating £5m of additional revenue from 16/17 to 17/18 after absorbing the losses arising from the removal of Financial Specialists
- It includes a number of new and previously untested initiatives which are forecast to achieve in year payback. The bottom line impacts of these will be proactively managed through a series of test and learn activities with focus on hitting the EBITDA target
- We will continue to organise the business to capitalise on the capabilities delivered by Project Zeus (Policy Admin Platform) and Hera (Protection business model) as well as commence the development of a replacement Home insurance business model
- Together with the development of our new Home insurance model, the investments support our growth ambitions and drive revenue and group EBITDA contribution to £77.3m and £41.1m respectively (up 89% and 103% compared to 2017/18) by 22/23 whilst maintaining our group contribution of £20.3m in 18/19.
- As a result of proposed CAPEX spend a further capital injection will be required to ensure sufficient regulatory capital is maintained (£5m in 18/19, £2.5m in 19/20)
- The submission aligns to the POMS 5 year growth plan

POMS – Net Income Trajectory

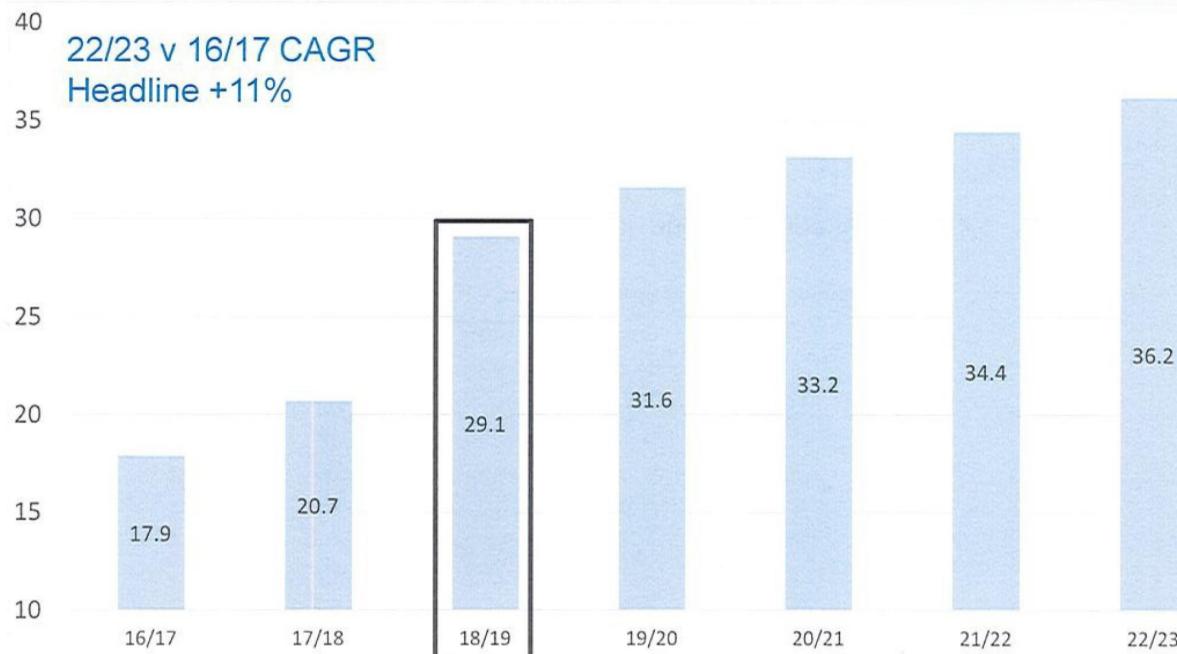

- POMS has faced trading headwinds from the loss of Financial and Mortgage Specialists.
- Underlying income growth between 16/17 and 18/19 is +42%
- New Home model delivers 50% improvement in home margin from H2 19/20
- Underlying portfolio growth delivers increased re-occurring income from 19/20
- Optimised marketing investment and pricing supports on-going growth throughout the planning period
- Improved CVM generates £2.5m of income in 19/20, rising to £11.8m in 22/23

*Net Income is commission income and profit share less Cost of Sales (predominately aggregator costs)

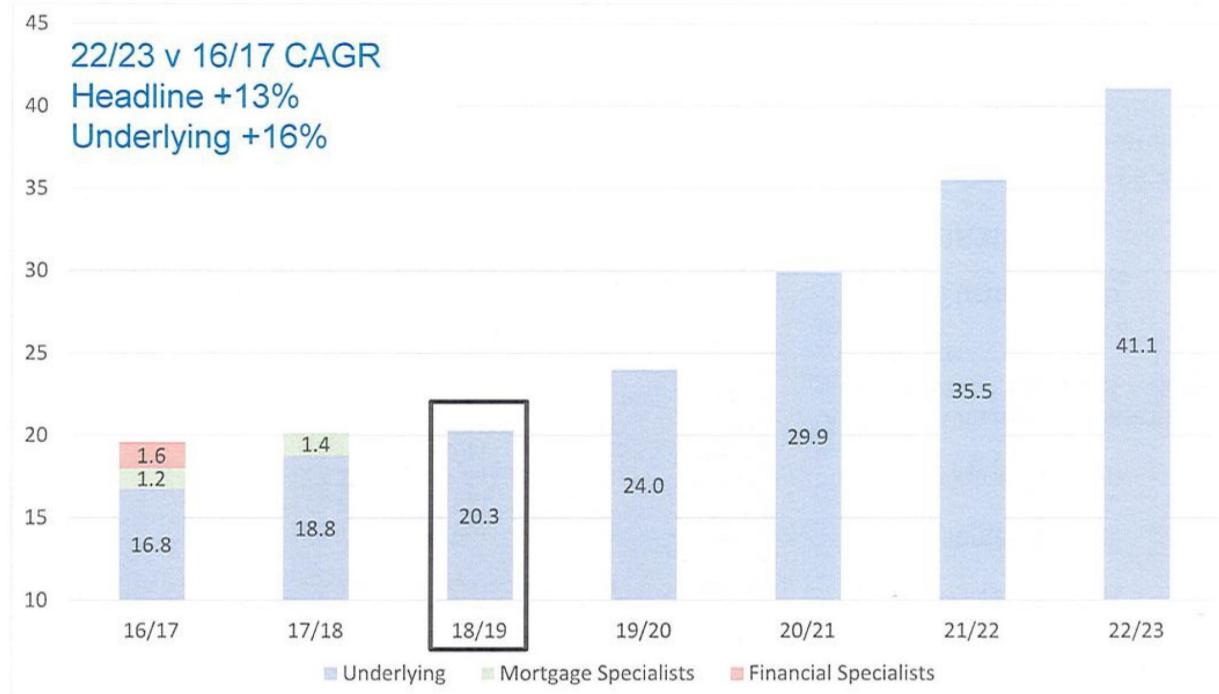

POMS – Operating Costs Trajectory

- Operating costs increase by £8.4m (+41%) 18/19 versus 17/18. This represents the investment in business capability and marketing
- Cost growth beyond 19/20 (post launch of new Home model) is 5% PA

POMS – Group EBITDA Trajectory

- Underlying EBITDA growth between 16/17 and 18/19 is +21% during a year of transition.
- Post the migration of Home from BGL in September 2019, EBITDA growth is driven by CVM and margin enhancements from the new model

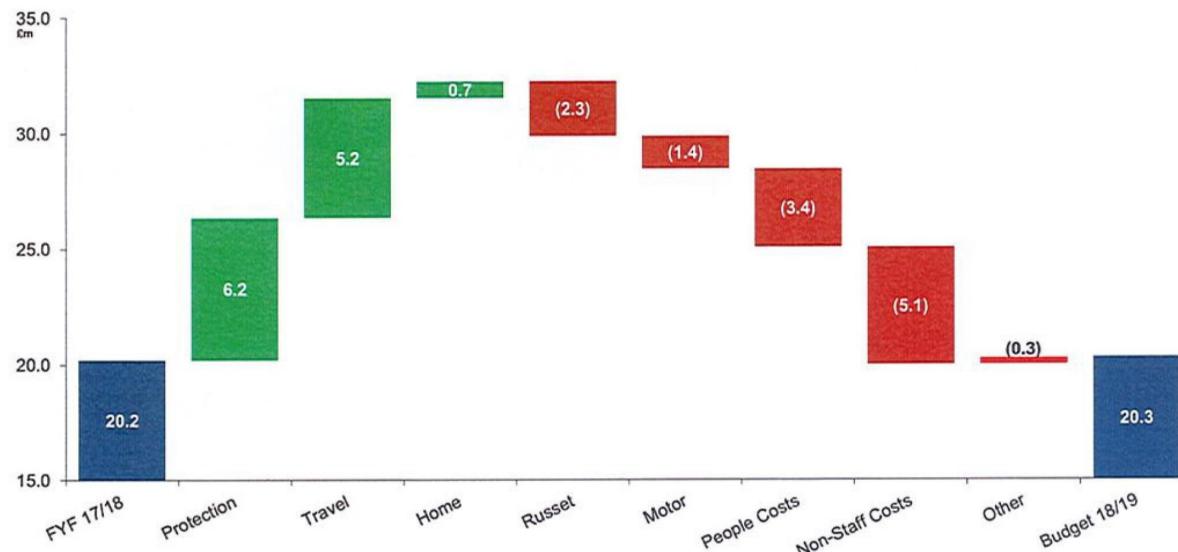

POMS Budget Submission Summary

£m	2018 / 19 Budget Summary					
	2016/17		2017/18		2018/19	
	Act	5+7	FY Budget	£m	%

Other Operating Costs	(9.4)	(9.4)	(9.7)	(0.3)	(4%)	
Non-Staff Costs	(14.6)	(16.5)	(21.5)	(5.1)	(31%)	
Operating Costs	(17.9)	(20.7)	(29.1)	(8.4)	(41%)	
Group EBITDAS	19.6	20.2	20.3	0.1	0%	
POL Commision & MSA	(11.8)	(12.7)	(15.6)	(2.9)	(22%)	
POMS EBITDAS	7.8	7.5	4.7	(2.8)	(37%)	

- Group EBITDA is held flat with investment driving revenue growth and returns in future years.
- Net income is +£8.5m with growth driven by:
 - Protection +£4.0m
 - Travel +£5.2m
 - Home +£0.7m
 - Motor £(1.4)m
- Post Offices investment in a number of initiatives supports delivery of increased revenue:
 - Customer Hub
 - CRM's
- People Costs are +£3.4m due to higher head count with investment in marketing and underlying capability.
- Non-Staff costs are +£5.1m due to marketing costs +£4.2m.
- Business acquisition and new product solutions remain under consideration and offer further growth potential

EBITDAS in line with current year but investment of £8.5m to support longer term growth.

