## 0.4 Abbreviations/Definitions

Abbreviation	Definition
Authorised Client	This signifies projected settlement awaiting the Confirmed Client
Transaction Awaiting	Transaction. From a system perspective, an 'S' transaction - Not
Confirmation	applicable to Network Banking Reports.
Bank_Transaction_Id	Message sequence number assigned by the message originator
	(except Horizon), to assist in identifying a transaction uniquely.
	Stays unchanged through the life of the transaction.
C4 Processing Date	The System Processing Date on which the 'C4' was received by
	the DRS. Where a C4 is included on report NB101, the C4
	Processing Date is the same as the Run Date for report NB101.
C4 Settlement Date	The Settlement Date provided on the C4 transaction.
Confirmed Client	From a 'Client' perspective, a transaction that has been authorised
Transaction	to either debit or credit an account. From a system perspective, a
	'C4' transaction.
Counter Confirmations	From an outlet / POL perspective, a successfully completed
	transaction at the counter. From a system perspective, a 'C12'
	transaction.
Exceptioned Client	From a Client perspective, a transaction reconciliation difference
Transaction	highlighted within the NBE and notified to Horizon. From a
	system perspective, a 'D' transaction.
Exception Types	Within all reports the 'Exceptions' category will include:
	• 'Incomplete States', i.e. those transactions where one or more
	transaction component is missing - a C4 without a C12 etc
	Genuine exceptions where transaction components belonging
	to the same high level transaction have been exceptioned, i.e.
	C12 (amount) not = to C4 (amount) etc.
	NBE / DRS corruption's
Horizon_Txn_Num	Unique transaction number to be used in all messages between
	Horizon and the NBE relating to the transaction. Generated by
	Horizon and provided in the request message initiating the
	transaction.
'New' Transactions	Transactions that have had a change of state since they were last
	reported, or have never been reported except in NB102 section 6.
	Note that if a transaction appears in NB102 section 6 it is future
	dated as is reported in that section for information only. Once
	future dated transactions become current dated, they must be
(011) T	reported as though they have not appeared on the reports before.
'Old' Transactions	Transactions that have NOT had a change of state since they were
Dessint Data	last reported.
Receipt Date	Receipt Date is the Date as printed on the transaction Receipt at
Receipt Time	the Counter. It forms part of all transactions.
Receipt Time	Receipt Time is the Time as printed on the transaction Receipt at the Counter. It forms part of all transactions.
Reconciliation Date	The Reconciliation Date is the date attributed to a transaction to
Reconcination Date	allow POL to reconcile. It will be set the first available Bank
	anow roll to reconcile. It will be set the first available Dalik

# 0.5 Changes in this Version

Version	Changes
0.2	Changes to report layouts and format following discussions with
	POL & inclusion of revised state table.
0.3	Changes to report layouts and format following discussions with
	POL & inclusion of revised state table.
0.4	<ul> <li>Clarification provided following review comments from POL. Major revision of NB101a data definition to explain both in a business and technical sense the progression of transaction components throughout the reporting cycle. The final reconciliation and settlement in accordance with the requirements has not been amended.</li> <li>Inclusion of Incomplete State and Exception state matrices to identify report population for specific error types. Section 3.1.4.14 / 15.</li> <li>C2 transaction components have now been renamed C12.</li> <li>Revised System State Table</li> </ul>
0.5	
0.5	
	<ul> <li>New sections, 11 &amp; 12 added to NB102 to allow for Future Dated Transactions</li> </ul>
	<ul> <li>Transaction flow diagram removed from section 1</li> </ul>
	<ul> <li>Transaction now diagram removed nom section 1</li> <li>New R.A.C diagram included as section 4</li> </ul>
	<ul> <li>Definition of 'Today' removed from document.</li> </ul>
	<ul> <li>Definition of 'New', 'Old' and 'Settlement Date' included in</li> </ul>
	• Definition of New, Old and Settlement Date included in document.
	<ul> <li>Removal of exception states E15 – E19 from all reports</li> </ul>
	following revision to State Table.
	<ul> <li>New fields inserted into NB102 series reports &amp; revision of</li> </ul>
	format of cleared reports (sections $7 - 10$ )
	<ul> <li>Incomplete and Exception state amendments to some reports</li> </ul>
	where inconsistencies were evident.
1.0	Re-ordering of NB102 sections
	<ul> <li>Review following detailed check of system states</li> </ul>
	<ul> <li>New sub total lines included in NB100a and NB100b</li> </ul>
	<ul> <li>Detailed rules added to NB103</li> </ul>
	<ul> <li>Discrepancy reason codes added to NB102</li> </ul>
	NOW REMOVED FROM APPROVAL CYCLE
1.1	New Section 5 included identifying reported values in
	accordance with system states. Appropriate report rules point to
	this new section.
	NOW REMOVED FROM REVIEW CYCLE
2.0	NOW REMOVED FROM APPROVAL CYCLE
2.1	General changes following receipt of CR27 re. IBM interface
	changes

