Paul,

The precautionary suspension notification has not come through so please can you revert to the manual system.

I have authorised the precautionary suspension proforma but have change the content of the section headed 'reasons for precautionary suspension' as the comments did not make sense to me – please make any additional comments required.

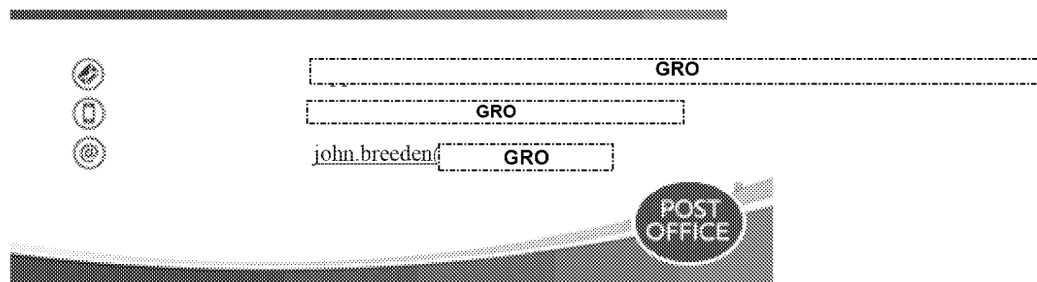

I also think this is the old format of the precautionary suspension proforma and you may want to look the latest version out for the next time you have to complete one of these documents.

One I receive the suspension notification email I will allocate to you initially to start the case and then we can look to moving the case to Robert.

Thanks

John

Hi John

I have just completed the suspension notification via Sharepoint but can't tell if this has worked so can you let me know if you have received an email notification via this method. If not I will go back to the "medieval" system.

Please see attached the form I prepared today.

Regards

Paul