- Protection income growth is driven by a combination of improved margin, expanding distribution (Aggregators and DRTV) and new product initiatives (Easy Life)
- Travel income growth is driven by additional marketing activity (including investment fund initiatives) coupled with distribution, product and pricing actions
- 22 new hires in the year of which 10 are dedicated POMS staff in Post Office marketing team
- Non-staff costs are driven by increased marketing costs (+£4.2m)

POMS Resourcing Plans

The submitted budget includes 22 new hires (10 Marketing and 12 POMS)

10 Dedicated POMS Central Marketing Staff (£0.7m).

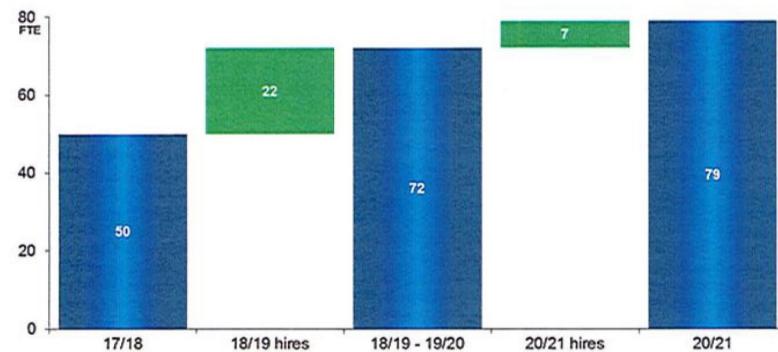

These staff allow POMS to deliver budgeted revenue (campaign delivery). The staff are split into Digital Optimisation, SEO and CVM / Lead capture. These staff will generate revenue with a life time value of £2.9m in 18/19

The POMS resource (annual cost £1.2m) is made up of:

- 4 Pricing – for Travel and Home, pricing optimisation
- 2 Marketing Analysis and Marketing Executive, 1 role held over from 17/18
- 2 CVM – data analytics, cross product holdings etc.
- 2 MI – dedicated POMS MI team, current model not fit for purpose
- 1 Customer Proposition Manager (Product)
- 1 Finance / Ops – focus on Duck Creek controls / recs

7 hires are in the plan for 20/21, then no further hires are anticipated.

Resourcing

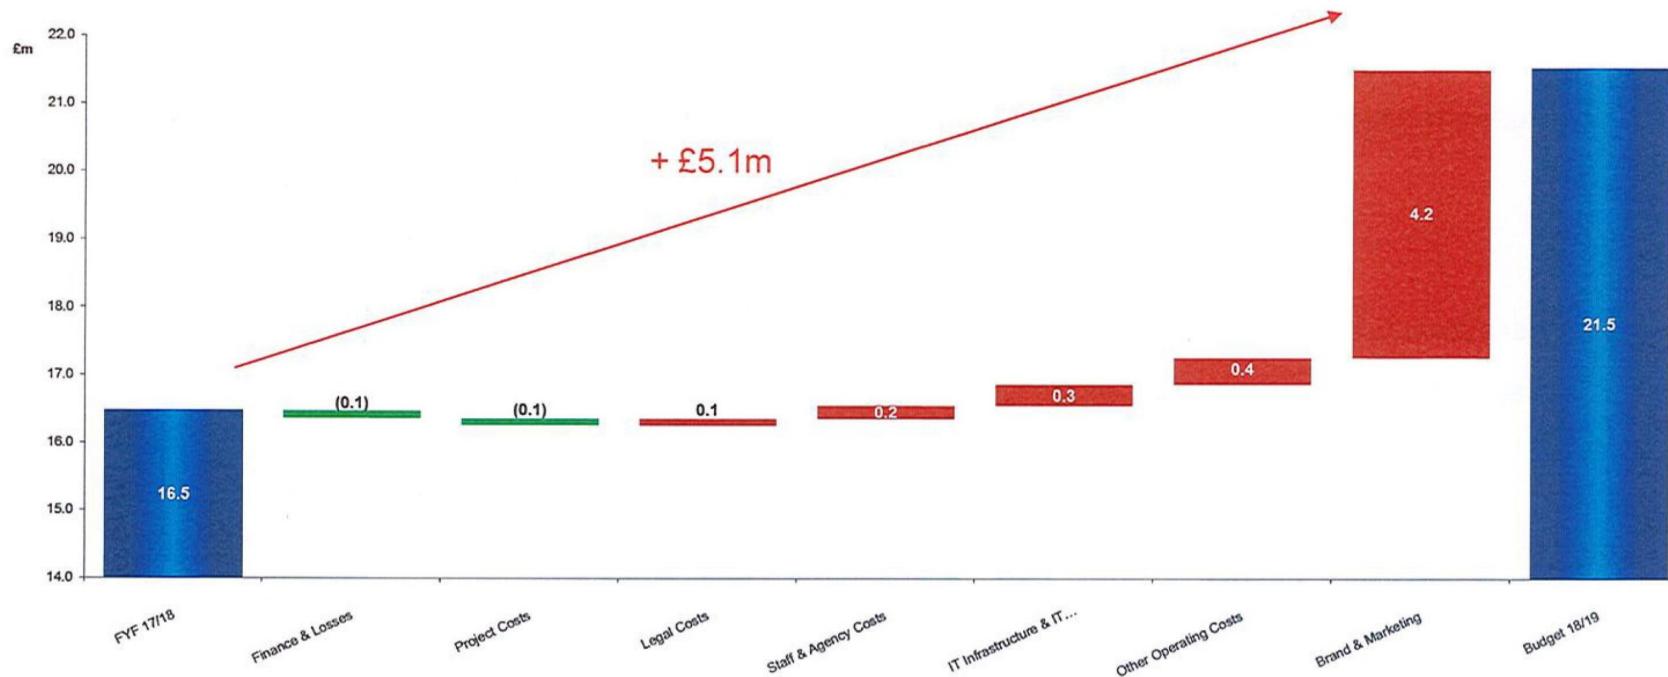

Costs

POMS Non Staff Costs – YoY Movement

Key Items

- Total year on year increase is £5.1m of which marketing is £4.2m. Increase supports revenue growth of 21%, see next slide for full analysis of spend.
- Other Operating costs and IT are volume related variable costs.

POMS 18/ 19 Marketing Costs

£000s

	Branch	Direct		Channel			Var vs 17/18
		Mail/EDM	Search	Web	Expansion	DRTV	
Travel	455	25	1,009	465	1,369	3,323	1,712
Over 50s	45	150			30	1,380	1,605
Life	200	25	200	510	650	1,585	1,018
Car	20	409	60			489	(151)
Home	25	353	60			438	116
Minor Products	22		75			97	133
	767	962	1,404	975	2,049	1,380	7,537
							4,245

Key Items

- Branch – covers in-branch leaflets and application packs along with campaign collateral for Travel and Life.
- Direct Mail / EDM – regular GI renewal mailings, plus 121 activity across Life and Travel and any costs associated with lead-capture not already covered in the project.
- Search – included branded search, generics and SEO investment.
- Web – non-search media costs for display and social, conversion rate optimisation.
- Channel expansion – building on learnings from 2017 up-weighted marketing investment to support growth plan including test and learn.
- DRTV – this spend is subject to the results of the test and learn activities in Q4 17/18

The budgeted change spend for this year is £255m

Strategic Priority	Forecast
Simplify the retailer proposition	£55m to £65m
Build innovative, flexible and secure IT	£80m to £90m
Modernise our products and services	£70m to £80m
Digitise and optimise the business	£15m to £20m
Modernise our skills, culture, HR policies and processes	£4m to £6m
Regulatory & Group Litigation Costs	£11m to £14m
TOTAL	£235m to £275m

The anticipated spend profile is:

The following projects deliver in year benefit and are key to delivery of 2018/19 budget target

Strategic Priority	2018-19 Investment	In-Year Benefit
Simplify the retailer proposition		
- Further franchising DMBs	£22.8m	£1.6m
- Network Expansion	£18.7m	£2.0m
- Multi-year Crown Projects	£17.9m	£8.1m
- Self Service Kiosk Rollout	£2.0m	£0.1m
Build innovative, flexible and secure IT	£33.8m	£7.3m
- Branch Printer Replacement	£3.6m	£0.5m
- CDP re-procurement	£1.4m	£0.5m
- EUC Branch Deployment	£6.4m	£0.6m
- HNGT Lite	£1.8m	£0.9m
- PCI/Payments Hub	£2.5m	£0.2m
- Project Everest – Cloud enablement	£15.2m	£4.0m
- Project Nelson	£2.5m	£0.5m
- Software Asset Management	£0.4m	£0.1m
Modernise our products and services	£19.7m	£17.1m
- POMS Investments	£11.3m	£4.6m
- Project Galaxy	£4.8m	£11.6m
- Falcon – Travel Hub	£3.6m	£0.9m
Digitise and optimise the business	£0.3m	£3.5m
- Success Factors Ph1 Completion	£0.3m	£3.5m
Modernise our skills, culture, HR policies and processes	£6.0m	£0.5m
- Back Office Transformation	£6.0m	£0.5m
Group Litigation (Group Litigation costs will be reported as exceptional spend and will not impact EBITDAS.)	£9.0m	(£9.0m)
TOTAL	£130.3m	£31.2m

Further key investments required to secure the current income stream (income protection) or contribute to the future profitability beyond 2018-19.

Strategic Priority	2018-19 Investment	NPV
Simplify the retailer proposition	£6.0m	
- Agents/Postmasters Portal	£6.0m	TBD
Build innovative, flexible and secure IT	£20.5m	
- Full Thin Client Deployment (Solar Full)	£9.0m	TBD
- End-of-Life Replacements	£4.0m	TBD
- Risk & Resilience	£7.5m	TBD
Modernise our products and services	£46.7m	
- Identity Services Investment	£11.4m	£25.5m
- Banking Framework – Future of Cash incl. vehicles	£10.0m	£1.1m
- Mails Projects	£8.0m	£3.5m
- Falcon – Additional Verticals	£11.3m	£13.0m
- Property	£6.0m	TBD
Digitise and optimise the business	£15.5m	
- Enabling supply chain and back office improvement	£12.0m	£2.0m
- Project Arrow (BI Strategy)	£3.5m	TBD
Regulatory & Group Litigation	£4.0m	
- GDPR	£4.0m	(£4.0m)
TOTAL	£92.7m	(£17.2m)

- 3 Income
- 4 Margin
- 5 Costs
- 6 FTE
- 7 POMS
- 8 Risks and Opportunities
- 9 Capital and Investment Spend
- 10 Cashflow and Headroom

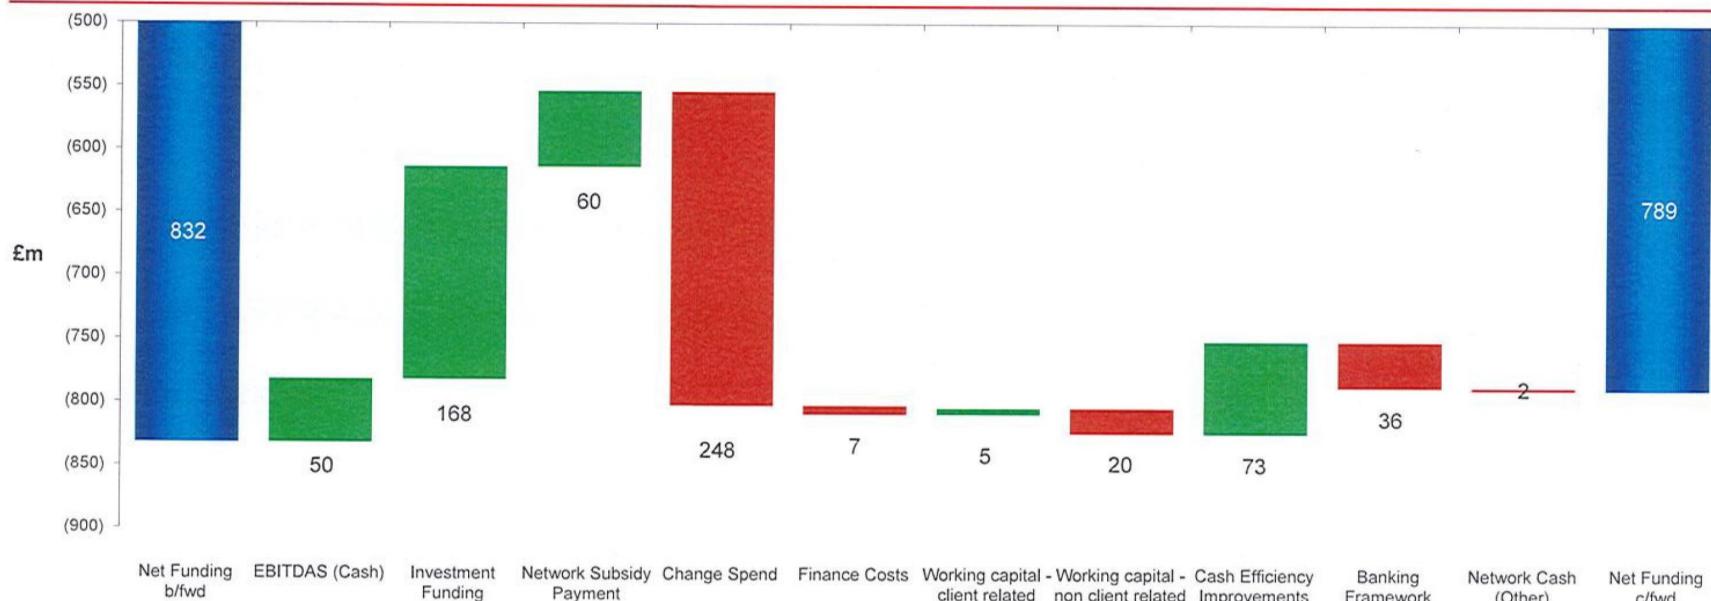

Headroom held at >£200m at month end but is likely to breach intra month during Christmas trading