Fujitsu Services	NETWORK BANKING END TO END RECONCILIATION REPORTING	Ref:	CS/SPE/011
	COMMERCIAL IN CONFIDENCE	Version: Date:	4. <u>1</u> 0 <del>29</del> 04/ <del>07</del> 11/02
	COMMERCIAL IN CONTIDENCE	Date.	2704/0711/02

## **1.0 Introduction**

This document has been compiled to specify all Fujitsu Services Pathway outputs from the Data Reconciliation Service (DRS) to enable a generic end to end reconciliation of Network Banking transaction processing.

## 2.0 Scope

This document defines the format and content of all reconciliation reports, which satisfy the Network Banking reconciliation requirement. It does not attempt to define within the operating systems, including the Network Banking Engine, (NBE) how the transactions are processed.

The following Network Banking requirements are satisfied by this document:

- Reconciliation: [NBR0040], [NBR0042], [NBR0183], [NBR0212], [NBR0227], [NBR0229], [NBR0278], [NBR0294], [NBR0389].
- Settlement: [NBR0230], [NBR0456].
- Error Resolution: [NBR0260]

It is assumed that each of the POL clients, as dictated by Routing\_Gateway (assumed to be at this point the Banks / LINK) will require a separate reconciliation report set.

Within this report set, separate reports will be provided as per the following table:

Report Number	Deposit Transactions Withdrawal Transactions			
NB101	Combined Report			
NB102	Combined Report			
NB103	Y	Y		

NB000 is a combined report for all Routing Gateways.

The format and content of each client's report is considered to be identical when allowing for these specific requirements. It should therefore be understood that the specifications documented here are applicable to each client report set. (Specific client requirements outside of this reporting specification are not covered within this document)

There must be a separate set of reports to provide for transactions for which the Routing Gateway and/or Transaction Type is not known.

Balance Enquiries and PIN changes are explicitly excluded from the report set as 'Not Required by POL'

	COMMERCIAL IN CONFIDENCE	Version: Date:	4. <u>1</u> 0 <u>2904</u> / <del>07</del> 11/02
Fujitsu Services	NETWORK BANKING END TO END RECONCILIATION REPORTING	Ref:	CS/SPE/011

No report will mix currency, so if ever the transactions selected to appear on a set of reports are not of a single currency, then a separate set of reports will be produced for each currency. All the amounts in a single transaction will always use the same currency

### 2.1 Reconciliation Reports Specified

NB000: DRS Summary

- NB101: Network Banking Settlement Statement
- NB102: Exception Summary
- NB103: Settled Transaction / Cash Account Reconciliation Statement

Rows and columns are described in detail, together with the mathematical calculations required to achieve reconciliation.

All general aspects relating to the production and transmission of the reports are described.

This document does not attempt to define the business processes undertaken within Fujitsu Services Pathway and POL with respect to the resolution of any exceptions, which may arise, nor does it scope the requirement for any systems that may be required to assist in this process. This information can be found in the associated documents, reference:

- NB/SPE/002: Network Banking DRS On-line Workstation Specification
- NB/PRO/002: Network Banking Reconciliation & Incident Management

NB: It should be noted that where a system <u>'State'</u> definition is quoted, this takes precedence over any narrative which has only been provided to help understand the business processes.

