# **HORIZON KEL AChambers330S (Version 1)**

Type: Unresolved Status: Deprecated

Title: Unexpected error attempting to modify entry in run map (single event)

Summary: Unexpected error attempting to modify entry in run map (single event)

**Raised:** by Anne Chambers on 27/11/2000 **Last updated:** by Mike Croshaw on 20/10/2006

Release: csr\_plus
System product: Counter
Server name: None
Keywords: run map"
Status: Deprecated
Visibility: Medium
Peak: PC57957
TfS: 11162148

## **Symptoms**

Critical event on counter:<br/>
"An unexpected error occurred while attempting to modify an entry in the run map. Timeout occurred waiting for lock (0xC1090003)"<br/>
"br><br/>
This single event occurred just after midnight during LFSEndOfDay processing.<br/>
"br><br/>
Sometimes a storm of these events occurs - see KEL KEL <a href="http://SSCWEBSERV01/SSC/SSC\_KEL/kel\_view\_kel.jsp?KELRef=JBallantyne5245k.htm">JBallantyne5245k</a>

#### **Problem**

Possibly caused by an outstanding lock on the run table, which is cleared subsequently when ClearDesk runs. <br/>

Sproblem is

href="http://SSCWEBSERV01/SSC/SSC\_KEL/kel\_view\_kel.jsp?KELRef=JBallantyne5245k">JBallantyne5245k</a></kel>documents the same event where there were multiple occurrences of the error, and errors in declarations.<br/>
br><br/>
The event storms probably have the same underlying cause as the events documented in <kel><a

href="http://SSCWEBSERV01/SSC/SSC\_KEL/kel\_view\_kel.jsp?KELRef=JSimpkins338Q">JSimpkins338Q</a>.<br/>br><br/>PC0086212 is with development for problems balancing while these events are occurring.

#### **Solution - Helpdesk**

A single event can be ignored.

### **Evidence**

Do not pass further instances to SSC unless there appear to be side effects.