- The current budget on cash includes the following assumptions:
 - Government funding will be drawn down on a quarterly basis in line with the proposed spending pattern.
 - Banking Framework is assumed to require an additional £36m of cash in the network (future of cash paper is still in development)
 - Branch holdings are reduced down to £450m by end of year. 2017/18 average ytd is c.£550m.
 - Cash centre balances are held at current levels (subject to seasonal fluctuations)
- Change spend at £255m is offset by government funding of £228m (Subsidy: £60m and Change: £168m).
- EBITDAS of £50m will fund movements in working capital, finance costs and continuing pay down of provisions.

Cash Efficiency improvements and EBITDAS generation will drive reductions in Net Funding Position

- The current budget on cash includes the following assumptions:
 - Government funding will be drawn down on a quarterly basis in line with the proposed spending pattern.
 - Banking Framework is assumed to require an additional £36m of cash in the network (future of cash paper is still in development)
 - Branch holdings are reduced down to £450m by end of year. 2017/18 average ytd is c.£550m.
 - Cash centre balances are held at current levels (subject to seasonal fluctuations)
- Change spend at £255m is offset by government funding of £228m (Subsidy: £60m and Change: £168m).
- EBITDAS of £50m will fund movements in working capital, finance costs and continuing pay down of provisions.

Balance Sheet

EBITDAS	152.3	154.2	1.8	2.2	152.0	0%

*Includes total staff costs for Mails, Retail and Lottery

Mails EBITDAS is up £4.8m YOY to £157.2m

- Despite contractual reductions of £4m, Mails net income is +£12m YoY due mainly to RPI (£7.7m), now confirmed at net 3% (RPI-1%) and benefit of 53rd week (£5.4m).
- Excluding these benefits, underlying income and EBITDAS are flat, reflecting the change in mix (fewer letters, more parcels)
- Variable Agents Pay is +£7.5m on 17/18, of which £3.3m relates to the 53rd week. The balance reflects the move from fixed to variable costs resulting from DMB closures and change in agent contracts.
- Staff costs are +£0.2m on 17/18 due to personnel transferring from projects back to BAU.
- IT costs reflect inclusion of £0.1m for ongoing maintenance of Drop & Go.
- Favourable £0.5m variance in Other Operating Costs is due to a one-off loss (fraud) on Parcelforce in 17/18.

Retail

£m	2018 / 19 Budget Summary - Retail					
	2017/18	2018/19	FY Budget vs 17/18	Week 53	2018/19 Budget adj for 52 wks	Adjusted Budget vs 17/18
	FYF	FY Budget				
Gross Income	7.9	4.4	(3.5)	0.2	4.2	-47%

Expenditure	0.5	0.3	0.2	0.0	0.3	41%
EBITDAS	3.2	2.9	(0.3)	0.1	2.8	-13%

*Staff costs included in Mails P+L

Retail EBITDAS is down £0.3m YOY to £2.9m

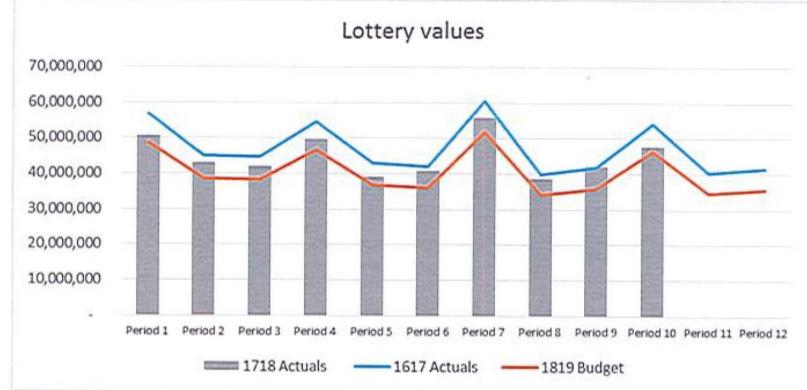

- Budget income reflects the new WHS retail contract whereby stock is owned by WHS and commission is earned on sales revenue. Additionally there is a direct contract with Royal Mint for the sales of coins within DMB's
- Closure of DMB's results in -£0.7m net income decline however is partially offset by WHS contract which provides a +£0.3m uplift.
- Direct costs (cost of sales) reduce by £1.3m due to the change in the Retail contract. £1.1m direct costs relate to purchase of Royal Mint coins.
- YoY non staff costs decrease by £0.2m due to procurement costs no longer required going forward.

Expenditure	25.1	24.1	1.0	0.4	23.7	6%
EBITDAS	11.2	10.7	(0.5)	0.2	10.5	-7%

*Staff costs included in Mails P+L

Other Retail & Lottery EBITDAS is down £0.5m YOY to £10.7m

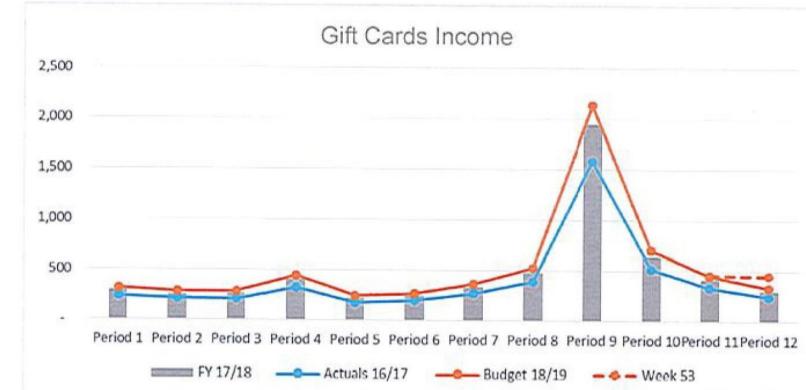

Other Retail

- Gift Vouchers +£0.7m - Continues to grow +10% YoY above overall market growth (5% in 2016).*
- There is a predicted slowing of growth compared to 17/18 in Gift cards due to Amazon's departure.
- Photo-booth revenue is also reduced due to the closure of DMB's and the move onto a lower tier of commission payments

Lottery

- Variable -£1.8m - 8% decline on Camelot sales based on prior two year average trend.
- Fixed Fee – No change for 2018/19.
- The fixed fee for Camelot is assumed the same but is subject to a new mechanism based on our success in audits of prize payout tickets.

Net Income	58.0	58.0	0.0	1.1	56.9	-2%
Variable Agents Pay	25.9	25.4	0.5	0.2	25.2	2%
Staff Costs	0.9	1.2	-0.3	0.0	1.2	-28%
A Non-Staff Costs	13.5	15.1	-1.6	0.0	15.1	-12%
Expenditure	40.4	41.7	(1.4)	0.2	41.5	-3%
EBITDAS	17.7	16.3	(1.4)	0.9	15.4	-13%

Payment Services EBITDAS is down £1.4m YOY to £16.3m

- HNGT lite benefits £0.3m & new opportunities of £0.5m are offsetting underlying declines in the payments market, direct clients at (8)% and resellers at (6)%.
- POCa accounts decline impacts ATM performance by 3.5m withdrawals, this is partially offset by planned improved availability to 96%.
- Staff costs increasing with investment of 4 new roles, 2 x bill payments, 1 x non cash & 1 x ATMs.
- Non-staff costs increases from card processing costs led by UK cash converting to card at a rapid rate and effective rate increases.

A Payment Services & ATMs EBITDAS not representative as Non-Staff Costs include companywide card processing costs; 2017/18 at £11.3m, 2018/19 at £12.9m.

Loans Initiatives					
Other Var					
18/19 B					

1. Significant growth in personal loan volumes

- Improved risk appetite by Bol which has led to increased volumes
- Enhancement to the customer journey including funds available to customer next day
- Loans income projected to increase from 17/18 of £0.5m to 18/19 budget of £0.8m

2. Poor performance in credit cards

- Bol risk appetite continues to be limited
- Poor profitability resulting in the likely loss of the profit share for the foreseeable future

FS&T Contribution	34.5	42.0	(7.5)	43.7	1.6

1. Strong performance in 17/18 under Value Share

- Cost of funds (NIM) reduced significantly, supported by Bol wholesale funding activity and November's base rate increase
- Balances expected to reach £14.5bn target by year end

2. Expiry of Value Share

- Agreement ends in March, with broader negotiation aiming to replace it with an overall value share
- Current £39m budget income figure represents the likely outcome based on the current FSJVA model

* Submitted 18/19 budget less distorting double count of Customer Hub income with POMS £1.5m

Income and costs

- Increase of HMRC Fee from £115-£130 per Branch

Risks & Opportunities

- Strengthening/Weakening of sterling
- Brexit Negotiations
- Delay in launching customer hub capabilities
- 1% growth/decline in travel market impacts £14M in branch turnover

Change Activity

- Customer Hub, eKYC, Combined Journey on TMO (currency and card)

Strategy & Market

Economic uncertainty and rising inflation are putting pressure on consumers' holiday finances. GDP is forecast to grow by 1.4% in 2018 but is slowing.

The Travel Market is expected to remain flat and Consumer confidence is at a low ebb of -13 (post Brexit it was -12).