## 3.0 General Report Specifications

A separate set of reports is produced for each POL client as identified by the Routing\_Gateway. (LINK being a single client). The specification is general to all reports sets.

- 1. For volumes and values the accounting sense for reporting purposes to allow settlement totals to be correctly derived, will be:
  - Absolute volume
  - Net value
  - Where no value reported show "[Currency] 0.00"
  - Where no volume reported show 0
  - -ve values will be shown in brackets e.g. (nnn.nn)
- 2. Each report will show the following general information:
  - Report title including the client name (derived from Routing\_Gateway.)
  - Transaction Type (if applicable)
  - Report 'Run Date' i.e., the period for which the report refers
  - Production date and time
  - Fujitsu Services Pathway report number
  - Fujitsu Services Pathway reference and contact point
- 3. Where 'Received' and 'Reconciliation Date' are quoted against time parameters:
  - 'Received = New': defines transactions that have had a change of state since they were last reported, or have never been reported, except in NB102 section 6
  - 'Received = Old': defines transactions that have NOT had a change of state since they were last reported
- Reports: <u>NB000</u>, NB101, NB102 will be produced <u>DAILY</u>, NB103 will be produced <u>WEEKLY</u> after Friday's and prior to Saturdays TPS processing schedule. They will be delivered by 08.00hrs the <u>day following the Run Date</u> to:
  - POL / TIP gateway: The Host writes the reports to a directory. These are picked up by FTMS and posted to the TIP gateway. (As per other Host to external systems applications)
  - Fujitsu Services Pathway CS / MSU, DRS Workstation.

		Version:	4.10
	COMMERCIAL IN CONFIDENCE	Date:	2904/0711/02

- 5. Within report NB 102 the 'Exceptions' category will include:
  - 'Incomplete States', i.e. those transactions where one or more transaction component is missing a C4 without a C12 etc
  - Genuine exceptions where transaction components belonging to the same high level transaction have been exceptioned, i.e. C12 (amount) not = to C4 (amount) etc.
  - NBE / DRS corruption's
- 6. For clarity within this document, field sizes are shown within 'Report Layout' and not within the 'Data Definition'
- 7. All reports are run against a consistent data set.
- 8. All reports will be produced as ASCII text files one for each report. The report layout will be fixed format with space characters providing the blank space. This will allow for 'Excel' input, using fixed field width facilities. The formatting (lines & shading referred to in this document) will not be included within the file. Every line will have the character 'newline', Hex '0A', as the last character. Each report will have the text "End of Report" as the last line.
- 9. See also comments in Section 2: 'Scope'

### **3.1**<u>3.2</u> NB101: Network Banking Settlement Statement

This report identifies 'C4' transactions received against each 'C4 Settlement Date' as reported to the DRS for the most recent processing date. The report will be used by POL as a basis for settlement of Network Banking transactions with the Financial Institutions.

### 3.1.13.2.1 NB101: Rules

- 1. NB101 is run daily
- 2. NB101 is repeated for each Routing\_Gateway
- NB101 will show 'C4' transactions received from the NBE for ONE day only breaking these down into individual 'C4 Settlement Dates' There will be one line for each 'C4 Settlement Date'
- 4. NB101 will show Deposit and Withdrawal transactions in separate columns, (headed 'Receipts' and 'Payments' respectively) derived from 'Txn\_Type'
- 5. NB101 will show a final settlement column derived in the following way:
  - Volume: Volume of Deposits plus Volume of Withdrawals
  - Value: Value of Deposits minus Value of Withdrawals
  - Where the net total is negative i.e. the Value of Withdrawals exceeds the Value of Deposits, the total will be shown as (£xxx.xx)
- 6. Where the volume for a given 'C4 Settlement Date' is nil, the date will not be reported.
- 7. 'C4 Settlement Dates' are shown in reverse chronological order.

## 3.3.4 NB103: Settled transaction / Cash Account Reconciliation Statement

This report allows POL to reconcile the settlement stream against the Outlet Cash Account stream. This reconciliation is required as settlement with the individual POL clients is based upon the 'C4 Processing Date'. To complete a full reconciliation, it is important to know which Cash Account the settled transaction was posted to, to enable a reconciliation of settlement to be made with the outlet records. This report reconciles the transactions by 'C4 Processing Date' and Cash Account record.

