Gareth ci Gill

Thanks for that, its very helpful and the wording issues could easily be changed by Neneh, subject to your approval of course.

History

To date we have never been called *to provide any technical evidence*, as the courts are mostly interested in only the data, how it was recorded and by whom and who is presenting it to the court (usually Penny or Neneh). They are subject to questioning on those issues alone and can happily respond, however this particular statement is nothing to do with particular incriminating data, the recording or presentation of that data to a court, it's more on the technical processes, which is not in issue, but required for information. Hopefully the explanation (as detailed in the statement) which by the way has been pre-empted by PO is all that will be required and no questions will be forthcoming.

Perhaps we can review this on Friday pending the outcome / decisions made after I have provided a little more background details to Gill.

Thanks again

Brian,

I've had a read through the statement.

I'm happy about everything in the statement with 3 exceptions:

1. The Opening Paragraph will clearly need to be changed if I am to sign it (trivial!)
2. The paragraph on page 2 about weekly cash accounts being sent to Chesterfield are no longer true, but would have been true at the time of the case (since OBCS was withdrawn before the changes were made!) Minor rewording can easily fix that.
3. The highlighted section on pages 5 and 6 concerning the network. It seems reasonable, but I'm not particularly familiar with the details of the network layer. In particular I've no idea about how we share the Energis Network with other users or the encryption we use at the Network layer. Is this stuff relevant to this case? Also the numbers of VSAT branches are changing (though this is again probably irrelevant to this statement)

Also, as I mentioned the other day, I'm not sure what the situation is in respect to my spending time on this sort of thing. I've been happy to help Penny and Neneh when I can on the basis that it has usually been no more than an hour or so at a time. Potentially this could be a lot more and so this may need agreeing with my Management (hence I've copied this to Gill) and Time Booking codes etc arranged.

What next?

Regards

Gareth

Gareth

Please find attached Statement of Witness as discussed.
Neneh has already signed the statement as requested by Graham W but has expressed concerns hence my coming to see you.

I have asked Neneh to highlight any areas she is not comfortable with i.e. maybe having to explain in some detail in court.
Is it possible you could have a look at the statement and advise if you could sign up to this statement or perhaps an alternative would be to separate the statement out into two which you and Neneh could each agree to sign up to.

This does seem to be a one off type of statement and not sure if it will ever be brought to court but if it is Neneh is a little concerned what she might be expected to know/understand/explain should the need arise.

Many thanks for your assistance in this.

Kind Regds