Consumers continue to be price conscious so online and TMC are expected to grow whilst on demand sales will fall by 5.7% due to reduced footfall and new AML thresholds

Income and cost

- Travel Money increases 12% yoy, of which 5% is due to Customer Hub
- Contribution is impacted by agents pay increases due to higher turnover

Constituents of income

On Demand	13,619,161
Pre Order	521,834
Click and Collect	980,000
Home Delivery	0
TMO	687,190
Euro on Demand	400,000
TMC New Cards	1,901,528
TMC Top Ups	1,681,250
Total Variable Fee	19,790,963
Customer Hub	1,355,000
Fixed Fee	10,000,000
Total income	31,145,963

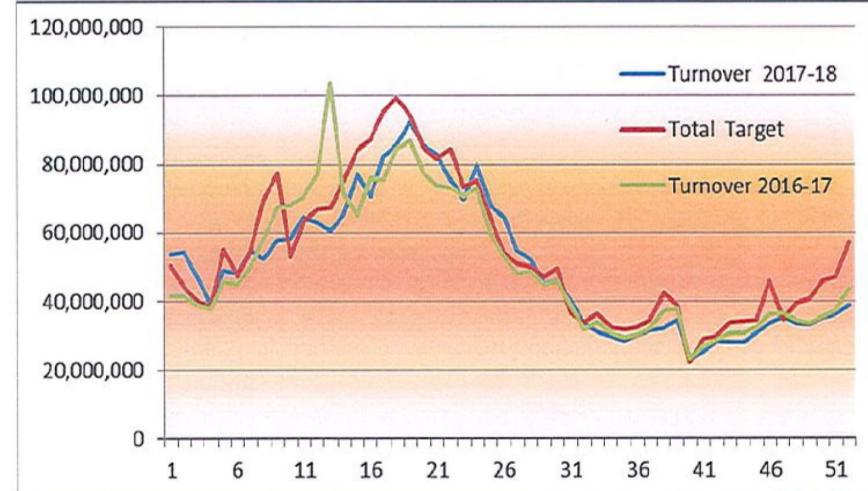

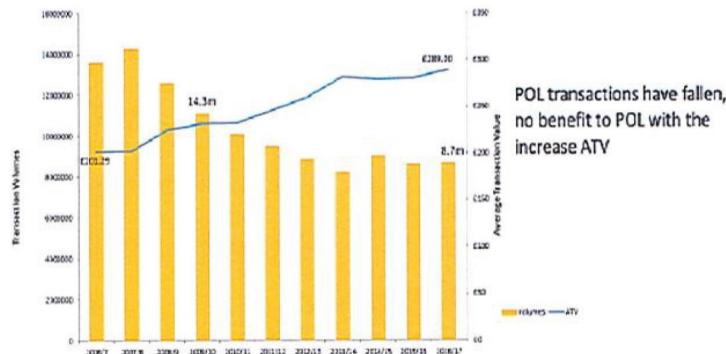

Travel Money & FRES: Volumes and transactions

Revenue £k	18/19 B	17/18 9+3F	Var
TMC	1,902	1,600	19%
TMC Top Ups	1,700	1,300	31%
TMO	1,699	1,352	26%
Network	14,458	13,900	4%
Fixed Fee	10,000	10,000	0%
Customer Hub	1,380	0	
Total Travel Money	31,139		

This revenue table is representative of the following considerations:

- On Demand sales/buys decline of ~5%
- TMO + 9%
- TMC +20%
- Footfall decline and switch from notes to TMC
- Increase in sales/buy transaction fee £1.99 from £1.92
- Travel market growth of 1%
- New AML eKYC ID&V requirements
- Reduced impact of Easter ie early 2018/late 2019
- ATV increase of 2%
- Blended product margin of 5.16%

Strategy & Market

Moneygram and Western Union remain the two largest operators of the cash to cash remittance market however digital providers continue to penetrate and grow marketshare. New AML regulations that came into effect in 2017 and the continued uncertainty over Brexit and the strength of sterling is having an adverse affect on both the ATV and number of transactions being conducted

We are currently in discussions with MoneyGram on new agreement terms as our existing contract requires us to confirm the existing agreement extending through to 2021. Alongside these discussions we have engaged an outside consultant to help us better understand the full market picture and capabilities prior to making our recommendations to the GE

2018/19 Budget & YoY (Profit)

We are predicting that the market will see a continued decline in the balance of 2017/18 impacting our forecasted revenues by ~£400k so our 18/19 budget is based off a declining baseline

Return on revenue is expected to decline to just below 50%

Income and costs

Post Office and MoneyGram have a commitment to contribute up to £250k each (£500k) towards joint marketing activity. PO will be taking a more active role in managing these marketing initiatives. (Awaiting Penny confirmation this is sitting in Marketing budget)

MoneyGram have given a short term commitment to fund an increase in remuneration for cash to account transactions to India. This funding supports the postmasters as their remuneration will be the same as a cash to cash transaction. Following a review of these results we will be looking to agree ongoing funding from MoneyGram and expand destinations.

Risks & Opportunities

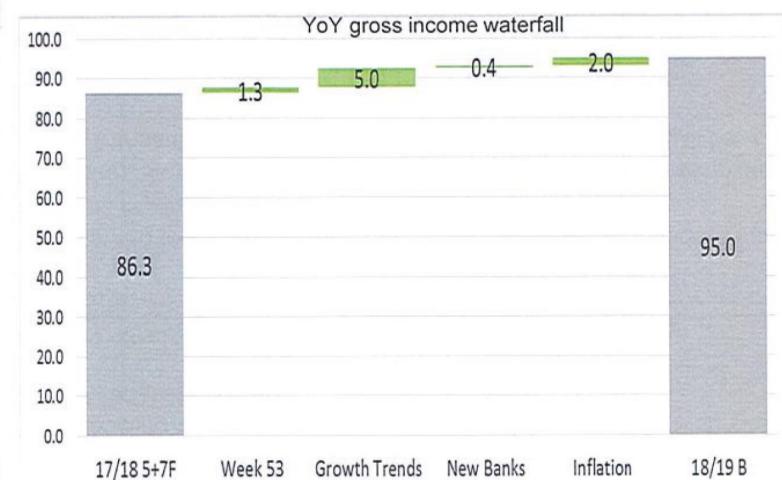

Depending on the outcome of our strategic review, we would expect to improve our financial position through enhanced remuneration from MoneyGram alternatively if we move to an RFP process we will have to increase our oversight of the relationship to ensure that MoneyGram do not divert their resources to the RFP. The RFP process is also expected to impact 18/19 as we do not expect M/Gram to deliver digital capabilities

Opportunity We are working with MoneyGram to develop more direct marketing campaigns in 2018/19 to maximise penetration of existing customer relationships. This focussed approach is also aimed at stabilising the current send and receive RPT.

Banking Services: Income up £8.7m yoy; 10.1%

Project Costs	(0.7)	(0.5)	(0.2)	(0.5)	0.0
FS&T Contribution	64.6	55.2	9.4	56.5	1.3

Key elements

- Versus the 5+7 forecast, gross income is up £8.7m (10.1%), which is £7.4m (8.5%) excluding the 53rd week
- £2m of the growth is due to tier increases in the framework fee due to volume increase which rises from £20.7m to £22.3m, together with £400k RPI increases on transaction rate cards from P10.
- The remaining £5m is due to the ongoing volume increases resulting from Bank closure programmes and increased awareness. Which is an increase of 7.5% on 2017/18 transactional income base of £63.6m
- Agents Pay has reduced YoY by £1.6m to £27.6m versus the £29.3m in the 5+7 Forecast
- Other costs, are broadly flat YoY aside from £150k audit costs.. £180k of marketing was charged to the Development Fund in 2017/18

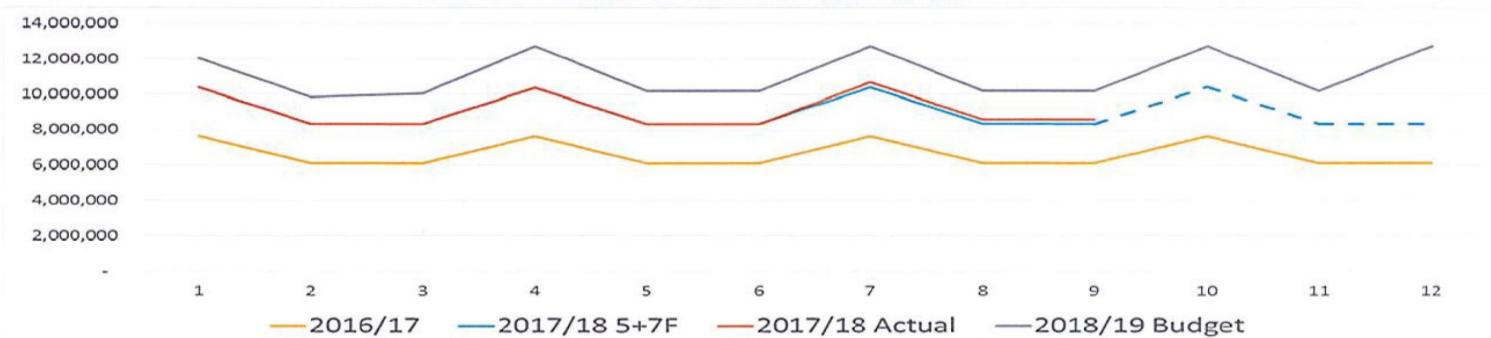

Since the budget was submitted

- Transactional income has exceeded forecast – likely end of 17/18 will be c. 67m vs £63.6m in initial budget.
- Trading in the period since the budget was submitted has been strong, and the expected outcome for 2017/18 is £1.7m better than the 5+7 forecast. The growth in Business Deposits (18.43% in 17/18) is significant, and as a result we believe that there is upside of up to £2m income versus the current submission, most of which is offset by measures to improve the agents' situation, and marketing spend. These are set out in more detail in the following pages.

Banking Services

Total volumes (all transaction types) by period

YoY volume growth	1	2	3	4	5	6	7	8	9	10	11	12	TOTAL

Volumes

- The graph shows the yoy increase on volumes incorporated in the 2018/19 budget submitted in November.
- The trend is in line with last year, rising from 16% YoY in Period 1 to 23% in period 6, after which the volume increases from Lloyds and RBS seen in 2017/18 annualise and growth settles to 19%.
- The large growth in Period 12 is driven by the 53rd week.

FS&T Contribution	36.8	36.4	0.3	35.7

Strategy & Market

- **HomePhone** – Market move by BT £7pm price reduction from 01.04.18. PO implementation of Free Broadband (Galaxy) leads to increased revenue and cost, customer reaction to offer is unknown.
- **Broadband** - Market will remain highly competitive in both ADSL and FTTC*, with competitor mass marketing of high speed FTTH* products
- **Customer Strategy**
 - **Gross Ads** - activity phased in H1
 - Online and Telesales increased focus (69% of total)
 - Branch network flat YoY
 - **Churn** – budgeted reduction from 0.44% to 0.33% per month
 - Call centre retention (51% to 70%) through enhanced call centre availability and agent capability

2018/19 Budget & YoY (Profit)

- +7% YoY gross revenue
- +6% YoY growth in net Income

Income and costs:

- Increased costs in Homephone due to Project Galaxy decision (£7.39 cost now £10.31 blended), partially offset with lower ADSL pricing (~£1pm)
- Price increase planned May '18 (£6.1m in year DPC benefit)

Risks

- £1.0m remaining risk, resulting from financial modelling (£2.4m) and Galaxy COS (£6.5m)
- Project Galaxy assumptions highly sensitive to customer reaction, potential for positive or negative commercial impact
- Mid year price rise subject to competitor pricing changes, PO rise will be reviewed at end Q1 when impact of Galaxy and Q1 trading is known

Postal Orders: Income decline anticipated to continue at a similar rate to 2017/18

Postal Orders

Profit structure (£k)	Volume	Income as % of avg value	Income (£k)	Agents pay (£k)	COGS (£k)	Team (£k)	Contribution
< £5 (£0.50)	242,600	24.3%	121	(700)	(6)	(4)	(589)
£5 - £9.99 (£1.00)	248,758	16.8%	249	(718)	(7)	(4)	(480)
£10 - £99.99 (12.50%)	2,142,532	12.5%	8,138	(6,181)	(57)	(38)	1,862
£100 - £250 (£12.50)	180,317	8.1%	2,254	(520)	(5)	(3)	1,726
Breakage	2,814,206	12.5%	1,538		(75)	(50)	1,413
	5,628,412		12,300	(8,119)	(150)	(100)	3,931

Profit structure

The table above shows a graduated structure for fees depending on the transaction size. For total transaction values in 2018/19 of £186.7m Post Office will take £10.8m fees (5.8%) and take the benefit of the 12.5% of Postal Orders not cashed (£1.5m).

