AGQC:

Nothing changes

- Judge came to concluded view only in relation to matters B4 him. No sense. Matters not B4 him. Conc' views re matters before him were only contract issues.

They say the matters which were conc' view were in fact B4 him. No sense. He was warned many times.

oral + written. O/S made sure play w/c & examined on topics - we did that because we not want to leave uncontradicted BUT not play that those matters became part of the common issues.

They drive wedge between Judge + C's as they do say concluded view. Judge could have said can change mind BUT o/s say concluded.

AGQC: 2 - April - 2019

we go first tomorrow. may not get judgment tomorrow
validity of position turns exclusively on the judgment
and examine what the common issues were. My view (AC)
is judge came a very strange and comes to offensive
concluded views about POT and witnesses. My view say
should recuse. I don't know him.

~~AGQC~~ Team have say he will reject and will reject
leave. We will need to ask the CPTA for leave.

AGQC: rest of CIT judgment is low grade - need to get
CPTA anyway. We need offensive passages in judgment.
Wait need re-trial common issues. CPTA can put it
right. The rest of judgment innocuous. Would leave
matters should have been deciding.

AGQC: That is my view big picture

ROD: if refused and timing?

AGQC: Answer to Q depends on Judges reaction. if he
refuses and he seeks continue the CIT then urgent to
CPTA to stay CIT. could combine recusal + CIT general
appeal. Would give CPTA better total view.

Will any surprises?

AGQC: No.

They have not majored on arg' the judge capable keep open
mind. They have majored on point that judge decided
on matters before him. So they take view that judge
has come to firm conclusions. And this could take
them into conflict with the judges position.

ROD: → Plan B.

AGQC: → The judgment is our case. ~~AGQC~~ The OS
made the contrary.
