Hi Calum

I have just read Donalds email to you re Panorama documentary and would still be of mind to keep it in the agenda for October so that when I send out the Agenda to all the delegation will see the item and have time to bring something to the meeting and I would not like a direct question to the National President so that he too can have all the facts from the Federation stance.

Regards  
Paul

Thanks Paul,

This is a very strange issue that just doesn't seem to go away and has rumbled on for years. As such it doesn't look, smell or taste right.

Maybe rather than continuing to repeat POL's position of there's nothing wrong, it might be an idea for the NFSP in the interest of clarity and openness, to conduct its own full and independent enquiry. This would be to make absolutely sure that going forward all members can have complete faith in Horizon and POL's commitment to investigating all and any shortages thoroughly and objectively.

Calum

**Subject:** BSC 24: Post Office under the spotlight

Dear colleague,

You'll no doubt have seen last night's Panorama on the Post Office Horizon system and prosecution of subpostmasters. The attached BSC reflects the NFSP position and views on the current pressures facing Post Office, and includes a link to the Post Office response to the Panorama broadcast.

Yours sincerely,

David McConnell  
Director of Communications & Policy