Agents are paid a flat fee per transaction (preparation and encashment), which means that for transaction values less than £10 Post Office loses money. Overall, Post Office contribution is £3.9m after agents pay of £8.1m and other costs of £0.2m. This equates to 70p on an average transaction of £33.18

Income and costs

Costs are flat yoy. The £2.2m yoy income decline is driven by:

- An upside of £0.2m from the 53rd week in 2018/19
- £0.2m income from the 2017/18 instore advertising spend
- An underlying volume decline of 18% decline in volumes (compared to 20% in 17/18 £(2.7)m)

Risks

- MoJ has indicated that it will stop paper Postal Orders in prisons due to high admin costs, but have asked PO for a solution. Timing for the withdrawal expected is to be end 2018/19 at the earliest.

Quarterly Funding Request

Author: Cem Oztoprak

Sponsor: Alisdair Cameron

Meeting date: 27 March 2018

Executive Summary

Context

The Post Office is undertaking a complex transformation programme, designed to modernise both its retail network and IT infrastructure whilst optimising the cost base and creating a platform for customer-led growth. The strategic goal is to create a commercially sustainable business within the next 3 years.

£210m of investment funding is available from Government, if needed, across 2018-19 and 2019-20. We have agreed to submit a quarterly report to Government on our progress which will support a drawdown of funding. The first full quarterly report will come to the July Board for approval with submission to UKGI following the Board approval. The purpose of this paper is to request funding for the first quarter of the new plan

Questions addressed in this report

1. What is the 2018-19 change plan?
2. What is the change plan details for Q1?
3. What funding is requested for Q1?
4. How does the future funding requirements look like?

Conclusion

The forecasted investment in Q1 of the 2018-19 financial year is £65m, £35m of which will be government funded.

Input Sought

The Board is asked to approve a request of £35m of funding from government for Q1.

The Report

- As part of the latest 3-Year Plan, five strategic priorities have been identified to address the strategic objectives with an investment ranging from £375m to £450m over the next 3 years.
 - Simplify the retailer proposition (£170m to £210m)
 - Build innovative, flexible and secure IT (£80m to £90m)
 - Modernise our products and services (£90m to £110m)
 - Digitise and optimise the business (£30m to £35m)
 - Modernise our skills, culture, HR policies and processes (~£5m)
- Over half of the investment will be funded from trading profits, with the remainder being provided by £210m government investment fund over 2 years. Following this funding period, Post Office will be on a run-rate to commercial sustainability.

What is the 2018-19 change plan?

- 2018-19 is the first year of 3-Year Plan. The budgeted change spend for this year is £255m and the expectation by strategic priority is as following:

Strategic Priority	Forecast
Simplify the retailer proposition	£55m to £65m
Build innovative, flexible and secure IT	£80m to £90m
Modernise our products and services	£70m to £80m
Digitise and optimise the business	£15m to £20m
Modernise our skills, culture, HR policies and processes	£4m to £6m
Regulatory & Group Litigation Costs	£11m to £14m
TOTAL	£235m to £275m *

*The details of the change plan is provided in the budget update paper.

- The spend profile for 2018-19 is expected to be as following. Within that spend is c. £30m of change activity deferred from 2017-18 which we will fund from the business and not from the new investment funding. In addition, we will self-fund any investment in Project Panther, which is not in the budget.

What is the change plan for Q1?

5. Q1 Spend is expected to be ca. £65m, including the carry forward from 2017-18 and will be mainly consist of deliveries of the strategic projects which are already in execution phase or being designed.

	Q1 Investment	Approval Status
Carry Forward projects from Q4	£30.0m	
Simplify the retailer proposition	£9.9m	
- Further Franchising DMBs	£4.7m	✓
- Network Expansion	£4.3m	✓
- Agents / Postmasters Portal	£0.6m	✓
- Other smaller projects	£0.3m	
Build innovative, flexible and secure IT	£18.2m	
- Branch Printer Replacement	£1.8m	✓
- CDP re-procurement	£1.1m	✓
- EUC Branch Deployment	£2.9m	✓
- HNGT Lite	£1.5m	✓
- Project Everest – Cloud enablement	£3.3m	✓
- Project Nelson	£1.5m	✓
- Risk and Resilience	£1.9m	✓
- Software Asset Management	£0.3m	✓
- Full Think Client Deployment (Solar Full)	£0.8m	✓
- Other End-of-life replacements	£1.2m	✓
- Other Smaller Projects	£1.9m	✓
Modernise our products and services	£15.5m	
- POMS Investments	£2.3m	✓
- Banking Framework – Future of Cash incl. Vehicles	£0.6m	
- Project Galaxy	£2.4m	✓
- Mails Projects	£2.1m	
- Digital Check & Send	£1.2m	✓
- Property	£1.5m	
- Falcon – Travel Hub	£1.5m	✓
- Other smaller projects	£3.9m	✓
Digitise and optimise the business	£2.4m	
- Project Arrow	£1.5m	✓
- Success Factors	£0.6m	✓
- Other smaller projects	£0.3m	
Modernise our skills, culture, HR policies and processes	£0.9m	
- Back office Transformation	£0.9m	✓
Regulatory & Group Litigation	£1.0m	
- GDPR	£1.0m	✓
Estimated to be delivered in Q2	(13.0)	
TOTAL	£65.0m	

✓ Approval at Gate 2 or beyond, development in progress

✗ Approval at Gate 1, designing the project

What funding is requested for Q1?

6. To fund expected £65m change spend in Q1, £35m funding is requested.

How does the future funding requirements look like?

7. Based on the current spend profile, we expect to have the following funding requirements

	Spend	Funding	Cumulative Funding
Q1	£65m (incl. 30m carry forward)	£35m	£35m
Q2	£65m to £75m	£55m	£90m
Q3	£50m to £60m	£50m	£140m
Q4	£60m to £70m	£28m	£168m

8. The above figures are indicative only and subject to change based on project delivery performance. At the end of each quarter, we will provide delivery update and revise the future outlook accordingly.

Wait for regular update

Cash Efficiency

Author: Mark Dixon, Russell Hancock, Mark Ellis Sponsor: Al Cameron Meeting date: 27 March 2018

Executive Summary

Context

Many of our customers want to transact in cash including the unbanked, people who are resistant to technology, people who prioritise privacy and security etc. Our cash enables our agents to support customer preferences and is, through Banking Framework, a product in itself for small business.

We operate at scale, managing around £1.5b of cash in a typical day and moving around £60b over the course of a year. The rules we operate under, set by BEIS and the Bank of England, are unique. An explanation is set out in the Appendix.

At the last Strategy Awayday, we agreed that we would improve the efficiency with which we use cash, creating future flexibility and improving our facility headroom to be greater than our security headroom.

Putting cash to use with agents creates the risk that they will steal or lose it, creating losses. Minimising cash availability reduces losses and it was agreed with the Board in January that we would provide a combined update.

The purpose of this paper is to set out progress and next steps.

Questions addressed in this report

1. What progress has been made in improving flexibility?
2. What else can be done?
3. What is happening with agent losses?

Conclusions

We reduced cash in use by £180m by end January, reducing to £127m in February due to the temporary impact of installing new High Speed Notes Counters. £24m extra was borrowed from the Bank of England, giving a total balance sheet reduction of £151m. This was partly offset because, as planned, we spent more on change in the period than we received in funding. Borrowing from BEIS fell by £110m.

This improvement has been made in spite of growing Banking Framework activity and is sustainable. We will always see seasonal impact, with an earlier Easter bringing forward higher branch cash in March compared to last year.

Facility headroom under the BEIS facility increased to £299m and now exceeds security headroom. We believe that a further £40m improvement should be possible without significant investment.

Security headroom reduced to £223m due to the net change spend. As forecast, using less cash reduces the borrowing and the security without benefitting headroom. However, with higher facility headroom we can monetise security headroom if we need to. *new help!*

To improve security headroom, we are about to trial using smaller denomination notes in branches and are in discussions with the Bank of England about an amendment to increase off-balance sheet funding. We are not pursuing any changes to the rules governing security headroom as we do not believe we will make progress.

Reducing cash in branches can also reduce fraud. As the Board is aware, due to the impact of the Postmaster Litigation, we are currently restricted as to the legal action, including County Court proceedings, we are able to bring against Postmasters with unexplained branch losses.

This is likely to remain the case for at least another year and is well known across the network. To combat higher levels of loss we have reduced excess cash in individual branches from £90m to £27m, improved conformance with cash declarations, improved the speed and accuracy of fraud analysis and significantly increased the number of audits. We now find a problem in 81% of directed audits with no significant issues identified in random audits.

In spite of this, losses have risen and the inherent risk will continue to rise. We are assessing whether we need to further increase resources.

We will focus on managing future impacts of the Banking Framework (the future of cash work will be brought to Board in May) and improving our MI on the back of the POLSAP replacement. A longer-term Phase will likely be created to introduce better technology, possibly including the internet of things and/or smarter counter safes transforming our knowledge of where cash is and reducing losses. *✓*

Our long term goal remains charging for cash delivery and inventory to align our interests with those of agents. However, this is a major change and would only be introduced as part of a package of measures. This will form part of the Retail Strategy.

Input Sought

The Board is asked to note the progress made and comment on the next steps.

The Report

What progress has been made in improving flexibility?

1. We have c. £151m less cash on our balance sheet. We believe there is limited seasonal impact in this comparison:

Cash position, £m	Feb 2018	March 2017	Variance
Sterling	498	551	53
FX	57	85	28
Total Branch Cash	555	636	81
Inward REMs	48	83	35
Outward REMs/Other	91	74	(17)
Total for Processing	139	157	18
Other, cheques, cards	68	120	52
Total Cash in Use	762	913	151

2. January's cash in use was even lower at £708m: the rise in February is primarily due to £42m of extra cash in the machine processing rooms as we switch to the new High Speed Note Counters.
3. This reduction reflects progress in a number of the planned areas. We worked with 3,000 branches to recover cash after Christmas. Branch Sterling has fallen by c. £53m and as we will set out later in the paper, we believe this has been successfully focused on branches with excess cash (£60m) and has not risked trading through a general rationing of cash. We changed the way we provide Euros and US Dollars to send the amounts we thought branches needed rather than the amounts branches chose to order. FX holdings have fallen by £28m with at least £20m due to this initiative.
4. The next significant area of focus was cash being processed back into bond. Deploying overtime and 9 extra FTE in cash centres, inward remts are now £48m versus £83m last year and a peak of £160m in Q1 as the Banking Framework volumes increased.
5. We have spent £224m on capital and change while receiving £160m from trading and Government support. As a result our net funding from client and other creditors has fallen by £75m. We have borrowed more from the Bank of England, enabling us to reduce borrowing from BEIS by £110m:

Borrowing position, £m	Feb 2018	March 2017	Variance
Cash at bank	-	1	(1)
BEIS Revolving Credit Facility (RCF)	(451)	(561)	110
Off balance sheet BoE Funding (NRF)	(270)	(246)	(24)
Other	(41)	(107)	66
Total	(762)	(913)	151

So do we D headroom
as in g use of but

6. Our facility headroom on the RCF is measured against an effective limit of £750m: the facility limit of £950m less the Board's £200m internal cap. Our headroom has increased by £110m to £299m.
7. Our security headroom is relatively unaffected by the improvement because reductions in cash in use reduce both the limit and the balance. However, it is affected by the drop in the net funding provided by other sources as follows:

Security Headroom, £m	Net Security	Usage (RCF)	Headroom
March 2017	894	(561)	333
Reduction in branch cash	(140)	140	-
Other	(80)	(30)	(110)
February 2018	674	(451)	223

8. We agreed with the Board last summer that our immediate task was to ensure that Facility Headroom increased above Security Headroom, creating flexibility. That has been achieved.

