Hi

I've put together a record of our meeting yesterday, and attach.

Kind regards

Penny

**Importance:** High

Hi All

I've spoken to Pete and he is able to ring in. Could we start at 9.30? If I can't get the meeting room next door to ther audit room we can meet in the audit room.

Many thanks  
Penny

Penny,

Sorry, but I'm on leave tomorrow and Friday.

My Outlook Calendar should be up-to-date with my availability.

Regards

Gareth

Hi All

Pete has asked me send a note to set up a meeting to discuss this issue.

Can everyone make 10.00, Thursday 14 August?

I've sought out relevant Peaks and KEL and attach.

Kind regards  
Penny

Alan

Can we set up a meeting please, Gareth has raised a potential issue with events which might require a change in our ARQ process.

See below, don't know if you are aware of thos already.

Pete

Pete,

Over the last couple of years we've had a couple of cases where EOD (which runs at 19:00) interferes with transactions being written at the counter. If this happens, then there is an Event written to the NT event Log.

Given we only have a couple of instances, and a fix is as likely to cause further problems, then we're reluctant to make a change to Horizon. However if Horizon data is being used in evidence for the prosecution of a Postmaster, it is probably wise to also check to see if any such events were produced during the period in question. Is this something that can / should be built into the ARQ process?

Regards

Gareth

Mik,

As discussed, I am still uneasy about this, but I agree that it is probably safer to leave things as they are.

I've discussed this with Mike and I'll mention this to Pete Sewell so that he can ensure that if we are providing evidence for an ARQ that we also check on relevant events.

Regards

Gareth

Gareth,

OK - I understand that you don't want this to be left un-fixed...

On the basis of the evidence that we have - there are 35 errors per week ( inside the 7-8pm Wednesday window) and two in 35\*52(weeks) = 1820 are known to have caused a discrepancy.

- a) SSC staff spending lots of time monitoring these events for 1-2 per year is simply not cost-effective
- b) Fixing the underlying problem of holding the "lock" for too long is feasible - from PC0152376 BUT
- c) I would want some assurance that making this change to the live estate, to resolve 2 reported issues, is NOT going to have a knock-on effect anywhere else....

I know that this is a difficult request - but I don't like changing Horizon at this stage - and I would like to be convinced that it is necessary, and that we wont make things worse..

Regards  
Mik
