It is not clear from the report if actual money is taken, certainly in relation to the large "deposits" from the Santander card this seems to be evidence of false accounting. I'm not sure if in fact what the accused was doing was taking money from the till (hence shortfall in the stock) and ATM or he was simply bumping up the figures to make it look like he was trading (and therefore entitled to more?) better than he was.

The report doesn't read very well, even as someone used to reading this.

I have asked for statements and the documentary productions to be lodged by 12 March 15.

I sent an email to RO not containing personal data, as it is not clear that the Post Office's email is secure (it's not CJSM Net or GSI)