What else can be done?

9. Overall, we estimate that a further c. £40m of cash can be removed by targeting excess cash in individual branches (this will never be nil), analysing whether it would be cost effective to bring back c. £10m of surplus foreign currency in less used currencies held in small amounts across the network and continuing to optimise the end to end process.
10. We identified four other potential opportunities last Summer. Firstly, reducing overall borrowing by creating a £50m third party facility: this is with HMT for approval. Secondly, creating additional capacity in the NRF: we have dialogue with the Bank and trials which in combination could benefit security headroom by c. £60m, partly by using lower denomination notes in branches.
11. Thirdly, we may be able to reduce our buffer if we forecast better. We are forecasting more often and working with KPMG to understand what else we can do in the current state of our systems. However, this has not yet led to a systematic improvement. Once we have replaced POLSAP, we expect to work on re-basing both our financial and cashflow forecasts on trends in the underlying £60b of transactions, for which information is not easily available today.
12. Finally, we discussed the potential to change the security headroom rules with HMT but believe they will not change as it could impact the way the loan is characterised on their balance sheet. We have stopped this workstream.
13. As we revert with the Future of Cash work, the banking framework may lead to further phases being required. In the long term, we would like alignment with agents on their use of cash by sharing the drivers of our cost base and charging for cash delivery and inventory.

14. We have intentionally not made any progress in this area: we do not have sufficient, reliable data to support any charge for inventory, which could be the greatest driver of agent behaviour; and secondly, we can't assess this in isolation of the broader agent remuneration and retail strategy, due to the Board in June. Whether we charge for services, offer different levels of service and how we maintain people interested in taking and retaining Post Offices is complex and finely balanced. Nonetheless, this would remain our preference.

What is happening with agent losses?

15. In the 11 months to end February, we saw an increase in debt provisioning net of c. £4.3m – annualised c. £5m. This represented gross losses of £7.1m and recoveries of £2.8m of which the bulk happen within a few days of the loss being identified. This compares to net losses of c. £2.9m in 2016-17.

16. The pattern of rising network losses was discussed with the Board earlier in the year. It is some years since we have felt able to routinely prosecute agents for fraudulent activity and we are not now pursuing county court actions. This may contribute to an increase in incidents: in the first quarter of the year we saw three material losses of more than £300k each. We set out plans to improve conformance with and simplify the cash declaration process, giving us better data, to improve fraud analytics and to increase the number of audits.

17. We are working hard to combat the trend:

- Cash declaration conformance has increased steadily over the last year from 85% in January 2017 to 91% in February 2018 with a continuing upward trend. This is the result of thousands of phone calls.
- The project to simplify declarations is underway for delivery in July. It is taking a long time because making changes to Horizon code is slow.
- We have reduced estimated excess cash at branches from £90m (£126m after Christmas) to c. £27m. This does not represent a static population of branches.
- We have worked with a third party to improve the accuracy and speed of identifying fraud. We have completed 594 risk audits YTD versus 425 for the whole of last year. When the team request an audit there is a loss and /or excess cash to return 81% of the time, 75% have some sort of cash loss. 97 random counts have been carried out with 40 showing small losses totalling £18k, an average loss of £450 highest individual loss £2.3k.
- YTD 143 postmasters have been suspended compared to 116 last year, with 101 branches remaining closed. The majority relate to audit issues.

18. The net impact is that the average loss has fallen from £24k in Q1 to £16k now but that is a rising trend from Q2 at £9k. We are not seeing the very large losses – our largest loss in Q4 is £130k

19. Within a future phase, technology options can be used to reduce theft, including potentially using internet of things sensors on cash packets and new counter safes pioneered by the Norwegian Post Office which reduce handling of and access to cash. These are potentially game changing. The immediate systems priority however is to manage the transfer of cash management from POLSAP to new Transtrack software. We are working on improved data flows, analytics and forecasting to flow from this core change.

APPENDIX – HOW DOES CASH WORK IN POST OFFICE?

The purpose of this Appendix is to remind people of the way we manage cash, the rules we operate under and the jargon we use. For consistency, we are using the data at the March 2017 year-end throughout.

Cash under our control

On that date we had £1,444m¹ of physical cash under our control. We operate as a member of the Bank of England's Note Circulation Scheme (NCS) which supports us operationally and with funding in exchange for us distributing cash throughout the country.

Cash we manage for other people but do not own

Of that £1,444m, £532m was in Bank of England (BoE) vaults in our Birmingham and London cash centres or in a Clydesdale Bank vault in our Glasgow. Once the cash is in the vaults, it belongs to the bank and not to us – neither the cash nor any related borrowing appears on our balance sheet.

There are very specific rules that govern the operation of the vaults from opening hours (broadly 9-5), to security to processing requirements. Either bank can and does send teams in without notice to audit us: to date we have always passed.

Our main risks are the security of the cash and ensuring that the amount of cash held does not exceed our insurance limits for that site or across our business. Limits can be stressed by the build-up of £50 notes. Oddly, people across the world will take £50 notes in their original wrapping but not once they have been used even if they remain in perfect condition (A-FiT). A-FiT £50s come in via FRES and tend to build up until we can persuade the BoE to take them back. To date, they have done that (to the tune of c. £210m this year) and we have not had to refuse FRES.

Cash we use in our business

Cash is used in our business from the moment it leaves the vault until it is paid to a customer and from the moment it is paid in to our till until it is back in the vault.

Cash is considered branch cash from the point at which it is barcoded (remm'd) into a branch as the Supply Chain driver delivers it. It is remm'd out when it is packaged for return and the barcode swiped – it may then stay in the branch safe until Supply Chain picks it up again.

Once it has been barcoded for return it becomes an Inward Rem. It will be picked up, and returned to one of 15, local depots. It will then be put on larger lorries to be "trunked" back to one of the cash centres. The cash is then counted by machine under camera. We are currently replacing our old machines with High Speed Note Counters that meet the BoE's new rules for polymer notes. The cash is processed in alignment

¹ Shown as £1,479m in June 2017 paper reflecting change in presentation of debit cards and Clydesdale funding arrangements.

with BoE rules and goes back into the vault at which point the cash is owned by BoE and disappears from our balance sheet and funding requirement.

Cash will also be doing the same journey in reverse (Outward Rems) and we maintain other cash between vault and branch for a variety of reasons – local stocks of coin to speed up delivery, Scottish notes etc.

The cash in use in our business at year-end was therefore £913m, broken down as follows:

Cash position, £m	March 2017
Sterling notes and coin	551
Foreign currency notes	85
Total Cash in Branches	636
Inward REMs	83
Outward REMs/Other	74
Total for Processing	157
Other distributed inventory, cheques, cards	120
Total Cash in Use	913

Funding

That £912m of cash was funded as follows:

RCF	Clients	NRF	Total
561	106	246	913

The NRF

£246m was borrowed from the BoE under a complex arrangement within the NCS known as the Note Recirculation Facility (NRF). The BoE wants us to distribute cash around the country preferably using smaller denomination notes. Every note we process over the course of a year (October to October) creates capacity and the smaller the note, the more capacity it creates. Over the course of a year, the notes we distribute earn us capacity of some £250m every day.

We are allowed to sell that capacity to the BoE overnight. Effectively the cash sits in our branches and would sit as borrowing on our balance sheet during the day. At end of day, an amount is formally transferred to the BoE and both the cash and the borrowing are removed from our balance sheet.

We only have to stay within our capacity over the course of the year – on a given day we can sell capacity to the BoE up to a limit of £350m, giving short-term flexibility. If we over-use the facility across a year, we have to pay the BoE an interest charge on the additional amount. We work hard not to do this in case we risk the relationship.

FS&T CE Report - March 2018

Author: Owen Woodley

Meeting date: 15th March 2018

Executive Summary

Context

This report provides an update to GE on the drivers of income and the current performance of the products across FS&T together with a full year outlook.

Questions this paper addresses

1. How do we make money in FS&T?
2. What are our propositions for customers?
3. What contribution does each of our products make?
4. How are we performing?
5. Where do we expect to be at year end?

Conclusion

- The FS&T trading portfolio (including Banking Services) has performed well against headwinds and is expected to land £0.6m off the full year budget contribution.
- MoneyGram remains an area of concern given wider market conditions in advance of Brexit. We are in detailed negotiations – see separate paper.
- The growth in the BoI product set continues to be constrained by the current contract. Again, we are in detailed negotiations.
- Work is progressing well on the launch of the Customer Hub and Project Galaxy is now into implementation in Telco to address the BT price regulation.
- FS&T Performance to P11:

Gross Income (£m)							
	Period 11 YTD		Full Year				
	Actual	5+7 Fcst	Var	Out-turn	5+7 Fcst	Budget	Bud Var
FS&T incl PO Insurance	318.5	317.2	1.3	361.5	361.5	372.2	(10.6)
Banking Services	80.4	79.4	1.0	87.4	86.3	79.8	7.6
FS&T, Pol and Banking Services	398.9	396.6	2.3	448.9	447.8	452.0	(3.1)

FS&T Profit Contribution after Agents' fees (£m)

The GE is requested to review and note the report and approve it for Board submission.

The Report

Balance Sheet Product Set

1. How we Make Money

- Mortgage income is based on the total completions value: 30bps for contact centre/online and 9bps for brokers. Cards and Loans are based on transaction volumes and balances - 45bps of total written lend value and £21 for each card sale.
- In Savings, under the current value share, we receive a fixed payment of £43m. There is also variable income based on a Net Interest Margin (NIM) target of 55bps in March 2018, with £0.55m of income for each additional 1bp below this target.

2. Core Proposition for our Customers

Today we offer good value, straightforward retail banking products but we need to move away from being price-led into differentiated propositions that build long-term customer relationships. The first will be two new mortgage propositions launching in April.

3. Product P&L P11 YTD

	Gross Income (£m)					
	Period 11 YTD			Full Year		
	Actual	5+7 Fcst	Var	Out-turn	5+7 Fcst	Budget

B/S Products	35.8	35.3	0.5	50.5	45.0	50.5
						0.0

4. Review of Performance

Savings performance has been very strong, supported by the partnership's pricing responses to the base rate increase. We expect NIM to be c.46bps, leading to a forecasted income level £4.4m above budget.

Mortgages are tracking ahead of last year but remain behind target in both apps and completions. Price is the key driver which has restrained volumes but we are launching two new propositions in April, backed by a major marketing campaign. Our unsecured lending journeys are improving with higher accept rates (68% in cards/55% in loans).

5. Year-End Outlook

Contribution is expected to end the year in line with budget and £5.5m ahead of forecast. We are not expecting to receive any profit share from credit cards (budget £0.9m) or personal loans, however this will be offset by the additional savings income.