## 3.3.13.4.1 NB103: Rules

- 1. NB103 is run weekly: In order to align with internal POL / TIP processing it is required that this report is produced **AFTER** TPS and NB101 processing on Friday and **BEFORE** TPS processing on Saturday. The report should include all 'C4' transaction values where:
  - 'C4 Processing Date' = run date and,
  - 'C4 Processing Date' = run date minus'N' (where 'N' = 1 to 13).
- 2. Where a C112 is available and the CAP is known, the 'C4' transaction value will be posted against the appropriate CBDB CAP column
- 3. Where a C112 is available and the CAP is known, but there is no C4, it will not be reflected in the report because this report includes C4 transaction values only.
- 4. Where no C112 is available and therefore the CAP is unknown:
  - the 'C4' transaction value should be posted to <u>'No Cash Account Allocated'</u>
  - then, when the C112 becomes available, the entry should be deleted from <u>'No</u> <u>Cash Account Allocated'</u> and posted to the appropriate CBDB CAP column
  - if no C112 has been received after 14 days, <u>the entry within 'No Cash</u> <u>Account Allocated' should remain until the C112 becomes available even</u> <u>if this exceeds 14 days</u>
- 5. If a transaction is posted to the row <u>'No C/A to TIP'</u> (according to rule 2 and 3 above:
  - the transaction should remain in this row until the Cash Account has been delivered to TIP and then move up into the row <u>'C/A to TIP'</u>
  - if no Cash Account has been delivered to TIP after 14 days, <u>the entry within</u> <u>'No C/A to TIP' should remain until the Cash Account is delivered to TIP</u> even if this exceeds 14 days
- 6. As the report is run each week, the transactions should move across the report according to the CAP and the reconciliation date; for example, a transaction posted to CBDB>=plus 2 in the first week, will move to CBDB plus 1 the second week and then appear in CBDB the third week, until disappearing off the report after 14 days
- Where the columns headed 'CAPXX' are referred to, the actual report produced with show the actual CAP number, for example CBDB CAP 40 is quoted, the column 'CAPXX<=-2' will show 'CAP40<=-2'</li>

Formatted: Bullets and Numbering

Fujitsu Services	NETWORK BANKING END TO END RECONCILIATION REPORTING	Ref:	CS/SPE/011
		Version:	4. <u>1</u> 0
-	COMMERCIAL IN CONFIDENCE	Date:	2904/0711/02

- 9. A separate report NB103 will be produced for both Deposit and Withdrawal transactions derived from 'Txn type'
- 10. Five CAP's will be shown, the 'CBDB', the 'CBDB' minus 1, the 'CBDB' <= minus 2, the 'CBDB' plus 1 and the 'CBDB' >=plus 2. In addition, those settled transactions which currently have not been allocated a Cash Account will be shown.
- 11. The 'CBDB' Cash Account period (CAP) equates to **TWO** CAP's prior to the CAP applicable to the run date of the report. For example: If the report was run on Saturday 20<sup>th</sup> January within CAP42 (*CAP 42 commenced on Thursday 17<sup>th</sup> January*), the 'CBDB' CAP would be CAP40 (*CAP40 commenced Thursday 3<sup>rd</sup> January*, ended Wednesday 9<sup>th</sup> January)
- 12. Where the CAP in which the Outlet is trading is <u>numerically</u> more than 2 weeks prior to the 'CBDB' CAP, if this takes the Outlet CAP into the previous year, this will be reported as such. For example: The 'CBDB' CAP is CAP 1 and the Outlet is trading in CAP 51, this is assumed to be CAP 51 of the <u>previous</u> year, (*therefore 'CBDB' <=minus 2*) and <u>not reported ahead</u> in the current year.
- 13. The C4 processing dates will be shown in reverse chronological order.
- 14. For a given C4 Processing Date, the sum of the two Total values (for the two rows C/A to TIP and No C/A to TIP) should be equal to the Total corresponding Receipts or Payments value on report NB101 for the same Run Date.
