ACC 12/2009 Deployment of Post Office® op

All,

Please see the following update for ACC 12/2009 from Paul Inwood.

A point of clarification with regards to the above ACC.

You will note that the various letters embedded in the document state that POL will attempt to provide Post Office services by the most appropriate means available, and where we discuss the possible introduction of a PO essentials offer, we say that is our **preferred** option. You may also have noted from the text of the ACC that we say that we **may** deploy new operating models in communities, and talk about **possible** outcomes.

For the avoidance of any doubt, this could be taken to read that we would interview applicants who wish to apply on the basis of the subpostmaster operating model i.e. we are not precluding anyone from applying on the basis of the operating model they propose.

At the interview stage, we will seek to appoint the applicant who, in our opinion, has the best overall proposition for POL.

Please ensure that this clarification is made clear to those in your team who need to see it.

Regards

Brian