Transactional Product Set

1. How we Make Money

- Our foreign currency products deliver income on a transactional basis (£1.92 per 'normal' FX transaction, 0.4% of 'click & collect' turnover, £4.58 per new 'travel money card' sale and 0.625% of all top-ups) plus an annual fixed payment of £10m.
- MoneyGram income is generated through three streams: the FX margin (c.34%), customer fee (c.36%) and a fixed 65p per transaction. We get c£6.35 per Send and £10.50 per Receive and there is also an additional £3m annual payment to POL.
- Postal Orders ("POs") cost 50p for transactions 50p-£4.99, £1 for £5.00- £9.99 and above that 12.5% capped at £12.50. We also recognise income from expired POs.

2. Core Proposition for our Customers

Post Office is the number one provider for in-branch foreign currency sales, with a market share of 25% and online share of 17%. We also have the largest network of money transfer branches in the UK and hold a c.13% share of cash money transfer business. Postal Orders are in structural decline and subject to a wider strategic review.

3. Product P&L P11 YTD

	Gross Income (£m)					
	Period 11 YTD			Full Year		
	Actual	5+7 Fcst	Var	Out-turn	5+7 Fcst	Budget
Travel Money & FRES	55.7	55.1	0.5	62.8	62.8	61.8
MoneyGram	24.2	25.9	(1.7)	26.9	28.6	31.7
Postal Orders	13.5	13.4	0.1	14.6	14.5	16.2
Transactional Products	93.4	94.5	(1.1)	104.4	105.9	109.8
Profit Contribution (£m)						
	Period 11 YTD			Full Year		
	Actual	5+7 Fcst	Var	Out-turn	5+7 Fcst	Bud Var
	49.8	50.1	(0.2)	56.7	57.4	56.5
Travel Money & FRES	22.8	24.6	(1.7)	25.5	27.2	29.7
MoneyGram	13.2	13.1	0.0	14.2	14.2	15.9
Postal Orders	(36.2)	(35.5)	(0.7)	(39.1)	(38.4)	(37.8)
Agent's Pay	49.6	52.3	(2.6)	57.2	60.4	64.3
Transactional Products	49.6	52.3	(2.6)	57.2	60.4	(7.0)

4. Review of Performance

Travel Money & FRES revenue is £1m ahead of budget and £0.5m better than YTD forecast, principally due to the performance of the TMC but also recently better volumes in branch. However, AML limits are a risk to FRES profit (£2k+ transactions down 40%).

MoneyGram is behind its original income budget by £(4.8)m and YTD forecast by £(1.7)m. Key drivers are migrant levels and uncertainty around Brexit, the value of £ and FX margins and stricter AML regulations requiring ID on higher value transactions. PO volumes are declining by c.20% YoY and are 13% lower than budget.

5. Year-End Outlook

We are expecting Travel Money to end c.5% behind target due to competitive pricing in the online market but this has been offset by the good performance of the TMC. We are reviewing our remittances strategy and are in commercial dialogue with MoneyGram. Postal Orders contribution is expected to end the year in line with the 5+7 forecast.

Telco

1. How we Make Money

- We offer consumer telephony products (HomePhone, Broadband ADSL and Fibre) and telephony services (voice calls, premium install, virus protection etc). The products offer 3 contract lengths (12/18/24 mths) ensuring that new promotional offers can be rotated to balance ASA compliance with avoiding "always on" offers.
- Customer monthly Average Revenue per User ("ARPU") and average tenures vary by product and promotional price points. In HomePhone, the average ARPU is £24.46 over 57 months and in Broadband it is £27.48 over 32 months. ARPU is a mix of fixed contract income (c70%) and variable income from call packages etc.

2. Core Proposition for our Customers

Broadband (ADSL) & Fibre (FTTC): For Q1 18/19 we will be launching our most competitive Standard Broadband price point at just £18pm through our key affiliate partners (U-Switch, Moneysupermarket, Broadband Choices) and improving Fibre retail prices from £32 to £31pm on our most popular tariffs. This increased aggression is primarily supported through wholesale cost reductions negotiated with Talk Talk.

HomePhone: The base HomePhone offering will be reduced from £16.99 to £11.50 on 1st May in response to the OfCom's market pricing intervention. We are also introducing a £1.50 charge for paper billing for customers moving to the £11.50 tariff but we expect POL to remain competitive vs BT with better value through free call features and rates.

3. Product P&L P11 YTD

		Gross Income (£m)			Profit Contribution (£m)			
		Period 11 YTD			Full Year			
		Actual	5+7 Fcst	Var	Out-turn	5+7 Fcst	Budget	Bud Var
Telecoms		139.9	138.0	1.8	152.1	149.6	149.4	2.6
Telecoms Products		139.9	138.0	1.8	152.1	149.6	149.4	2.6
		Period 11 YTD			Full Year			
		Actual	5+7 Fcst	Var	Out-turn	5+7 Fcst	Budget	Bud Var
Telecoms		35.1	35.3	(0.3)	36.9	38.0	31.2	5.7
Agent's Pay		(1.3)	(1.3)	(0.0)	(1.4)	(1.4)	(1.4)	(0.0)
Telecoms Products		33.7	34.0	(0.3)	35.5	36.6	29.9	5.7

4. Review of Performance

Telecoms gross income is £1.8m better than forecast due to higher customer numbers and greater ARPU. YTD contribution variance to forecast is (£0.3m) due to accounting treatment of contract set-up costs, partly offset by higher customer numbers and an early price increase and lower cost of sales, particularly for HomePhone only customers.

5. Year-End Outlook

Telco gross income should outturn c£2.6m ahead of forecast due to higher customer take up and ARPU. At the same time, amortisation costs have increased since the 5+7 forecast through a changed accounting treatment adding £1.5m to the cost base. Overall, Telco contribution is expected to outturn (£1.1m) adverse to 5+7 forecast.

Post Office Insurance ("POI")

1. How we Make Money

- **Travel Insurance ("TI"):** Revenue is through commission income. 84% of sales are single trip policies with one-off revenue. The rest are Annual Multi-Trip (AMT) policies which builds annuity income. AMT retention is c18%. There is an underwriting profit share; returned as revenue or rate reduction.
- **Life & Over 50s:** Income is generated through commission, reflecting the lifetime value of the sale to POI and is subject to clawback for policies cancelling within the indemnified period (up to 48 months). An annuity income stream is received monthly for all policies that continue beyond the indemnity period and a monthly income stream of 2.5% of premiums is paid to POI as commission on these policies.
- **Home, Car & Van:** Revenue is generated through a combination of commission income, add-on margins (e.g. Legal Expenses, Roadside Assistance etc), service fees, instalment income and First Notification of Loss income. Policies generate an annuity income stream from both new sales and renewals, plus a profit share.

2. Core Proposition for our Customers

POI propositions are simple to understand, easy to access and offer good customer value while not being the cheapest in the market. Propositions for Travel and GI remain mass market with limited differentiation although plans to refresh this are in development. Protection products are evolving at pace, providing the platform to successfully build a material share of the growing direct to consumer protection market.

3. Product P&L P11 YTD

PO Insurance Products	17.5	17.6	(0.1)	19.9	20.2	21.3
						(1.4)

4. Review of Performance

Q4 protection campaign continues to build momentum. Marketing is delivering above expectations driving response for over 50's into all channels. We are seeing early signs of success in respect of our 1 on 1 customer communication and digital marketing for Life insurance. Month on month digital sales of protection are up by 323% (P10 to P11). Renewal retention for car insurance continues to outperform plan by 2%. We continue to track behind plan for Travel Insurance sales volume across multiple channels.

5. Year-End Outlook

POI forecast group EBITDA outturn is £20.2m, prior to a £0.3m risk from Project Russet. As of P11 YTD EBITDA was £17.5m. The continued strong performance of Life Over 50's DRTV, Life sales and Easy Life will be critical in hitting the year end number.

Customer Hub

1. Programme Plan Summary

The Customer Hub is targeting a first launch in May 2018. The initial MPV is focused on the TMC and TI products which will be served through our own Travel App. The project is in its product development sprint cycle, application build and API integration with both FRES and POI. FRES now has dedicated development, test and production environments and we are now working on a clear, POL-wide Hub operating model.

2. Achievements to Date

We have introduced Agile Ways of working to support rapid product and application development - learnings which will need to be shared more widely in POL. The Post Office Digital Innovation Centre has been launched and key people recruited. The procurement of the OutSystems platform & development is ongoing. UI/UX prototyping for TMC is now completed, and continuing for TI.

3. Launch Proposals

Following launch in May, all new TMC customers will be directed to the Customer Hub where we will also be able to offer them TI and Gadget Insurance as add-ons. Sales support kits and call centre briefings are being prepared.

4. Expected Take Up and Usage

Assumptions for the first MPV are based on an approach of co-existence with the current FRES TMC App initially. This will be followed by a period of migration for existing TMC customers to the Travel Hub (expected to complete by the end of Q4 2018/19). We also intend to migrate existing TI customers into the Hub at their renewal point and from this base, we will cross-sell TI, TMC, Gadget Insurance and Identity products. Regular usage is critical via personalisation, velocity of new services and some key capabilities:

- Active customer management based on data analytics, e.g. nudging.
- Additional functionality to increase self-serve (e.g. insurance add-ons, Mid-Term Adjustments, Claims, Chat bot, TMO, onboarding TMC etc)
- Improved propositions (e.g. affinity arrangements such as HolidayExtras).

5. The Future

We are developing a process to include additional verticals in the future. This process will be discussed and approved in the Customer Hub Steerco and brought to GE for information.

Appendix - Brief Market Overview

Mortgages

Current market size c£1.4bn; POL's total stock c£5.4bn; market share c0.38%.
Mortgage lending has been growing consistently over recent years, with accelerated growth in 2016 compared to 2014 and 2015 but base rate rises would impact the market over the coming period. The dominant players in the market are Lloyds Banking Group, Nationwide, RBS, and Santander. Digital channels are most important when customers are researching a product, but many customers still value face-to-face advice at the application stage. The intermediary channel continues to grow in importance.

Savings

Current market size £1.45trn; POL's book size c£14.5bn; market share c. 1%
Savers have been disadvantaged by extremely low interest rates for a number of years and as such customers have often been turning to interest-bearing current accounts instead as a means of bolstering their savings income. The major retail banks together with Nationwide and NS&I remain the largest providers of retail savings accounts.

Personal Loans

Unsecured loans market size c£38bn; POL written lending c£120m; market share 0.3%
The unsecured lending market grew by 40% between 2012 and 2016, reaching £260 billion by the end of the period, with estimates from Mintel showing a further 5% growth for 2017, spurred on by low interest rates making repayment levels more affordable.

Credit Cards

Current market size 36m (vol); POL active accounts 406k (vol); market share 1.12%
Credit card lending has maintained growth levels of 5-10% over the last five years. Low interest rates have driven hard competition with increasing balance transfer offers and rewards. The number of credit cards in circulation has been roughly stable at 60 million over the last five years. Barclaycard remains the largest provider with an estimated market share of 16% followed by LBG at 15% and HSBC at 11%.

Travel Money

Market transaction value £9-12bn; POL transaction value £2.5bn; market share 25%
UK residents spent £43.4 billion abroad in 2016. However the Brexit vote led to an immediate fall in the value of the pound which has yet to recover its pre-referendum levels. This has significantly reduced consumer spending power abroad and as a result, consumers are paying closer attention to exchange rates and are much more likely to spend more time shopping around to find the best deal. Fintechs like Revolut are performing well in the pre-paid multi-currency card arena.

Telco

Homephone only market c2m households and POL market share is 10%; Broadband market is c25m households and POL market share is c1%
There are four major providers in the Telco market - BT, Sky, Virgin and TalkTalk. All are focused on fibre broadband to support fully converged 3 or 4 play offers. Fibre offers lower margin returns, but which these are offset by converged offers of TV and Mobile by most of the big four. ADSL broadband (up to 17mb) is still in over 9m UK homes,

and remains highly attractive to value seeking or smaller households. Over 50% of customer switching is now happening online and through affiliate websites such as U-Switch.

Travel Insurance

Market Gross written premium c£730m; POI's GWP is c£50m; market share 6.8%
Steady market growth predicted with the current market size of £730m written premium forecasted to grow to 920m over the next 5 years. This will lead to the continuation of intensified price competition from a crowded market. Annual Multi Trip continues to be c.40% of the overall TI market, but this is inflated by policies offered by Banks/Credit cards. Market share of packaged accounts with travel insurance is on the decline with customers expected to revert back into the direct travel insurance market.

Motor Insurance

Car insurance market GWP c£11.5bn; POI's GWP is c£80m, market share 0.7%
Whole car market growth is estimated at c1%pa to 2020 with aggregator expected to grow at the same rate. There is little to no impact from insuretech/fintech in motor given high entry barriers and costs and business/product model highly commoditised. The short term outlook for motor is favourable with a short and shallow drop in rates expected as some providers move for growth.

Home Insurance

Market GWP c£5.7bn; POI's GWP is c£98m; market share 1.7%
Insurable households currently total 20.1m and expected to fall by an average of 2% p/a over the next 3 years (eBenchmarkers). This reflects changes in home ownership especially for younger segments. Aggregator share is still expected to grow by 7% pts between now. The home market is likely to be more challenging in the short term as traditional insurers have not sufficiently adjusted their business models to reflect increased competition from aggregator distribution.

Term Life

Total non-advised market 250k new policies pa, £70m APE; POI's market share 2.5%
There remains a significant protection gap in the UK market - very difficult to scale but believed to be multiple £bn. Mintel forecasts 1-2% market growth per year over next 3 years with a trend for direct to consumer new business comprising an increasing portion of the market. Aggregator growth is expected to continue too at c10% pa.

Over 50's

Market is 280k new policies pa; £55m APE; POI's market share 7%
The market is expected to be flat in 2018/19 with potential for limited growth in 19/20 and beyond. It should be noted however that market size has shown a strong historical correlation to the TV advertising expenditure of the market leader, Sun Life.

International Remittances

Authors: N. Boden / C. Pispinis

Sponsor: Owen Woodley

Meeting date: 27th March 2018

Executive Summary

Context

- Following on from the Remittances paper presented to the December GE¹, Post Office Money has completed its review of our current contractual obligations with our in-branch cross border payment provider, MoneyGram (MG).
- Money Transfer Operators (MTOs) have seen continued impact to consumer spending caused by a number of key factors – Brexit, falling immigration rates, the weakness of sterling and continued focus on AML requirements – all of which will remain ongoing considerations over the short to longer term.
- The financial impact to POL continues to be challenging with double digit YOY decline in transaction numbers. Our 2017/18 YE income outlook is £26.2m, £2.4m adverse to the 5+7 forecast.
- Digital capabilities, in contrast to the traditional cash-to-cash send and receive transactions, continue to increase in popularity with remittance customers. It is estimated that digital remittances have grown from 5% of the UK market to around 20% over the last three years. Currently, our existing agreement with MG contains an exclusivity clause removing our flexibility to operate in this digital arena with other providers, yet this is not a strength for MG's European operations.
- Our current exclusive contract with MG runs to September 2019, with the option (requiring confirmation by 30th March 2018) to extend to September 2021.

Questions addressed in this report

1. What is the size of the current market and estimated share by MTO within the UK?
2. What would be our key RFP considerations and how would these balance against improved value from an extended MoneyGram contract?
3. What is our current 3-year forecast and how does it compare to the negotiated outcome with MoneyGram?
4. What are our recommendations and next steps?

Conclusions

1. As digital activity continues to build in the remittances market, and growth in the total market remains flat at best, we expect cash-initiated remittances to see single to double digit decline over the next three years. Further changes in AML transaction thresholds and lower immigration into the UK will exacerbate this decline rate, as

See the right thing to do

¹ Please refer to the December 'International transfer and remittance' paper in the Reading room for further background on the market & competitive landscape, and contractual set-up with MG.

we have seen following the current £800 limit introduced in 2017 and Brexit. Our future revenue expectations will therefore be under growing pressure unless we have access to a complementary digital solution.

2. Our discussions in the market would suggest that we are unlikely to get an enhanced offer on our branch proposition from an alternative provider and critically, any new agreement would only commence in late 2019 by which point we expect the digital market to have moved even further. We believe we need to act sooner than that.
3. We do not believe that it is feasible for POL to own the full value chain for the foreseeable future, given the need for a global network of correspondents: current branch, online and digital providers operate in >100 countries and come with recognised and trusted brands. We also believe that a multi-partner branch proposition would be untenable given differing provider tariffs and exchange rates, and would be potentially less beneficial commercially.
4. Based on the above and our earlier analyses, we have two primary choices:
 - **Option 1:** Move to RFP – this would corroborate, or otherwise, the sense we are getting from the market and determine whether MG would provide enhanced terms from late 2019 onwards under competitive pressure. However, this would certainly delay our ability to launch a digital proposition until early-mid 2020. Furthermore, it is expected that any new provider would be seeking a significant new contract period and likely request full exclusivity across branch and digital.
 - **Option 2:** Negotiate better commercial terms through to September 2021 and remove exclusivity on digital capability with MG immediately. This would keep the focus and continuity on our current branch product; help protect against any further declines in performance from the political landscape affecting immigration (our core customer base); and enable us to develop our digital product offering and test the market faster than if we had to wait to go to RFP.
5. We believe option 2 provides better customer and business outcomes, particularly with a clear commitment from MG to build out their non-European corridors; as such, we have sought and secured an improved guaranteed income stream from our existing branch channel which will mitigate against any further revenue decline. This amounts to a net income of £5.6m over the life of the extended MG contract to 2021. We have also secured MG's consent to give us more flexibility on digital remittances, including full freedom on pure digital transactions. We think this is a compelling offer which helps to mitigate our market risk over the next three and a half years and we therefore recommend that the MG contract is extended to September 2021, subject to legal terms.

Input Sought

The Board is asked to support the recommended next steps.

S and can be as originally

The Report

What is the current size of the UK market, estimated share by MTO and product differentiators?

1. The UK is an outbound market with send transactions accounting for 90% of all transactions. We estimate the send market to be c£6bn p.a. with 21m send transactions in 2017 by MTOs for walk-in and online business. Share by operator (banks excluded) is as follows:

a. Western Union ("WU")	43%
b. MoneyGram	19%*
c. RIA	8%
d. World Remit	7%
e. Transferwise	5%
f. Others	18%

(*POL represents 70%)
2. POL is the largest single network with a UK market share of 13%.
3. WU primarily operates across a network of independent operators, similar to RIA; RIA commenced a pilot with Asda in 2017 for a white-label online solution, the success rates of which are unknown. RIA's owner, Euronet, also owns HIFX and XE who are competitors of POL in the digital sphere.
4. The three largest MTOs – WU, MG and Ria – are all US companies and between them have over 1m send and receive locations globally. They also operate in most countries and territories. They all offer a 10-minute person-to-person cash send/pick up service, as well as bank account deposits and deposits to mobile wallets in certain markets. These markets are growing and a key focus of each operator. The very broad and established network locations in 'receive' countries are the main reason why POL would not be in a position to become a provider in its own right over the short to medium term, and therefore is better off partnering with an existing, recognised branded network.
5. FinTech MTOs operate simple internet/mobile low cost models and provide an alternative to the walk-in cash-to-cash models, by signing agreements directly with banks and mobile operators. Similar to the cash-to-cash providers, these digital operators are also focussed on owning the customer data to directly market their new services and influence customer behaviour, e.g. through prompt and personalised notifications of exchange rate movements.
6. We believe there is a significant opportunity for POL to engage in the digital space by partnering with a FinTech – either the established names, such as Azimo, Transferwise or Revolut – or the less established, such as Smallworld or TransferGo. There are also opportunities for POL to disrupt the market in terms of a more simple pricing structure which we will be exploring further.

What are core RFP considerations and how do these balance against improved value from an extended MoneyGram contract?

7. WU and RIA are expected to require a minimum five-year agreement as this timescale is currently a recognised payback period for signing fee, branch rebranding and marketing investments for a partner with our branch footprint. We would also expect to be required to accept an exclusivity clause for this time period consisting of cash-to-cash and digital capabilities.

Forward to...

8. Additionally, we think that an RFP would result in loss of focus from MG on the core business during the critical period in the run up to Brexit, which would likely further impact POL's decline in revenues over the next 18 months. MG's current agreement expires at the end of September 2019, unless POL requests an extension through to September 2021, to be requested by 30th March 2018.
9. Whilst the recent ANT Financial planned purchase of MG was blocked by US authorities, MG remains open to further takeover bids. If this situation was to occur, POL would have a right to terminate if MG were acquired directly or indirectly by an entity outside of MG's group, provided we can explain our motives, which must be reasonable.
10. Of course, an RFP would give us the opportunity to engage with the market leader, Western Union. This has its benefits, though we should also consider:
 - o The market is changing rapidly; waiting for the RFP, which means we would not be contracting with a (new) party until October 2019, would further exacerbate the current declining income trend, by less focus on the business given diversion of resource to the RFP, and further falling behind in the digital space.
 - o Informal engagement with WU indicates they could provide digital capability within 3-4 months, subject to POL tech; the negotiating approach we have taken with MG (i.e. more digital flexibility) would still give us the opportunity to partner with WU in the digital space.
 - o WU has also indicated they would not be prepared to give us access to customer and behavioural data; this would limit the wider payment capability we are looking to leverage across POL, and through Customer Hub specifically. This would apply to physical and digital transactions
 - o Whilst some of the points above could be negotiated, WU, as any new provider, would most likely be looking for exclusivity for a minimum of five years to ensure payback; this would take us out to late 2024.
11. Other areas we have considered in moving to an RFP process include: timescale to complete; opportunity cost of the RFP process, including senior management, legal and procurement resources and cost; unknown financial impact to October 2019 (date from which a new agreement would run and by which time the digital part of the market is likely to have continued its rapid growth); removal of existing signage and rebranding of our branches; employee training; and system investments.
12. As such, we devised a negotiation strategy with MG, developed on the basis of three key objectives: (i) protect against current revenue decline, (ii) release/reduce our current "exclusivity" contractual obligations to allow us to develop/partner on new digital capabilities and, (iii) create a financial benefit for POL if MG is unable to deliver against a pre-committed new market and product development schedule. Through our negotiations we have made significant progress against the first two of these objectives. MG's reliance on third party agreements to deliver against the schedule means that they are not willing to agree on the third objective.
13. To help MG get to their final offer, we have actively supported a review of their cost base and received a 12-month new market and product development plan.
14. The table overleaf shows a summary of MG's offer and our commentary. It is important to share at this point that we do not think that the cost reductions MG has proposed to part-fund the additional fixed payment will exaggerate further revenue decline, except for point 3 which is expected to impact our gross income by £0.2m p.a.
